AUTHOR Weller, Carolyn R., Ed.; Brandhorst, Ted, Ed.
 TITLE ERIC Clearinghouse and Support Contractor Publications, 1996. An Annotated Bibliography of Digests, Information Analysis Products, and Other Major Publications of the ERIC Clearinghouses and Support Contractors Announced in "Resources in Education" (RIE) January-December 1996.
 INSTITUTION ERIC Processing and Reference Facility, Laurel, MD.; Computer Sciences Corp., Laurel, MD.
 SPONS AGENCY Office of Educational Research and Improvement (ED), Washington, DC.; Educational Resources Information Center (ED), Washington, DC.
 PUB DATE 1997-08-00
 NOTE 101p.; For the 1995 edition, see ED 395 595.
 PUB TYPE ERIC Publications (071) -- Reference Materials - Bibliographies (131)
 EDRS PRICE MF01/PC05 Plus Postage.
 DESCRIPTORS *Abstracts; Annotated Bibliographies; *Citations (References); Clearinghouses; Education; Educational Research; Federal Programs; Literature Reviews; Nonfiction; Publications; Resource Materials; State of the Art Reviews
 IDENTIFIERS Educational Information; ERIC

ABSTRACT

This annotated bibliography provides citations, abstracts, and indexes for the 224 documents produced by the 16 Educational Resources Information Center (ERIC) Clearinghouses in 1996. These publications consist of digests, bibliographies, state of the art reviews, and information syntheses of various types. An introduction describes the ERIC system, clearinghouse publications, the organization of this bibliography, the availability of clearinghouse publications, and adjunct clearinghouses. A statistical summary by year (1968-1996) shows the number of publications included for each clearinghouse in the series of which this bibliography is the most recent. Document resumes are provided from the following clearinghouses: (1) Adult, Career and Vocational Education; (2) Counseling and Student Services; (3) Reading, English, and Communication; (4) Educational Management; (5) Disabilities and Gifted Education; (6) Languages and Linguistics; (7) Higher Education; (8) Information and Technology; (9) Community Colleges; (10) Elementary and Early Childhood Education; (11) Rural Education and Small Schools; (12) Science, Mathematics, and Environmental Education; (13) Social Studies/Social Science Education; (14) Teaching and Teacher Education; (15) Assessment and Evaluation; and (16) Urban Education. Indexes by subject, personal author, and institution are provided. A diagram of ERIC system components and a directory of ERIC components with addresses, telephone, fax, and phone numbers, and brief descriptions of the clearinghouses' scope areas is also provided. A form for ordering microfiche or paper copy of ERIC Clearinghouse publications from the ERIC Document Reproduction Service is attached. (AEF)

Introduction

The ERIC System

The Educational Resources Information Center (ERIC) is a national information system designed to provide users with ready access to an extensive body of education-related literature and other educational resources. Established in 1966, ERIC is supported by the U.S. Department of Education, Office of Educational Research and Improvement, National Library of Education.

The ERIC database, the world's largest source of education information, contains more than 900,000 abstracts of documents and journal articles on education research and practice. Each year approximately 30,000 new records are added. The ERIC database is available in many formats at hundreds of locations. The ERIC database can be accessed online via commercial vendors and public networks, on CD-ROM, or through the printed abstract journals, *Resources in Education* (RIE) and *Current Index to Journals in Education* (CIJE). The database is updated monthly (quarterly on CD-ROM), ensuring that the information received is timely and accurate.

The ERIC system, through its 16 subject-specific Clearinghouses, associated adjunct Clearinghouses, and support contractors, provides a variety of services and products that can help users stay up-to-date on a broad range of education-related issues. Products include research summaries, digests, bibliographies, reference and referral services, computer searches, and document reproductions.

ERIC is at the forefront of efforts to make education information available through computer networks. ERIC is available to thousands of teachers, administrators, parents, students, and others through electronic networks, including the Internet, World Wide Web, CompuServe, and America Online. Network users can read and download information on the latest education trends and issues. On some systems, users can direct education-related questions to AskERIC and get a response from an education specialist within 48 hours.

ERIC Abstract Journals

Documents and journal articles selected for the ERIC database are announced in two printed abstract journals each of which corresponds to an electronic file that is made available for computer searching (online, CD-ROM, Internet, etc.) on a worldwide basis.

Resources in Education (RIE) is a monthly abstract journal devoted to the document literature. Each issue announces approximately 1100 documents. RIE is published by the U.S. Government Printing Office (GPO) and is available on subscription from GPO.

Current Index to Journals in Education (CIJE) is a monthly index journal that cites journal articles from over 900 education periodicals/serials. The core journal literature in the field of education is covered, as well as numerous other education-related articles appearing in journals peripheral to the field. Each issue of CIJE announces approximately 1500 journal articles. CIJE is available on subscription from Oryx Press.

ERIC Clearinghouse and Support Contractor Publications

In addition to collecting the literature of education for announcement in RIE and CIJE, the ERIC Clearinghouses analyze and synthesize the literature into research reviews, bibliographies, state-of-the-art studies, interpretive studies on topics of high current interest, digests, and many similar documents designed to meet the information needs of ERIC users. These publications are announced in RIE and are available in the ERIC microfiche collections provided by the ERIC Document Reproduction Service (EDRS).

Bibliographies of ERIC Clearinghouse and Support Contractor Publications

Periodically, ERIC prepares bibliographies of its Clearinghouse and other support contractor publications. Only substantive publications are selected for these bibliographies. Routine brochures, accession lists, computer searches, newsletters, etc., are not normally included. This is the twenty-seventh bibliography in the series. All items in the series to date are listed below.

	Accession Number of Bibliographies	Pages	Period Covered	Number of Items
1.	ED-029 161	24 p.	FY 1968	149
2.	ED-034 089	34 p.	FY 1969	240
3.	ED-041 598	47 p.	FY 1970	366

26.	ED-395 595	73 p.	JAN-DEC 1995	213
27.	ED-xxx xxx	77 p.	JAN-DEC 1996	224
TOTAL (1968-1996)				7,266

This bibliography covers the calendar year period from January through December 1996. It lists a total of 224 documents. Publications that have been produced through the cooperative endeavors of two or more Clearinghouses, or by ERIC Support Contractors other than Clearinghouses, have been listed under the Clearinghouse processing the item for announcement in the ERIC abstract journal *Resources in Education* (RIE).

Organization of This Bibliography

The format and arrangement of citations in this bibliography conform to that in the original announcement in RIE. Citations are arranged by Clearinghouse. Within each Clearinghouse section, documents are listed in accession number order. The content of the citations is the same as that in RIE. A sample citation is provided immediately preceding the citation section.

Three indexes are provided: Subject, Personal Author, and Institution. Index entries lead the user to an accession number. The Clearinghouse section in which the item is listed is indicated by a two-character alphabetic code in parentheses following the accession number, e.g., ED-123 456 (TM).

Availability of ERIC Clearinghouse and Support Contractor Publications

ERIC Clearinghouse publications are published by the individual ERIC Clearinghouse responsible for producing them. As long as stocks last, original copies are usually available directly from the responsible Clearinghouse. In addition, however, they are announced in RIE. They are then contained in all ERIC microfiche collections and may be ordered in microfiche or paper copy from the ERIC Document Reproduction Service (EDRS).

For instructions on how to order materials from EDRS, see the appendixes in the back of this publication.

Adjunct ERIC Clearinghouses

An Adjunct ERIC Clearinghouse is an organization having a special interest in a topic within a regular ERIC Clearinghouse's scope and willing to affiliate itself with that Clearinghouse, at no cost to ERIC, for the purpose of improving bibliographic control over the literature in the special interest area.

There are currently a total of ten Adjunct ERIC Clearinghouses: Child Care; Clinical Schools; Consumer Education; Entrepreneurship Education; ESL Literacy Education; International Civic Education; Law-Related Education; Service-Learning; Test Collection; and U.S.-Japan Studies. During 1996, some of these organizations produced publications of their own. These publications are highlighted in a special "Adjunct" resume section immediately following the arrangement of resumes by announcing Clearinghouse. Resumes for Adjunct ERIC Clearinghouses also appear under the Clearinghouse which announced them in RIE.

ACCESS ERIC

ACCESS ERIC is a component of the ERIC system specifically responsible for facilitating access to ERIC and to the information that it contains. Users who are uncertain as to exactly which ERIC component to contact may call ACCESS ERIC's toll free number (800-LET-ERIC (538-3742)) for advice and consultation.

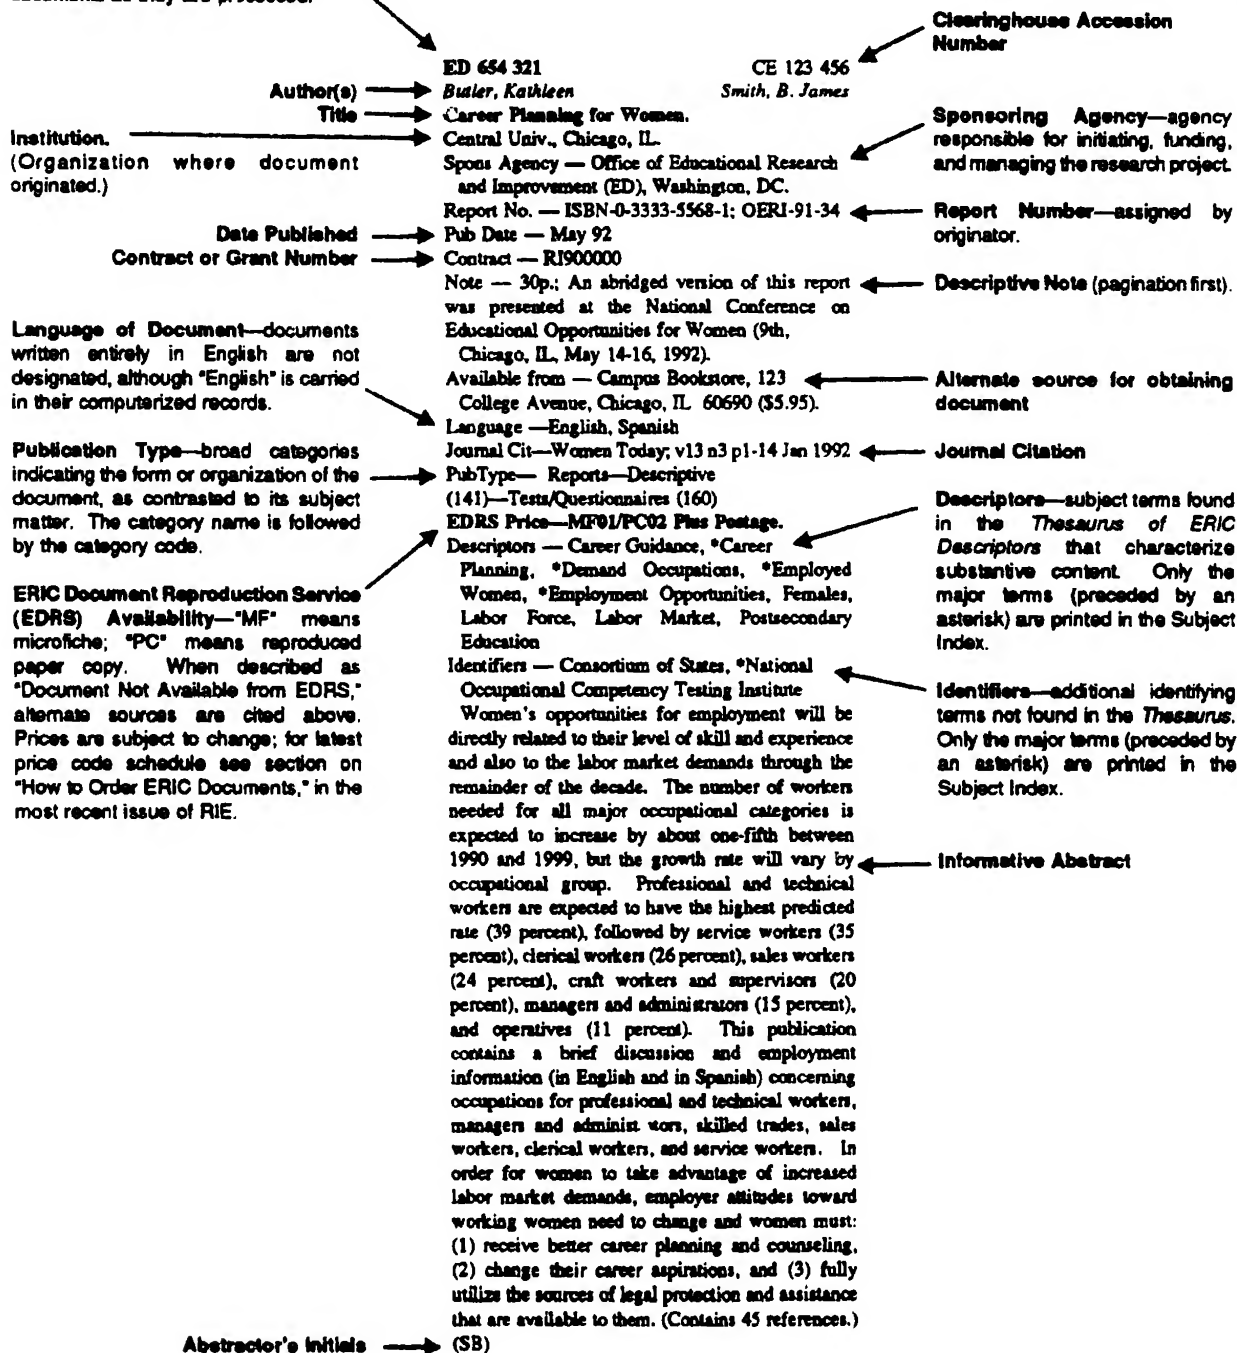

AskERIC

AskERIC is an Internet-based question-answering service operated by the ERIC Clearinghouse on Information and Technology (IR). Questions directed at AskERIC's Internet address (askeric@erici.syr.edu) are answered within 48 hours either by IR staff or by the staff of the appropriate ERIC component. Answers are directed back to the user's own Internet address.

Wagner, Judith O.

Using the Internet in Vocational Education.
ERIC Digest No. 160.

ERIC Clearinghouse on Adult, Career, and Vocational Education, Columbus, Ohio

Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.

Report No.—EDO-CE-95-160

Pub Date—95

Note—4p.

Pub Type—Information Analyses - ERIC IAP's (071) — ERIC Digests (073)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Computer Mediated Communication, *Computer Networks, *Computer Uses in Education, Electronic Mail, Electronic Text, Higher Education, Information Networks, Postsecondary Education, Secondary Education, Teleconferencing, Vocational Education

Identifiers—ERIC Digests, *Internet

Vocational educators are using the Internet in various ways. The director and associate professor of vocational-technical education at Dakota State University uses the Internet primarily for electronic mail. Students in a secondary vocational teacher's international trade and marketing class have participated in real-time conferences with schools in Finland, Israel, and many places in the United States. Students in the University of Florida counseling program use e-mail, search the World Wide Web (WWW) for information, and have group e-mail sessions. Advantages of using the Internet include the following: ability to arouse students' interest, ease of communication among teachers for sharing ideas, availability of new resources, potential to develop new relationships all over the world, and possibility of interaction with experts. Problems are antiquated hardware and software; lack of technical and curriculum support; lack of coherent structure, stability, and documentation; and lack of training, censorship, and quality control. (This digest includes lists of listservs, newsgroups, WWW sites, addresses, and electronic journals and newsletters of interest to vocational educators. Contains seven references.) (YLB)

ED 385 778

Lankard, Britina A.

New Ways of Learning in the Workplace.
ERIC Digest No. 161.

ERIC Clearinghouse on Adult, Career, and Vocational Education, Columbus, Ohio.

Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.

Report No.—EDO-CE-95-161

Pub Date—95

Note—4p.

Pub Type—Information Analyses - ERIC IAP's (071) — ERIC Digests (073)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adult Education, *Experiential Learning, *Incidental Learning, Labor Force Development, Learning Strategies, Lifelong Learning, On the Job Training, *Staff Development, *Teaching Methods

Identifiers—ERIC Digests, *Situational Learning

New ways to learn at work draw upon workers' previous experiences, link concepts and practices, and encourage reflection and the transfer of knowledge from one situation to another. Action, situated, and incidental learning are three current approaches. Action learning is a systematic process through which individuals learn by doing. It has been adopted in the workplace as a viable approach to experiential management education and development and an important element of a training and development strategy. In the situated learning approach, knowledge and skills are taught in contexts that reflect how the knowledge will be used in real-life situations. Cognitive apprenticeship is one example of situated learning in which learners participate in a community of practice that is developed through activity and social interaction. It is ways similar to that in craft apprenticeships. Incidental learning is unintentional and unexamined. The primary intent of the activity is to accomplish the task, not to learn. Each of these three ways of learning share common qualities and attributes. All engage learners in experiential learning, and all have a collective dimension. The gap between the learner and expert disappears. Conditions that enhance learning common to the three approaches are proactivity, critical reflection, and creativity. Since they involve experiential activity, these three ways of learning offer promise to organizations striving to achieve high performance. (Contains 11 references.) (YLB)

Imel, Susan

Inclusive Adult Learning Environments. ERIC Digest No. 162.

ERIC Clearinghouse on Adult, Career, and Vocational Education, Columbus, Ohio.

Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC

Report No.—EDO-CE-95-162

Pub Date—95

Note—4p.

Pub Type—Information Analyses - ERIC IAP's (071) — ERIC Digests (073)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adult Development, *Adult Education, *Adult Learning, *Cultural Context, Cultural Differences, *Educational Environment, Learning Theories, Power Structure

Identifiers—ERIC Digests

Adult educators are recognizing that factors in the learning environment related to psychological, social, and cultural conditions exert a powerful influence on learners' growth and development. Current discussions on learning environments have broadened to include the need to confront issues of sexism and racism, interlocking systems of power and oppression, and social justice. In creating an inclusive learning environment, addressing institutional and societal levels is important, but the most significant level is the selection of appropriate materials and methods that address the characteristics of learning group members. Working toward the goal of creating an inclusive learning environment may give rise to some issues, especially those related to power and control. At the most basic level are the traditional power relations that exist between learners and teachers. The need to maintain a balance between being learner centered and learner positive can also be an issue. Suggestions to guide the development of inclusive learning environments include the following: acknowledge that all individuals bring multiple perspectives to any learning situation; recognize that a learner's claimed identity will be in response to many contextual factors that position the individual politically; reflect and value the experiences of learners; pay attention to power relations inherent in knowledge production; and acknowledge the power disparity between the teacher/facilitator and students. (Contains 14 references.) (YLB)

Kerka, Sandra

Not Just a Number: Critical Numeracy for

Adults. ERIC Digest No. 163.

ERIC Clearinghouse on Adult, Career, and Vocational Education, Columbus, Ohio.

Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.

Report No.—EDO-CE-95-163

Pub Date—95

Note—4p.

Pub Type—Information Analyses - ERIC IAP's (071) — ERIC Digests (073)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adult Basic Education. *Adult Learning, Basic Skills, Daily Living Skills, Educational Philosophy, Educational Theories, Mathematics Anxiety, *Mathematics Instruction, *Numeracy, Political Influences, Socioeconomic Influences, Teaching Methods

Identifiers—ERIC Digests

Emerging perspectives on numeracy and their social, cultural, and political implications provide a context for new ways of thinking about adult numeracy instruction. Beyond daily living skills, numeracy is now being defined as knowledge that empowers citizens for life in their particular society. Thus, numeracy has economic, social, and political consequences for individuals, organizations, and society. Despite the myths surrounding math and numeracy, the realities are as follows: numeracy is culturally based and socially constructed; math reflects a particular way of thinking; numeracy reflects cultural values; numeracy is not just about numbers; math evolves and changes; numeracy is about procedural, practical knowledge; and numeracy involves different ways of solving problems. This perspective of numeracy and math suggests that numeracy instruction should be based on the belief that everyone can do math and everyone uses numeracy practices that may go unrecognized. Literacy and numeracy should be linked and contextualized. Familiar contexts may make math more accessible for those who have been alienated from it. Contextualized math can help learners recognize the math characteristics of everyday situations and can help learners with different ways of thinking. Teaching from the perspective of adult education as a tool for social justice, instructors can change the system in which math serves as a barrier and equip people with knowledge and tools to examine and criticize the economic, political, and social realities of their lives. (Contains 11 references.) (YLB)

Lankard, Betina A.

Career Development in Generation X. Myths and Realities.

ERIC Clearinghouse on Adult, Career, and Vocational Education, Columbus, Ohio.

Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC

Pub Date—95

Note—4p.

Pub Type—Information Analyses - ERIC IAP's (071)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adult Education, *Career Development, Career Education, Employer Employee Relationship, *Employment Patterns, Labor Force Development, *Work Attitudes, *Work Ethic, *Young Adults

Identifiers—*Generation X

Several myths relate to the question of whether Generation X, the population cohort following the Baby Boomers, has different values, work ethics, and attitudes toward work and career development. The first myth is that individuals in Generation X are slackers, lacking career drive and ambition. The reality is that Generation X may just view the concept of career differently. They use job hopping as a way to build their skills and make themselves more marketable. They are more self-sufficient and outcome based. Given their priorities of money, power, and status, many are becoming entrepreneurs. The second myth is that individuals in Generation X are poorly suited to today's career realities. The reality is that individuals in Generation X have higher lev-

els of education than those in previous generations. The real assets they bring to the workplace are their knowledge of technology and ability to concentrate on a number of tasks at one time. They are also accepting of change. A third myth is that individuals in Generation X have little influence in the workplace. The reality is that the type of training companies do is being shaped by the learning style of this generation. Generation X is also shaping company leadership, since they require more coaching and feedback from supervisors than previous generations. They expect their opinions to count. Of the greatest significance may be the workplace changes influenced by the cultural diversity of this generation. (Contains 12 references.) (YLB)

Descriptors—Adult Education, Elementary Secondary Education, Employer Employee Relationship, Higher Education, *Labor Force Development, *Organizational Change, *Organizational Development, Participative Decision Making, Teamwork

Identifiers—*Learning Organizations

Any type of organization can be a learning organization (LO) if it possesses certain characteristics: provide continuous learning opportunities, use learning to reach its goals, link individual performance with organizational performance, foster inquiry and dialogue, embrace creative tension as a source of energy and renewal, and be continuously aware of and interact with its environment. Businesses that practice LO principles are Johnsonville Foods, Harley-Davidson, Motorola, Corning, AT&T, and Fed Ex. Sullivan Elementary School in Tallahassee (Florida) has applied LO quality principles to transform itself. Despite theoretical support and some real-life examples, some critics claim the learning organization is a myth, not a reality. Some cite a lack of critical analysis of the theoretical framework of the LO. They suggest that few studies support the relationship between individual and organizational learning. Another critic sees the primary purpose of most organizations as the production of goods and services, not the acquisition of knowledge/learning. Schools that have been evaluated along Senge's five disciplines have also been found lacking. Barriers that prevent the LO from becoming a reality include the following: lack of effective leaders, the inability to recognize and change existing mental models, learned helplessness, tunnel vision, truncated learning, individualism, and a culture of disrespect and fear. The LO may best thought of as a journey, not a destination, a philosophy, not a program. (Contains 19 references.) (YLB)

Relationship, Parent Background, Parent Influence, Parent Role, Secondary Education

Identifiers—ERIC Digests

Family influence is an important force in preparing youth for their roles as workers. Family background factors found to be associated with career development include parents' socioeconomic status, their educational level, biogenetic factors, and family income. Family processes of interaction, communication, and behavior influence what the child learns about work and work experiences. Attitudes about school and work, educational and career goals and aspirations, and values have a long-term impact on a youth's career choices, decisions, and plans. Parents from different groups have different types of influence on the educational and occupational decisions of both boys and girls in the family. Mexican American parents want more education for their children than the children may want. Although they are focused on the role of continuing education in the career development process, Korean parents focus on career selection. Their strong desire is for their children to be professionals and earn money and prestige. Types of parental involvement in adolescents' career development are positive involvement, noninvolvement, and negative involvement. The greatest anxiety adolescents feel about their career decisions is in response to parents' negative involvement. Structuring parental involvement in adolescent career development is an important element of a school's career counseling. Counselors should work directly with parents and provide information and support. (Contains 10 references.) (YLB)

Identifiers—ERIC Digests, *Secretaries Commission on Achieving Necessary Skills

The Secretary's Commission on Achieving Necessary Skills (SCANS) report challenged schools, parents, and businesses to help all students develop competencies in the basic skills, thinking skills, and personal qualities required for work in the current and future workplace. In response to this challenge, vocational-technical programs were redesigned, and efforts such as tech prep were initiated. Tech prep programs in Texas, Indiana, and Ohio were designed around the SCANS competencies. Examples of state and local efforts to strengthen the connections between schools and work were The Critical Skills Foundation (Wheaton, Illinois) and Project C: Communities, Corporations, Classrooms (Fort Worth, Texas). The Department of Defense Dependents Schools in Germany initiated Project SCANS Integration to explore how well all high school instructors would be able to integrate the desired competencies into their courses and how well the competencies could be rated and recorded for their students. Positive results came from the 1993-94 pilot test. The publication, Teaching the SCANS Competencies, contains practical suggestions for applying SCANS in the workplace. (Contains 10 references.) Descriptors—*Academic Persistence, *Adult Basic Education, Adult Counseling, *Adult Dropouts, Adult Learning, *Adult Students, *College Students, Dropout Characteristics, *Dropout Prevention, Dropout Research, Higher Education, Potential Dropouts, School Holding Power, Student Attrition, Withdrawal (Education)

Identifiers—ERIC Digests

Although attrition is repeatedly described as the number one problem in adult basic education (ABE), the raw numbers of attrition rates do not tell the whole story. Studies show noncompleters in both ABE and higher education sometimes leave when they feel their goals have been realized. Counting adults who "stop out" as dropouts is also misleading. Retention is linked to a number of factors: a gap between learner expectations and reality; past school and home experiences; educational and practical concerns; and social integration. Adults now make up at least 50 percent of higher education enrollments. Perhaps attrition has increased because more learners are now at varying stages of the life cycle compared to the traditional 18- to 22-year-old cohort. Social integration has a significant positive effect on retention, although social integration for adults may be better defined as how one integrates pursuit of education into one's overall life. As in ABE, noncompletion is the most successful outcome for some nontraditional college students. For adult learners in both ABE and higher education, early detection of those at risk of withdrawing and follow-up of those who have withdrawn are effective practices to help adults persist. Strategies for ABE include material challenging to adults, opportunities to succeed at something in every class meeting, and alternative arenas for success. Strategies for higher education include pre-enrollment counseling, personal attention, and flexible, convenient scheduling. (Contains 17 references.) (YLB)

Descriptors—*Adult Counseling, Adult Development, Adult Education, Adults, *Career Counseling, *Counseling Techniques, Cultural Differences, Dual Career Family, Employed Women, *Family Work Relationship, Life Style

Identifiers—ERIC Digests

In an era of organizational restructuring and technological change, individuals can no longer plan on spending their entire working lives with one organization. Career paths are no longer a linear rise up the ladder. Adult career counselors deal with an extremely heterogeneous population who are at vastly different stages of life. Their clients' career issues are complicated by family responsibilities and work and life experiences that color their attitudes, values, and decisions. Counselors must be familiar with adult development and adult learning theories and need varied approaches for these different types of clients. Because careers are integral to identity in this culture, adult career counseling becomes an exploration of personal identity and meaning—issues different for men and women. The rise in the number of dual-career couples has given a new focus to counseling—the link between work

and family life for both men and women. Another trend affecting career counseling is the expansion of life choices for older adults. Greater attention is finally being given to cross-cultural issues. Counseling diverse clients should take into account three factors: similarities across cultures; unique aspects of cultures that influence members; and individual characteristics. Appropriate assessment must include problem identification, assessment of coping responses, and use of subjective information. Assessment also has gender and cultural dimensions. (Contains 13 references.) (YLB)

Descriptors—Adult Education, Bilingual Education, Immigrants, *Language Acquisition, *Limited English Speaking, Private Sector, Public Sector, *Second Language Instruction, *Second Language Learning, Vocational Education, *Vocational English (Second Language)

This critical review of the literature examines the characteristics and needs of limited English proficient (LEP) adults and the programs and services typically available to them. The complexities of the LEP population are explored first, including differences in education, English proficiency, labor market experience, and economic status. Availability of programs and services for LEP adults in both the public and private sectors is described. Private sector initiatives in business and industry and community-based organizations are discussed. The vocational instructional delivery system for LEP persons includes several approaches: bilingual education, "sheltered" content instruction, and multilingual/multicultural methods. To increase awareness of the issues involved, the paper discusses how people acquire a second language and what methods are most beneficial in aiding second language development. The monograph concludes by decrying the lack of reliable information about the LEP population and the bias against instruction in the native language. Recommendations for improving access to programs and services encompass a number of areas: enforcement of civil rights legislation, more support for bilingual/multilingual instruction, improvement in the research base, more training for service providers, and collaboration among organizations. The paper contains 60 references and a glossary. (SK)

*Tech Prep, *Technical Education, Vocational Education

In the 1990s, the changes brought about by technology, the global economy, and demographics have necessitated the reform of educational systems. One response, given impetus by federal legislation, is tech prep, an articulated secondary-postsecondary program that provides technical preparation in an occupational field, integrates academic and vocational education, and leads to placement in employment. This paper poses questions and offers answers from the literature regarding tech prep as an educational reform approach. The queries address major issues concerning tech prep strategies, processes, teams, and evaluation and planning. The answers offer a practical response, example, or consideration. The introduction presents the tech prep vision and why it is needed. The next section addresses strategies that are proving effective, their target audience, and how they should be implemented. The importance of tech prep processes, including the establishment of performance standards, professional teacher development, and collaboration with employers is discussed. Teamwork as an essential ingredient in tech prep success is highlighted, including the involvement of all stakeholders from business, industry, labor, education, and the community in planning, curriculum development, and evaluation. The role of evaluation and planning in consortia and at the state level is described. The last section considers the future of tech prep and why it should continue, providing a checklist of questions that can be used to assess existing programs and guide their future development. Descriptors—Curriculum Development, Educational Change, *Educational Innovation, Futures (of Society), *Integrated Curriculum, Labor Force Development, Organizational Change, Postsecondary Education, *School Restructuring, Secondary Education, *Vocational Education

Educational restructuring is influencing the change in names of vocational education specialty areas as well as the change in course offerings for the specialties. In some schools, the name "vocational education" has been replaced with new names more reflective of the school's restructuring efforts. Within a given area, new courses are being added to reflect the advent of new technologies and management practices in the workplace. Guiding school restructuring efforts is the knowledge that skills required for employment should be taught in courses in which the content is allied with real world living and working. Spearheading the restructuring of courses and course requirements for vocational education is the integration of academic and vocational programs. School organizational and vocational education restructuring efforts have resulted in the initiation of a number of innovative instructional practices besides the integration of academic and vocational education. For example, Connecticut educators have introduced several such practices: interdisciplinary curriculum, chemistry with computers, principles of technology, authentic assessment-mathematics, science-math-technical curriculum, portfolio assessment, total quality management techniques, "green wave" enterprises, and multilevel classes. (Contains 14 annotated print resources on restructuring in vocational education for adult, career, and vocational educators.) (YLB)

Descriptors—*Adult Basic Education, *Adult Literacy, Economically Disadvantaged, Educational Needs, Educational Objectives, Educational Opportunities, *Educationally Disadvantaged, Federal Aid, *Females, *Literacy Education, Womens Education

Identifiers—*Empowerment

The recent United Nations Fourth World Conference on Women concluded that if women are to advance in status socially, economically, and politically, they must have access to high quality education. Although women in the United States have steadily increased their educational status, the fact that 23 percent of women aged 25 and over have not gone beyond high school reveals that, as a group, women are still educationally disadvantaged. Recently, more attention is being given to the needs of women literacy learners in the United States. Georgia State University's Center for the Study of Adult Literacy has begun sponsoring conferences on women and literacy, and Laubach Literacy Action has been providing financial support to programs that empower women and developing a network of programs serving women. A growing literature base supports work with women literacy learners. Although much of the information has been generated abroad (e.g., Canada, Australia, Great Britain), it raises issues that have relevance for programs in the United States, including goals and purposes, rationale for women-only programs, and the status of literacy workers. Contains 19 annotated resources that can be consulted for additional information. Five resource organizations are also listed. (YLB)

Descriptors—Air Pollution, Career Development, *Careers, Educational Needs, *Employment Qualifications, *Environmental Education, Environmental Standards, *Environmental Technicians, Hazardous Materials, Higher Education, Job Skills, Masters Degrees, Occupational Information, Solid Wastes, *Technical Occupations, Waste Disposal, Water Pollution, Water Treatment

Identifiers—*Environmental Occupations

The fact that environmental occupations cannot be easily categorized reflects the extent to which many occupations and industries are increasing their focus on the environment. Heightened public awareness of the environment and increased regulation through government pollution control and clean-up laws are influencing the trend toward an increased environmental focus in existing jobs and the emergence of new environmentally related jobs and businesses. Environmental occupations are driven by government funding. The focus of government policy has shifted from water supply (1960s) to solid waste management (1970s), from hazardous waste management (1980s) to air quality (1990s). Emerging jobs reflect the current emphasis of government policy on pollution control. Education and training requirements for environmental workers are changing with the times as well. A technical background is required of most environmentalists. Master's degrees or two-year technical degrees are the trend. Environmentalists need field experience and supervisory ability to secure the best jobs. Five types of environmental specialist occupations have been identified: environmental engineers, epidemiologists, wetland ecologists, environmental trainers, and environmental service technicians. Within all five, the trend for related occupations is toward higher educational requirements. Skills in math and science are essential; communication skills are strongly desired. Internships and volunteer opportunities are ways to get on-the-job experience. (Contains 13 annotated print resources and 3 resource organizations.) (YLB)

Identifiers—*Older Workers

An increasing proportion of the work force is aging at the same time that the workplace is changing in ways that are detrimental to older workers. Attitudes and beliefs about older workers appear to be ambivalent. Studies show that employers and managers stereotype older workers as loyal and possessing good work habits but inflexible and difficult to train. The relationship between age and job performance is complex and far from understood. Much research on aging and work performance has not included a detailed analysis of contextual factors—such as opportunities for retraining—that provide a link between individual changes and work performance. No basis exists for the stereotypes surrounding the ability of older adults to learn new skills. The more critical issue related to training for older workers is lack of access. Older workers do not fear change; they fear discrimination. Ageism, resulting in a grey ceiling that denies older workers equal opportunity and equitable treatment, appears to be a serious issue in the workplace. The most significant barriers and deterrents are managerial biases that older workers are too costly, too inflexible, and too difficult to train. Biases can be overcome through providing companies with more information about the relationship between older workers' assimilation of job-related training and their learning style and a better understanding of older adults' responses to new technology. (Contains 13 references.) (YLB)

Some misconceptions surround youth organizations and their contribution to career and occupational development. The first myth is that student

youth organizations have diminishing value to today's vocational education students. The truth is that vocational educators have identified strong vocational student organizations (VSOs) as an essential component of high quality vocational education. Students are very articulate about the benefits they have realized through participation. Research studies show participation in activities benefits career development. A second myth is that the strength of youth organizations is their focus on leadership activities. According to adult postsecondary members, the primary goal of membership is to develop competencies necessary for employment in a high performance economy. A third myth is that student organizations are nice extracurricular activities for motivated students. Today, student organizations are working to ensure that their activities are integrated into the classroom curriculum. A fourth myth is that teachers' involvement in student organizations remains strong. Teachers are facing a time crunch. To enlist teacher support, some organizations are devising new ways to reach them. A final myth is that state and federal funds provide sole support to VSOs. As federal funds have been cut, states can no longer carry the burden of financial support. VSOs must make stronger efforts to secure support from the business community. (YLB)

An initial evaluation of tech prep revealed the following: (1) by 1993, nearly half the nation's school districts were involved in tech prep consortia; (2) changes resulting from tech prep have been more evident at the secondary than the postsecondary level; and (3) tech prep students are most likely to be white and attend a suburban school district in a southern state. An in-depth study of 10 tech prep consortia established the following trends: (1) articulation agreements linking individual courses at the high school and college levels are a major defining feature of tech prep; (2) although consortia have made some efforts to upgrade vocational education curricula, most curriculum change has focused on introducing applied approaches to teaching math, science, and English; and (3) views of the objectives/content/audience of tech prep vary greatly among individual consortia as do the structures for planning and coordinating tech prep development. The consortia studied were also facing the following issues: the importance of articulation in tech prep development, tech prep's impact on postsecondary education, and the role of employers in developing tech prep programs. (Contains an annotated bibliography of 18 print resources and 6 resource organizations concerned with tech prep.) (MN)

Identifiers—ERIC Digests

Some of the newest methods of distance learning (DL) use the Internet and the World Wide Web. DL on the Internet usually takes one of the following forms: electronic mail; bulletin boards/newsgroups; downloading of course materials or tutorials; interactive tutorials on the Web; real-time, interactive conferencing; "intranets" (internal, limited-access websites); or information. Advantages of delivering DL on the Internet include the following: time and place flexibility; potential to reach a global audience; no concern about compatibility of computer equipment and operating systems; quick development time; easy updating of content; and usually lower development and operating costs. Some disadvantages are limited bandwidth and slow modems that hamper delivery of sound, video, and graphics; reliance on learner initiative; information overload; access; and social isolation. Multimedia/hypermedia contexts support constructivist approaches to learning. Computer discussion also requires and facilitates learning-how-to-learn skills. Social isolation can be a drawback, but learning communities are developing in cyberspace. Online courses often feature consensus building and group projects, through which learners can develop skills in collaborating with distant colleagues and cooperating with diverse individuals—skills increasingly needed in the global workplace. To help learners make effective use of DL methods, skilled facilitation by teachers is essential. (Contains 13 references.) (YLB)

Identifiers—ERIC Digests

Computer-based career information systems (CCIS) provide local labor market information. Guidance counselors frequently use CCIS in conjunction with clients, but youth and adults also access CCIS independently to obtain career information. The best known CCIS are the state-based career information delivery systems (CIDS). Although developed by a number of different vendors and customized for particular audiences, CIDS share these core features: assessment, occupational search, occupational information, and educational information. A significant characteristic of CCIS is their versatility. For example, in Notus, Idaho, fourth-grade students are introduced to the Idaho Career Information System by a guidance counselor who uses it as a building block for future career education activities. Oregon has adapted its career information system to deliver tech prep information through a specially developed software program. Employees at Niagara Mohawk Power Corporation in upstate New York use a computerized career information system for their personal career management. Some indications of future applications can be seen in current trends. Developers are moving toward multimedia versions of CCIS products using CD-ROM technology. One product on the market offers linkages to the Internet. Issues affiliated with the future of CCIS are the need for information management skills and access and equity. (Contains 10 references.) Identifiers—ERIC Digests

Many educators believe the role of vocational education is to prepare students for work in a given trade or vocational area with the focus on job skill

training. Some contend vocational education should concentrate more broadly on all aspects of students' career development, including lifelong learning, employability, and cognitive skills. One way to expand the focus of vocational education is through the integration of academic and vocational education. Some states, such as Ohio, have redesigned their vocational education curricula to address state skill standards that have been expanded to include the academic competencies and skill levels needed to enter a given occupation or occupational area. Interdisciplinary curricula are another form of academic/vocational integration that has gained interest across the country. A comprehensive educational program must show the correlation between learning to work and learning to think. Connecting content of knowledge with the context of application enables students to expand their ability to solve problems. Constructivism requires that teachers follow practices that lead students to engage in higher-order thinking. The concepts of career development offer an expanded focus for vocational education, one that extends to include transitional components such as academic skills, productive work habits, work values, and career decision-making skills. Identifiers—Freire (Paulo), Horton (Myles)

To what extent was social change on center stage during adult education's formative years? Whose vision embraced social change and whose did not? What factors led to the decline of social action as a goal of adult education, and what factors suggest renewed interest in social goals? This paper examines these questions, beginning in the 1920s with the vision of Eduard Lindeman and John Dewey. It considers the contradictory roles of adult education practice bringing learners into conformity with mainstream expectations; selecting, developing, and validating the privileges of an educated elite; and linking learning with social change. The influence of human capital theory upon adult education practices has fostered divisions between those concerned with developing autonomous individuals and those concerned with encouraging social responsibility, between those focused on professional status for adult educators and those emphasizing social action. In the 1980s, such movements as popular education, feminism, and critical theory led to increasing calls for a revitalized adult education curriculum focused on transformation and learning to take action. Two influential educators inspired practice for social change: Myles Horton and Paulo Freire. As adult education becomes a big business and remains an instrument for the legitimation and perpetuation of the status quo, grassroots efforts continue to link learning with democratic social change. The paper concludes that what may be needed is reconstruction of the foundations of adult education and possibly renaming of the field of practice and study. Contains 126 references. (Author/SK)

Major changes in the workplace have changed the social contract between employer and employee and rendered many traditional models of career development inadequate. This paper examines the effects of a changing workplace on the individual and on career development. These changes in the workplace have created new types of organizations and new roles for individuals. Organizations no longer can provide job security and protection. Individuals are required to assume greater responsibility for their careers and must develop new skills and attitudes to manage their own careers. The old employment contract was characterized by a parental relationship and the exchange of loyalty and hard work for job security. A new contract, based on interdependency and the principles of partnership and open and honest communication, is recommended. The evolution of organizational career programs is briefly examined, and changing approaches to career development are explored. A new approach to career development is outlined, based on the concept of individual career self-reliance and a career resilience model for career development is proposed. Many educational professionals have some knowledge of assessment practices, ranging from principles of test development and use to the practices associated with the use and interpretation of standardized and teacher-made tests. The skill levels associated with many important student assessment principles are, however, not consistent with the Standards adopted by professional organizations. Various standards that have been developed

and endorsed by professional associations in education are important documents and they provide excellent guides for the professional development of educators who work with assessment issues on a regular basis. Assessment skills and knowledge of counselors, principals, and teachers are lacking in some important areas while in other important areas these educational professionals are highly skilled and knowledgeable. Identifiers—ERIC Digests

The purpose of this digest is to describe school counselors' roles in the area of assessment through an historical review of testing in counseling, and to report on study findings regarding roles employers require school counselors to perform. Knowledge needed by counselors to obtain evidence, evaluate its usefulness, and interpret its meaning have long been and continue to be debated. In the 1960s tests were viewed positively, but by the 1970s it was felt that "the marriage between tests and counseling had failed." The negative consequences of "labeling" were emphasized. However, assessment has remained commonplace in schools and, particularly in vocational guidance, used principally as a guide for professionals to seek additional information for decision making. The job role expectations of counselors can be divided into six areas: (1) counseling (individual and group); (2) pupil assessment; (3) consultation; (4) acting as information officer; (5) acting as school program facilitator; and (6) research and evaluation. Each of these have assessment-intensive aspects such as test interpretation, test development, evaluation of programs, consulting, and research. Thus, the assessment skills counselors need include: doing pupil assessment, doing program evaluation, and using basic research. Contains eight references. (JBJ)

ality Assessment, *Psychological Evaluation, Qualitative Research

Identifiers—ERIC Digests

Assessment is broader in scope than testing. Typically, assessment includes gathering and integrating information about a client in a manner that promotes effective treatment. This digest discusses how counselors can use assessment as a continuous process throughout treatment. It also reviews three common forms of assessment techniques which can be used in conjunction with testing: (1) Qualitative Assessment; (2) Behavioral Assessment; and (3) Past Records. Continuous assessment influences the direction of treatment for two reasons: (1) presenting concerns and client circumstances are not static and often need to be modified or re-ordered; and (2) assessment can aid in evaluating the efficacy of treatment. Continuous assessment allows comparisons between the client's initial baseline functioning and current functioning. Qualitative assessment techniques often consist of games and simulation exercises that are flexible, open-ended, holistic, and nonstatistical. Clients can process what they learned from the experience immediately within the counseling session. Behavior assessment looks at manifest behaviors. Emphasis is placed upon identifying antecedents to problem behaviors and consequences that reduce their frequency or eliminate them. Counselors should also utilize client's past records to identify important patterns and ineffective treatments. (JBJ)

The Council for Accreditation of Counseling and Related Educational Programs (CACREP) was organized in 1981 as the accrediting agency responsible for reviewing and evaluating counseling and student affairs practice in higher education programs against a set of nationally recognized standards. The CACREP accreditation process incorporates a pattern of review that includes integral self-study of the program against nationally accepted criteria, followed by an on-site visit by an evaluation team, and a subsequent review and accreditation decision rendered by a central governing group. This digest explores the specific levels of assessment and evaluation involved in the CACREP accreditation process as well as provides an overview of the curricular experiences in assessment and evaluation. Identifiers—ERIC Digests, National Board for Certified Counselors

Certification of professional counselors is presently viewed in two realms, that of state regulation and of national voluntary credentialing. This digest considers national voluntary certification. The first national certification began in 1972; in 1983 the National Board for Certified Counselors (NBCC) began certification for general practice counselors. Clinical mental health counselors and career counselors have merged with NBCC to become a specialty certification of the general practice of counseling. Across the realm of certifications in the counseling profession is the common thread of assessing individual counselors, training, supervision, experience, and knowledge; the similarities across the processes are remarkable. Other areas of assessment include job analysis and continuing training. Job analysis is not directly applied to the individual applicant for certification, but to a large group of practicing professionals. It is the precursor to assessment of certificants. Continuing training is an ongoing assessment practice that begins after credentialing is achieved. While counseling is an emerging profession, the NBCC has kept pace with national mandates for state-of-the-art assessment techniques. (JB1)

Identifiers—ERIC Digests

Assessment of counselor performance is directly linked to assessment of counseling outcomes because counseling outcome is contingent upon counselor performance. Thus, the assessment of counseling outcome literature is the general context for the more specific literature on assessment of counselor performance. Historically, counselor performance has been assessed primarily in regard to actual counseling service rendered through assessments by counselors, clients, or external evaluators. Each of these areas is examined. Recently, non-counseling activities also have been assessed as part of the overall evaluation of counselor performance. Good assessment involves multiple measurements of whatever is being assessed. There are literally hundreds of assessment instruments and techniques available to assess various facets of counselor performance. Ironically, however, some experts have suggested that there are too many measures of counselor performance. Counselor performance assessment will be enhanced when assessments are clearly and cogently described and are used within an effective conceptual scheme. Additionally, assessments used need to fulfill accepted psychometric quality criteria. (JB1)

Identifiers—ERIC Digests

To achieve accountability, evaluation is needed concerning: the nature, structure, organization, and implementation of school district/building guidance programs; the school counselors and other personnel who are implementing the programs; and the impact the programs are having on students, the schools where they learn, and the communities in which they live. In order to fully evaluate comprehensive school guidance programs, three forms of evaluation are required. First, the program must be reviewed using program standards, evidence, and documentation to establish that there is a written guidance program in a school district and/or building and that the written program is the implemented program. Second, guidance program personnel need job descriptions derived directly from the program so that evaluation forms can be developed and used for formative and summative personnel evaluation. Third, results evaluation that focuses on the impact of the guidance and counseling activities in the guidance curriculum, individual planning, responsive services, and system support components of a comprehensive guidance program is mandatory. Identifiers—ERIC Digests

The nature of classroom assessment is changing. Teachers are being urged to rely less on traditional tests and more on innovative measurement methods, such as performance tests and portfolio assessments. This digest describes a strategy whereby student services personnel can play a leadership role in familiarizing classroom teachers and school administrators with the payoffs and perils of emerging classroom assessment methods. School counselors can play a key role in promoting better use of new assessment procedures if they acquire a reasonable degree of knowledge about such measurement procedures, then dispense that knowledge to the teachers with whom they work. More knowledgeable use of new classroom assessment strategies will lead to more accurate assessment-based inferences about students and more defensible instructional decisions by teachers. (JB1)

Not since the development of the objective paper and pencil test early in the century has an assessment method hit the American educational scene with such force as has performance assessment methodology in the 1990s. Performance assessment relies on teacher observation and professional judgment to draw inferences about student achievement. Educators have begun to embrace the reality that some targets, like complex reasoning, skill demonstration and product development require the use of subjective, judgmental means of assessment. This digest provides a summary of attributes of sound assessments and the rules of evidence for using them well. Various ways to take advantage of this information are presented. The following aspects are detailed: The Basic Methodology; Sound Performance Criteria; Sound Performance Exercises; Effective Scoring and Recording; and Performance Assessment in the Guidance Context. Identifiers—ERIC Digests

A portfolio is a meaningful collection of student work that tells the story of student achievement or growth. There are two basic reasons for doing portfolios—assessment or instruction. Benefits for using portfolios in instruction include the development of students self-reflection, critical thinking, responsibility for learning, and content area skills and knowledge. Assessment use of portfolios, a collection of multiple samples of student work over time, enable one to: (1) get a broader, more in-depth look at what students know and can do; (2) base assessment on more "authentic" work; (3) have a supplement or alternative to report cards and standardized tests; and (4) have a better way to communicate about student progress to parents. Three common assessment uses of portfolios are: (1) certification of competence; (2) tracking growth over time; and (3) accountability. Strong portfolio systems are characterized by a clear vision of the student skills to be addressed, student involvement in selecting what goes into the portfolio, use of criteria to define quality performance and to provide a basis for communication, and self-reflection through which students share what they think and feel about their work, their learning environment, and themselves. American schools are being challenged to provide opportunities for students to achieve at much higher levels. Assessment is viewed as one of the essential elements in assisting schools to address the standards now deemed to be important in a manner that will help all students to achieve them. The major challenge for assessment is to implement these additional assessments in a coordinated manner so that the amount of assessment is supportive of the changes needed, and not overly burdensome to teachers or students. Models for coordination assessment at the state, district and classroom levels appear most promising. This digest discusses why school reform is occurring, how assessment reform fits school reform, and types of assessment, school improvement strategies, and useful assessment designed. Descriptors—*Ability, Ability Identification, *Aptitude Tests, Elementary Secondary Education, Evaluation, *Evaluation Methods, Evaluation Problems, Psychological Evaluation, *Self Evaluation (Individuals), Student Evaluation, Testing

Identifiers—ERIC Digests

This digest recommends assessing all of a person's abilities, not just some. It also discusses self-report in the context of ability assessment. Current use of self assessment methodology taps more ability areas than existing ability or aptitude tests cover. Alternative testing approaches have been called for which enhance self-discovery and awareness. Some recent self-report studies show at least comparable validity with more traditional approaches. Some researchers are advocating the self-assessment methodology which can substantially cut loss of instructional time and cost, evaluate hard-to-assess constructs, and deliver information most people feel is useful for self-knowledge and career planning. Philosophically, the process of self-evaluation fits the belief that individuals are in the best position to assess since they have access to a large data base on their own successes and failures in their abilities. Most misgivings about the methodology seem to center around beliefs that individuals have a tendency to be lenient and are not objective enough in their self-analysis to provide accurate self-reports. Descriptors—Affective Measures, Aptitude Tests, Career Choice, Elementary Secondary Education, *Evaluation Methods, *Interest Inventories, *Interest Research, Interests, Personality Assessment, *Personality Measures, Psychological Evaluation, Testing

Identifiers—ERIC Digests

The assessment of interests through the use of interest inventories is big business in the field of testing today. The assessment of interests originally developed as an outgrowth of efforts in education and in industry to supplement special and general abilities information about individuals. Interest inventories used today differ from early checklists and ratings in that they use statistical methods to summarize responses to pools of items representing various activities and occupations. Definition of interests typically reflect five components: personality, motivation or drive, expression of self-concept or identification, heritability, and environmental influences. The purpose of interest assessment, current interest assessment inventories, and computers and interest assessment are discussed. The most powerful uses of interest assessment continue to be in the context of data such as values, reinforcers, abilities, personality, and biographical information, that capture the life experiences of an individual. As both education and industry have discovered, the integration of a variety of information, including the assessment of interests, can contribute effectively to improving individual and institutional decision-making. Identifiers—ERIC Digests

Self-concept is one of the most popular ideas in psychological literature. Unfortunately, it is also an illusive and often poorly defined construct. Before attempting to assess self-concept, counseling practitioners or researchers must first clarify for themselves what they mean by "self-concept" and then choose a method or instrument consistent with that definition. Perhaps one of the most important distinctions that differentiates various conceptualizations is whether self-concept is viewed as an overarching, global characteristic of the person, or as a set of self-evaluations specific to different domains of behavior. Self-concept is inherently phenomenological, that is, it refers to the person's own view of self. Accordingly self-concept is almost always assessed through self-report. Commonly used self-report methods, rating scales, checklists, Q-sorts, and free response are described. The following considerations must be kept in mind when assessing self-concept: the person must have a sufficient level of self-awareness; measures require substantial verbal competence, and even children are aware that some responses are more socially acceptable than others. Counselors should use scores very cautiously when working with individual clients. (JBJ)

Identifiers—ERIC Digests

Temperament refers to basic dimensions of personality that are grounded in biology and explain individual differences in the developmental process rather than universal dynamics. Temperament is currently an active area of research with documented applicability to a variety of developmental and mental health outcomes such as conscience formation, peer interaction, behavior problems, school achievement, psychopathology, and vulnerability, as well as resistance to stress. Unresolved conceptual issues and problems with measurement limit the applicability of this knowledge by practitioners. This digest examines the following questions: (1) What is the structure of temperament? (2) What issues remain in assessing temperament? (3) How are temperament and personality related? and (4) How do temperament dimensions exert their influence? The documented association of temperament traits with diverse outcomes linked with normal development and psychopathology have left no doubt about the value of this construct. Future refinements in definitions and measurement, as well as a better understanding of how temperament exerts its influence will promote greater application of these concepts to designing programs for prevention and intervention in mental health and educational settings. Identifiers—ERIC Digests

With the enactment of the "Education for All Handicapped Children Act" of 1975, all children are entitled to appropriate free education and related services regardless of disabilities. As a result, major strides have been made toward providing services for developmentally delayed children. To gain access to these services, children who are suspected of having developmental or physical disabilities have to be referred to trained and qualified individuals or multi-disciplinary teams for assessment. Young children, however, are difficult to assess accurately. Current trends in preschool assessment include a move away from a "single assessor" model to an environmental model which is designed for the individual child. The following characteristics of preschool assessment are described: (1) criterion referenced and process oriented; (2) informal, indirect, and naturalistic evaluations; and (3) handicap accommodating

assessments. Because single discipline evaluations provide a "snap shot" from a limited perspective, assessments involving more than one discipline are recommended. The role of mental health practitioners is discussed. (JB1)

Identifiers—ERIC Digests

The "Education for All Handicapped Children Act" (1975) requires that all children with disabilities receive a free and appropriate public education. Determining who has a disability and who is eligible for special services, however, is not an exact science. While practices differ greatly both across and within states, screening is an important part of the assessment process. School-based screening as well as problems and solutions for school screening, are discussed. Screening procedures are an important part of the assessment process to identify children and youth who have disabilities. Such procedures must be used with care, however, as they provide only a preliminary sign that a child has a disability. Additional testing is required to affirm or disprove the presence of a handicapping condition. If a disability is identified during follow-up assessment, the focus shifts to providing the student with appropriate education. (JB1)

Identifiers—ERIC Digests, Person Environment Fit

This digest focuses on the career counseling process, specifically on the contribution of assessment procedures to career exploration and planning. Because these career development tasks are experienced by everyone, this digest addresses assessment for the many rather than intensive, problem focused career counseling. The following basic considerations are examined: (1) Trait and Factor Theory: The Foundation for Assessment; (2) Self-Concept: The Basis for Career Choice; (3) Assessment: A Primary Means for Self/Career Exploration; (4) Transformation of Assessment Data: Requirement of Helpful Assessment; (5) Data-Information Transformation: Bridge to Reality; (6) Informed Self-Estimates: Key to Ability Assessment; (7) Comprehensive, Articulated Assessment: A Goal; and (8) Development of Possibilities into Realities: A Requirement. Trait and factor theory has been revitalized by career development theory. Recognition of the importance of the self-concept in career

exploration provides the basis for a closer relationship between assessment and counseling. (JB1)

Creating a New Vision of School Psychology: Emerging Models of Psychological Practice in Schools.

American Psychological Association, Washington, D.C.; ERIC Clearinghouse on Counseling and Student Services, Greensboro, NC

Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC

Pub Date—Aug 95

Note—97p.; "A Special Psychology Digest Series," prepared collaboratively for the Annual Institute for Administrators of School Psychological Services (2nd, New York, NY, August 10, 1995). The eight individual digests have been separately analyzed. see CG 026 994 - 027 001.

Pub Type—Collected Works - General (020) - Information Analyses - ERIC IAP's (071)

EDRS Price—MF01/PC04 Plus Postage.

Descriptors—Annotated Bibliographies, Cultural Pluralism, *Educational Psychology, Elementary Secondary Education, Higher Education, Integrated Services, *Models, *Psychological Services, School Health Services, *School Psychologists

The first, and most prominent, section of this publication consists of eight digest papers which offer several perspectives on new models for psychological practice in schools. The topics addressed in the digest series reflect key issues confronting psychologists as they struggle to increase their responsiveness to educational challenges in America's schools. Digests are as follows: "Creating a New Vision of School Psychology: Emerging Models of Psychological Practice in Schools" (Talley and Short); "Psychological Services in the Schools" (Kamphaus); "Working with Diverse Learners and School Staff in a Multicultural Society" (Sanchez, Li, and Nuttall); "Health Services in the Schools: Building Interdisciplinary Partnerships" (Paavola, Cobb, Illback, Joseph, and Torruella); "Redefining Doctoral School Psychology" (Short and Talley); "Establishing School-Based Internships in Professional Psychology" (Nelson); "Psychological Practice in Schools: System Change in the Heartland" (Reschly); and "Education and Health Care Advocacy: Perspectives on Goals 2000, IASA, IDEA and Healthy People 2000" (Talley and Short). The second section presents results of an extensive search of the ERIC database on each of the major topical areas covered by the digests, along with instructions for obtaining the full-text articles and documents. The third and final section is the "ERIC/CASS Resource Pack," which is intended to extend the reader's knowledge of the Educational Resources Information Center (ERIC), both as a consumer/user of ERIC as well as a contributor of papers and resources. Assessing Career Certainty and Choice Status. ERIC Digest.

ERIC Clearinghouse on Counseling and Student Services, Greensboro, NC

Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC

Report No.—EDO-CG-95-19

Pub Date—30 Jan 95

Note—4p

Pub Type—Information Analyses - ERIC IAP's (071)—ERIC Digests (073)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Career Choice, *Career Counseling, Career Exploration, Career Guidance, Career Planning, Careers, Decision Making, *Evaluation Methods, Self Evaluation (Individuals), Test Interpretation

Identifiers—ERIC Digests

Career certainty refers to the degree to which individuals feel confident, or decided, about their occupational plans. Since Parsons first classified people into career-decided and career-undecided groups, counseling researchers and practitioners

have worked to formally assess career choice status. These efforts have yielded two generations of instruments useful for gauging clients' levels of and reasons for indecision as well as degrees of certainty about their career choices. First generation measures of career choice status yield total indecision scores. They have generated research on identifying multiple subtypes of undecided people and on developing differential interventions for each type. Second generation measures differ significantly from earlier instruments in that they were developed explicitly to assess multiple dimensions of career indecision. Counselors can use these scales to identify specific barriers that prevent a client from reaching a career-decided state. Surveying clients in terms of their choice status continues to help researchers understand the complexity of career indecision and choice status. It also aids practitioners in planning appropriate career counseling interventions. (JB1)

Descriptors—*Adolescents, Career Choice, Career Counseling, *Career Exploration, Career Guidance, Career Planning, Decision Making, Developmental Stages, Elementary Secondary Education, *Evaluation Methods, School Guidance, *Sex Differences, Test Interpretation

Identifiers—ERIC Digests

Career exploration is a developmental stage identified by career development theorists and occurs typically during adolescence when boys and girls try out various work roles in part time work, volunteer work, or in school/community activities. This digest focuses on gender differences in the role of assessment in the exploration process. Girls have been found typically to explore careers from a narrower set of career options than do boys. This occurs based on occupational sex role socialization. Career education programs and classes in high school have attempted to reduce stereotyping in a variety of ways. The most frequently used measures to aid in career exploration during adolescence are career interest inventories. The National Institute of Education Guidelines for reducing sex bias in interest measurement were followed to a large extent by both interest measurement test developers and publishers in the decade following their publication. However, the continuing evidence that gender differences exist in career interest measurement strongly suggests that such assessment is accompanied with counseling. (JB1)

Descriptors—Career Counseling, Career Guidance, Careers, *Employment Potential, Evaluation, *Evaluation Methods, *Job Skills, Personnel Evaluation, Self Evaluation (Individuals), Test Interpretation, *Vocational Evaluation

Identifiers—ERIC Digests

The term "employability skills" refers to those skills required to acquire and retain a job. In the past, employability skills were considered prima-

rily of a vocational or job-specific nature; they were not thought to include the academic skills most commonly taught in schools. Current thinking, however, has broadened the definition to include not only many foundational academic skills, but also a variety of attitudes and habits. Recent usage of the term has described the preparation of foundational skills upon which a person must build job-specific skills. These skills include: communication, personal and interpersonal relationships, problem solving, and management of organizational processes. Ever growing numbers of employers are assessing these skills, primarily in reading and mathematics, prior to hiring. However, educators still show greater interest in employability skills assessment than do employers. Several efforts at employability assessment are discussed. When selecting an approach for assessing employability skills, the following criteria must be kept in mind: (1) the assessment must clearly mirror the nature of the skill required; (2) the skill assessed should be teachable; and (3) each assessment must be evaluated in the context of its purpose. Descriptors—Accountability, Career Choice, *Career Counseling, *Career Development, Career Exploration, Career Guidance, Career Planning, Careers, Educational Change, Elementary Secondary Education, Evaluation, Evaluation Methods, *Portfolio Assessment, Portfolios (Background Materials), Self Evaluation (Individuals)

Identifiers—ERIC Digests

Recent efforts to improve education have led to a new look at assessment. As pedagogy has changed to focus on learner-centered education, the need to make assessment an integral, on-going part of instruction has become obvious. Concurrently, federal initiatives to promote educational reform have required the provision of career development opportunities and have demanded accountability in this area. The portfolio concept is one way to meet this challenge by giving students ownership of their work and standards by which they can be measured. States and local districts must define the career development standards they wish to implement, allow students the opportunity to take responsibility for their career development, offer the necessary career guidance and counseling to support student learning, and assess both the program and the individual to assure that the expected outcomes are being achieved. The portfolio provides the format for the process and documentation of career development while giving individuals and programs standards for assessment. (JB1)

Descriptors—Codes of Ethics, Counselor Evaluation, *Ethics, *Evaluation, Evaluation Meth-

ods, Evaluation Problems, Peer Evaluation, *Professional Associations, *Standards

Identifiers—ERIC Digests

Promoting ethical practices in assessment is considered to be a very important goal of the organizations involved in assessment. Codes are intended to increase the awareness of ethical practice among their memberships and to promote ethical uses of assessment in various contexts such as teaching, counseling, evaluation, and research. The level of enforcement that each organization takes is directly tied to the character of membership in the organization, whether it is voluntary or tied to a credential or designation. The more stringent the requirements are for membership in an organization, the easier it is for that organization to establish a more formal means of discipline and enforcement. Educating others to understand and to engage in ethical practices is a critical goal. Illustrations of good and bad practice within realistic assessment contexts and discussions of ethical dilemmas are excellent ways of promoting ethically responsible practice in assessment. (JB1)

Descriptors—Bias, *Cultural Awareness, Cultural Pluralism, *Culture Fair Tests, Ethnic Bias, Evaluation, Evaluation Methods, *Evaluation Problems, Evaluation Research, Intercultural Communication, Personality Assessment, Psychological Evaluation, Racial Bias, Sex Bias, *Test Bias, *Test Construction, Test Interpretation, Testing

Identifiers—ERIC Digests

More valid assessments for multicultural populations would help counseling professionals better serve their clients and improve the lives of many people whose backgrounds and experiences may differ from those of White clients. Four common misuses of multicultural contexts are: (1) assuming that labeling something solves the problem; (2) using measures normed on White populations to assess non-White people; (3) ignoring the cultural assumptions that go into the creation of assessment devices; and (4) not considering the implications of the use of measures with clients from various racial and cultural groups. Some suggestions for improving multicultural assessments are: (1) concentrate on empirical and operational definitions of groups, not just labels; (2) identify measures specifically designed for multicultural groups; (3) encourage the consideration of cultural factors in the earliest conceptual stages of instrument development; and (4) increase opportunities for an exchange of information between those with quantitative training in instrument development and those with an interest and expertise in multicultural issues. Research on the validity and reliability of measures for specific multicultural groups is needed. (JB1)

Fairness in Performance Assessment. ERIC Digest.

ERIC Clearinghouse on Counseling and Student Services, Greensboro, NC.

Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.

Report No.—EDO-CG-95-25

Pub Date—95

Note—4p.

Pub Type—Information Analyses - ERIC IAP's (071) — ERIC Digests (073)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Evaluation Methods, *Evaluation Problems, Evaluation Research, *Performance Factors, *Performance Tests, *Student Evalua-

tion, *Test Bias, Test Construction, Test Interpretation, Testing

Identifiers—ERIC Digests

Performance assessment is a type of educational assessment in which judgments are made about student knowledge and skills based on observation of student behavior or inspection of student products. In dealing with the issue of fairness in performance assessment, educators are confronted with some dilemmas. Assuring equality in performance assessment through standardization enables comparisons of student performance and simplifies administration processes; however, it loses task meaningfulness and creates difficulty in avoiding bias. Assuring equity effectively reduces bias and enables rich, meaningful assessment, but it introduces difficulty in administration and in comparing student performance, causes a potential side effect of poorly equipping students for the real world, and can be unfair to students with low awareness of their own abilities and quality of performance. Although standardized assessment is encouraged because it is a requirement for reliability, which is a necessary condition for validity, the hermeneutic approach to score interpretation supports contextualized and non-standardized assessment, and argues that validity can be achieved without reliability. Currently there is little research devoted to examining and promoting fairness in performance assessment. (JB1)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Computer Assisted Testing, Computer Uses in Education, *Counseling, Counselors, *Evaluation Methods, Evaluation Problems, Evaluation Research, Test Construction, Test Interpretation, Testing

Identifiers—ERIC Digests

Computer-assisted testing (CAT) in counseling and therapy is becoming increasingly common due to dramatic improvements in cost-effectiveness and increased counselor familiarity with computer applications. The assumption underlying the use of CAT is that the effectiveness of counseling is improved by allocating repetitive computational and instructional tasks to the computer, thus allowing counselors to concentrate more fully on interpersonal tasks. Options for using CAT in counseling and therapy include: (1) test administration; (2) test scoring; (3) test score profile generation; (4) narrative interpretive report generation for both client and practitioner; and (5) videodisc-based generalized test interpretation provided to the client immediately following test administration. Benefits of CAT include enhanced test administration, scoring, interpretation, and integration. A potential limitation is the need to establish equivalency for each instrument. Other limitations include scoring errors, test validity, and ethical concerns about counselor misuse. (JB1)

Descriptors—*Accessibility (for Disabled), Assistive Devices (for Disabled), Communication Aids (for Disabled), *Disabilities, Elementary Secondary Education, Evaluation Methods, *Evaluation Problems, Evaluation Research, Special Education, Test Construction, *Test Interpretation, *Test Selection
Identifiers—Americans with Disabilities Act 1990, ERIC Digests, *Testing Accommodations (Disabilities)

The assessment of students with disabilities has taken on considerable importance since the passing of the "Americans with Disabilities Act (ADA)" of 1990. ADA requires that assessment of individuals with disabilities be performed with any reasonable accommodations being made. The considerations involved in assessing students with disabilities are presented under three related activities. (1) test selection—Is the instrument suitable for students with disabilities? Were individuals with like disabilities included in the normative and validation samples? (2) test administration—Can the student be appropriately and meaningfully assessed using the conditions under which the instrument was standardized? and, (3) test interpretation. Some information on the extent and severity of a student's disability should be acquired before an assessment either is selected or administered. It may also be appropriate to choose and administer tests that assess compensatory skills. (JB1)

Identifiers—ERIC Digests

School psychologists can play a unique role in schools because of their assessment expertise. Traditionally, they have been most involved in individual psychoeducational assessment for classification and labeling purposes, but the limitations of this form of assessment for building intervention strategies has led many school psychologists to broaden their role. Currently, there are at least three major purposes of school psychological assessment: (1) informing entitlement/classification decisions; (2) planning interventions, and (3) evaluating outcomes. Techniques linking assessment to interventions are being demonstrated by school psychologists as they consult with teachers to enhance the classroom performance of students. Further, school reform initiatives have required more program evaluation at the building and system level and school psychologists are engaged in these activities as well. Assessment is an important task in the schools, and school psychologists can increase their impact on school effectiveness by contributing their expertise in this domain at many levels. (JB1)

Identifiers—ERIC Digests

The role of school psychologists and counselors in assessment is well established. With the current emphasis on collaboration in schools and the use of a pupil services model to deliver services, it is important to examine ways in which school psychologists and counselors can work together for assessment purposes. School psychologists' involvement in assessment begins with a student who has been referred by a parent or teacher for academic or behavioral difficulties. As part of the assessment process, an individual test of intelligence and an achievement test are likely to be administered. Counselors use assessment information to clarify concerns of clients, to plan programs or interventions and evaluate their effectiveness, to provide career planning information, and to assist clients in understanding themselves. School psychologist and counselor assessment processes have differing emphases that are complimentary to each other. The multidisciplinary approach to assessment required by recent legislation is especially suited for these two groups of professionals to work together in a collaborative manner. In this way a more complete picture of students needs can be developed and service delivery can be enhanced. (JB1)

Identifiers—Buros Institute of Mental Measurements, ERIC Digests

Assessment use is a cornerstone of successful counseling. Information from assessments is used for making several important therapeutic decisions, requiring the counselor to have information about assessment devices and approaches. Tests are being published at a remarkable rate. It is a challenge for counselors to stay well informed. Products and programs from the Buros Institute of Mental Measurements serve test information needs of counselors and therapists. The "Mental Measurement Yearbook" and "Test in Print" series contain information about availability, quality, and utility of assessment devices. Counselors can identify tests potentially appropriate for their clinical practice and stay up-to-date on assessment of psychological constructs and educational outcomes through use of these volumes. In addition, the Institute sponsors topical symposia and volumes targeted at specific audiences; these can provide cutting edge assessment information to counselors and therapists. The counseling process is multifaceted and complex. Tests and other specific assessment approaches are useful assisting counselors in making appropriate clinical decisions; the Buros Institute's mission is to support well-informed assessment decisions. With tens of thousands of information providers and millions of users, Internet is an enormous and growing resource for guidance counselors and other personnel service professionals. In this digest Internet resources of particular interest to the guidance community are identified. Listservs are electronically facilitated (through the use of e-mail) discussion forums of participants who share a common interest. Some listservs of interest to guidance personnel are listed. Gopher are menu-driven systems providing access to a wide range of information. Via Internet and Gopher software, you literally connect to computers across the world to obtain information. Some Gopher sites of interest to the guidance community are listed. The entire contents of "Resources in Education" and "Current Index to Journals in Education" are available through the ERIC Database available on several Internet sites. The ERIC Digest File, consisting of 1,500-word reports that synthesize research and ideas about emerging issues in education, is also accessible through the Internet. AskERIC e-mail service is a personalized Internet based service for educators and professionals allied with education support services. (JB1)

Much information is available to help users locate and evaluate career assessment instruments. This digest can help improve their evaluations. For the purpose of both locating and evaluating career assessment instruments there are three primary sources. Best known among these are the Buros Institute's publication "Tests in Print" and its companion set of reviews in the "Mental Measurements Yearbooks." A second source is "Tests and Test Critiques." Both include a listing and brief description of most tests commercially available in English speaking countries as well as periodically published volumes of test reviews. The third source, published by the National Career Development Association, is "A Counselor's Guide to Career Assessment Instruments." This book contains reviews of the most prominent career assessment instruments as well as brief descriptions of most others commercially available. It also includes chapters on selecting,

evaluation, using, and interpreting career relevant tests. There are a number of other sources that focus on specialized aspects of career assessment. Instrument evaluation sources and standards are discussed (JBJ)

Identifiers—ERIC Digests

The research literature provides important guidance to counselors working to keep abreast of the latest thinking regarding best practices and recently developed counseling tools. The purpose of this digest is to highlight a few errors that seem to recur within the literature, and to provide some helpful references that further explore these problems. Insufficient attention to score reliability occurs in between 40 to 50 percent of the published research and is serious because effect sizes and power against Type II error are both attenuated by measurement error. Over-reliance on tests of statistical significance is a major second issue that occurs when researchers incorrectly assume that the p values calculated in statistical significance tests evaluate the probability that results will occur. The null hypothesis and statistical significance is discussed. Finally, this digest examines stepwise methods and asserts that they should not be used. Three problems of stepwise analyses are presented. (JBJ)

Descriptors—Case Studies, *Counseling Techniques, Counseling Theories, Counselor Training, Elementary Secondary Education, *Family Counseling, Family Problems, Intervention, Parent Counseling, Psychologists, School Counseling, *School Counselors, School Psychologists, Systems Approach, Therapy

While referrals and collaboration outside the confines of the school are often necessary, the literature offers school counselors no guidance in the provision of family counseling services. This book emphasizes school counselors, themselves, working with families in the schools. A viable and dynamic theory of school counseling which is unique in its emphasis on doing family counseling in schools rather than relying on referral to outside agencies is presented. This monograph pays particular attention to assisting helping specialists to become more knowledgeable about, and effective

in, using family counseling techniques and interventions. Chapters are: (1) A Systems Perspective in the Schools; (2) Systems Theory and School Counseling; (3) Training in Family Counseling for School Counselors; (4) Additional Family Counseling Approaches in the Schools; (5) Family Counseling Techniques in the Schools; (6) Family Assessment and the School Environment; (7) Special Clinical Issues in the Schools: Abuse, Anxiety, Substance Abuse, Attention Deficit/Hyperactivity Disorder, and Antisocial Behavior; (8) Issues of Divorce and Marital Conflict; (9) A Family Approach to School and Community Crisis Management; (10) Getting Started with Family Counseling; and (11) Case Contributions from School Counseling Professionals. A suggested reading list of 46 books and 14 journals on family counseling for school counselors is an appendix. Contains 249 references. (JBJ)

Identifiers—*Empowerment

Achieving manhood has historically been a complex and challenging task for the Black male in America. Therefore Black manhood must be carefully fostered from an early age by major socializing agents and institutions. This book provides school counselors and related professionals with important information about the development of young Black males. It is designed as an action manual for all those concerned about promoting the development of the next generation of African American men. The concepts and programs presented are designed to guide initiatives for promoting the academic, career, and personal-social empowerment of young Black males. Chapters are: (1) The Black Male in Contemporary Society: Social and Educational Challenges; (2) The Psychosocial Development of Black Males: Issues and Impediments; (3) African/African-American Culture: Its Role in the Development of Black Male Youth; (4) "The Young Lions": An Educational Empowerment Program from Black Males in Grades 3-6; (5) "Black Manhood Training": An Empowerment Program for Adolescent Black Males; (6) Tapping the Power of Respected Elders: Ensuring Male Role Modeling for Black Male Youth; (7) Educational Advocacy for Black Male Students; (8) "S.O.N.S.": Empowerment Strategies for African American Parents; (9) "White Men Can't Jump." But Can They Be Helpful? (10) "The Malcolm X Principle: Self-Help for Young Black Males; and (11) A Call to Action: A Comprehensive Approach to Empowering Young Black Males. (JBJ)

Descriptors—Elementary Secondary Education, *Journal Writing, Reader Response, *Reading Instruction, *Reading Writing Relationship, Writing Assignments, *Writing Instruction Identifiers—ERIC Digests, *Reading Logs, *Response to Literature, Writing Thinking Relationship

Although reading and writing exist only in relation to each other, writing plays little or no role in the usual instructional approaches to reading. Mostly, reading is taught as a sequence of discrete skills, which is ineffective since it accommodates the analytic reading style to the exclusion of global, kinesthetic, and auditory styles. Reading taught together with writing can accommodate all reading styles. By writing while reading, students could learn to organize their thoughts, and after habitually writing in response to reading, they could learn to clarify and refine their thoughts. Through activities centered around a reading log, the students could elucidate several aspects of their thought processes: using the reading log as a "response journal," they could discover ideas, and using it as a "text-to-meaning journal," they could rethink ideas, and using it as a "process journal," they could regulate their reading habits. Before students make entries in their reading logs, the teacher must ensure that they know how to use the log. Before every assignment, the teacher could discuss the type of reading and the purpose of reading, as well as the procedures for the particular assignment. All the activities arranged before, during, and after a reading and all the specific writing assignments made along with the reading are based upon the premise that students assimilate their perceptions of a text most fully by writing in response to reading. Identifiers—Deconstruction, ERIC Digests, Historical Background, *Literary Theory, Postmodernism, *Poststructuralism, Response to Literature, Structuralism, Theory Development

This digest provides a historical review of some current literary theories and practices which developed from contemporary philosophy. Structuralism, associated with Ferdinand de Saussure and Claude Lévi-Strauss, with a seemingly scientific view of language and culture posited a systematic "center" that organized and sustained an entire structure. The historic attack against this central premise of structuralism is usually traced to a paper entitled "Structure, Sign and Play in the Discourse of the Human Sciences," delivered by Jacques Derrida in 1966. Derrida criticized the Western "logocentric" notion of an ever-active transcendent center or ground. Poststructuralism is generally considered to include three main features: the primacy of theory; the decentering of the subject; and the fundamental importance of the reader. Following is a discussion on (1) How has poststructuralism as a theory affected English classroom practices in the teaching of literature? and (2) How has poststructuralism affected the teaching of writing? Contains 15 references. (NKA)

Identifiers—ERIC Digests, *Oral Communication across the Curriculum Oral Learning, *Speaking across the Curriculum

Noting that speech is not simply basic communication, this digest discusses ways in which teachers can help children develop oral language proficiency. The digest holds that speech involves thinking, knowledge, and skills, and that it requires practice and training. After setting out three criteria for oral language competence—fluency, clarity, and sensitivity—the digest suggests that oral language development has largely been ignored in the classroom. It points out that oral language provides a foundation for the development of other language skills and that the literacy process actually begins with speaking. The digest sees the teacher's role as

that of a facilitator of the learning process and offers suggestions for instructional strategies. (Contains 10 references.) (NKA)

Identifiers—Gopher, *Netscape, Telnets

Presenting a wide array of Internet addresses and sample lessons, this book shows how teachers can integrate the Internet into their K-12 curriculum to actively involve students. The ideas and lessons in the book help students to communicate with people in faraway places; gather information from around the globe; develop sophisticated research skills; increase knowledge across the curriculum; strengthen creative abilities; develop fluency in keyboarding, reading, and writing; and engage in both cooperative and independent learning. Topics covered in the book include e-mail, Netscape, megapages, Gopher, FTP, Telnets, and HTML. Chapters in the book are: (1) What Is This Thing Called "the Internet?"; (2) E-pals and Key pals; (3) Netscaping; (4) Surfin' the Megapage; (5) Just for the Little Kids; (6) Go for Fables, i.e. Gopher Fables; (7) FTP=Fairy Tales Please; (8) A Book an Hour; (9) Telnets, Anyone?; (10) Searching; (11) The ABCs; (12) A Whale of a Time; (13) The News; (14) Get a Job!; (15) Look Who's Talking; (16) Virtually Together in D.C.; (17) Games People Play; and (18) HTML and YOU. A 30-item select bibliography and information on 6 commercial on-line services in the United States and Canada are attached. (RS)

Descriptors—Creative Writing, Dreams, Elementary Secondary Education, Imagery, Imagination, Individual Development, Instructional Innovation, Language Arts, Literature Appreciation, Mythology, Student Needs, Teaching Methods

Identifiers—Archetypes, ERIC Digests

This digest considers approaches to language arts teaching that are based on mythic or archetypal ways of experiencing and knowing. The Digest argues that such approaches address students' inner lives more directly than do the usual instructional methods such as whole language or student-centered instruction, and thus can help to promote feelings-sharing, intuition, and imagery production in the classroom. The Digest is divided into sections on Myths, Imagery, and Symbols; Myth and Archetype as Instructional Tools; and Dream Sharing in the Classroom. The digest concludes that both teachers and students can profit from learning to access their inner resources, especially their inner intuitive and image-making abilities and emotional states (NKA)

Descriptors—Adolescents, Instructional Innovation, Learning Processes, Lifelong Learning, Low Achievement, Reading Materials, Reading Motivation, Secondary Education, Student Motivation, Teacher Role

Identifiers—ERIC Digests, Reading Uses

This Digest focuses on motivating the low performing adolescent in a remedial reading or subject area classroom—the idea is that students who are disengaged from their own learning processes are not likely to perform well in school. The Digest points out that such adolescents are often caught in a cycle of failure and that secondary teachers must help the student break the cycle of failure. It offers several practical and effective methods for motivation from the research literature that can be used by the classroom teacher. The Digest also states that a wide variety of teaching materials can help provide for differences in students' ability to learn, and that teachers must continue to create contexts which promote success. It concludes that there is much truth in the statement "The only way to improve reading skills is to read." (Contains eight references.) (NKA)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Expressive Language, Free Writing, Higher Education, Journal Writing, Secondary Education, Teacher Role, Writing Assignments, Writing Instruction, Writing Processes

Identifiers—ERIC Digests, Expressive Writing, Writing Development

This digest discusses expressive writing and the expressive mode, which is seen as a recurring stage in a writer's process of writing. The digest suggests that by structuring expressive writing activities and correlating them with particular stages of the writing process, a teacher can draw the natural linguistic activity out of a student. The digest advocates using journal writing as a stimulus for various stages in the creative process and presents several class exercises and assignments in journal writing which can help develop the students' expressive writing abilities. The digest concludes by offering three general principles for teachers to keep in mind while they are guiding students through the recursive stages of the writing process with the use of expressive writing activities. Contains 10 references (NKA)

Descriptors—Educational Assessment, Educational Change, Educational Environment, Elementary Secondary Education, Institutional Characteristics, Institutional Mission, Leadership, Organizational Change, Organizational Climate, Systems Approach

Identifiers—School Culture

This book is designed to help educators recognize and, if necessary, change a school's culture. It guides principals, other administrators, and teachers in the process of shaping the culture of their schools. For those who have already begun the process, the book provides insights, examples, and reassurance that their efforts are headed in the right direction. Chapter 1 provides a framework to help leaders understand the terms "culture" and "climate." Chapter 2 establishes the importance of culture by reviewing some of the research evidence, which shows that school culture influences student and teacher motivation, school improvement, leadership effectiveness, and academic achievement. The third chapter examines three levels of organizational culture outlined by Edgar H. Schein (1984)—tangible artifacts, values and beliefs, and underlying assumptions. Chapter 4 describes several instruments and qualitative procedures that a leader can use to identify and measure school culture at each of Schein's three levels. The next three chapters offer three perspectives on the process of transforming a school's culture—the systems approach, vision building, and the leader's role as learner, motivator, and modeler. Practical suggestions for culture-building are also given. (Contains 72 references.) (LMI)

In contrast with subject-bound education, integrative education promotes the construction of broad "mental programs" that require students to use skills and information in new, realistic contexts. Early childhood education has long been a model of integrative education, emphasizing the whole child and offering a wide range of experiences that enable a child to develop the skills necessary for discovery and learning. This brief reviews five publications that provide suggestions for helping educators construct and implement an effective curriculum. They are as follows: (1) "Planning Integrated Curriculum: The Call to Adventure" (Susan M. Drake); (2) "ITI: The Model. Integrated Thematic Instruction" (Susan Kovalik and Karen Olsen); (3) "Performance Assessments in Reading and Language Arts" (John T. Guthrie, Peggy Van Meter, and Ann Mitchell); (4) "Crossing Boundaries: Explorations in Integrative Curriculum" (Jane Braunger and Sylvia Hart-Landsberg); and (5) "Education 2000 Integrated Curriculum" (Betty Jean Eklund Shoemaker) (LMI)

Descriptors—Alternate Day Schedules, Educational Change, Elementary Secondary Education, *Flexible Scheduling, *School Schedules, Semester System, *Time Blocks, *Time Management, Trimester System

This digest examines problems inherent in the traditional school scheduling pattern. It offers block scheduling as an option and describes variations in block schedules. It then looks at the benefits and challenges of block scheduling and concludes with a few suggestions for making the transition. Proponents argue that block scheduling allows for a more flexible and productive classroom environment, creates opportunities for instructional innovation, reduces suspension and dropout rates, and improves student-teacher relationships. The biggest challenges are building support for the change and finding planning time. To be successful, the change must address a need, fit the teachers' situation, be focused, and include concrete strategies. (LMI)

Until very recently, ethical issues were given little attention in administrator-preparation programs. This digest outlines the ethical responsibilities of school leaders and the dilemmas that they face. It offers the following suggestions for resolving ethical dilemmas: (1) Leaders should have and be willing to act on a definite sense of ethical standards; (2) leaders should examine dilemmas from different perspectives; (3) leaders can reframe ethical issues; and (4) leaders should have the habit of conscious reflection. Educators can create ethical institutions by developing an ethics committee or a shared school covenant. The virtues that leaders must practice include honesty, courage, and stewardship. The leader's responsibility is complex and multi-dimensional, rooted less in technical expertise than in simple human integrity. (Contains 10 references.) (LMI)

Since the 1980s, shared decision making (SDM) has become a significant part of school-reform efforts. Advocates say that SDM will improve student learning, create teacher satisfaction, and develop new forms of leadership. This digest presents an overview of research that investigated whether SDM delivers on these promises. Studies indicate that so far there is little consistent evidence that SDM increases student achievement. Teachers generally report feelings of empowerment and are more likely to support collaborative decisions; however, SDM often creates conflict and difficult negotiations among participants. Principals often experience difficulties in changing their leadership roles and finding a balance between showing support and letting go. These early studies suggest that enthusiasm about SDM should be tempered with realism. (Contains 10 references.) (LMI)

Despite the commissions and politicians that decry the failures of public education, thousands of teachers, principals, and administrators struggle daily to provide children with an education that will open doors. This article examines some of these educators' efforts, which demonstrate that change and success are possible. Interviews were conducted with Siegfried Engelmann, professor of instructional research at the University of Oregon College of Education; Joanne Johnson, a 4th/5th-grade teacher at Goshen Elementary School in Springfield, Oregon; Bruce Joyce, director of Bookend Laboratories in Pauma Valley, California; Robert Slavin, codirector of the Center for Research on the Education of Students Placed at Risk at Johns Hopkins University; and Barbara Sizemore, dean of

DePaul University School of Education. Some key strategies used by the five educators included: (1) direct instruction—a structured instructional program that works on the assumption that all children can learn and that basic skills should be the main focus of a compensatory-education program; (2) inquiry-based curriculum—an experience-based instructional philosophy in which curriculum is keyed to current events and issues of local or personal interest; (3) action research—a combination of approaches to improving classroom teaching and outcomes that combines specific steps designed to bring about improvement with testing to ensure the improvements occur; (4) Success for All—research-based programs in reading, writing, and language arts that emphasize cooperative learning, the identification of children in need, one-on-one tutoring where needed, assessment, and strong parent involvement; and (5) School Achievement Structure (SAS)—a highly structured set of routines designed to enable students, especially those living in poverty, to pass standardized tests. While there is no single, perfect way to create successful change, there are programs that work and people who are dedicated to improving educational opportunities (LMI)

Identifiers—ERIC Digests

This information digest provides an overview of some areas of agreement between the fields of gifted education and middle school education, some areas of tension, and some promising directions that could engage educators in mutual planning of appropriate services for all middle school students, including the gifted. Shared beliefs include the value of instruction that is theme based, is interdisciplinary, and fosters student self-direction and independence. Problems between gifted and middle-level education exist in the areas of excellence versus equity, emphasis on heterogeneity, use of labels, ambiguity about appropriate middle school curricula, use of cooperative learning as an instructional strategy, attention to affective needs of early adolescents, and general tension. For each problem area, promising directions are listed, such as emphasizing appropriately differentiated instruction in heterogeneous classrooms, emphasizing problem-based strategies rather than skill-focused strategies in cooperative learning activities, planning for both achievement and belonging for advanced learners, and acknowledging strengths and contributions of both practices. (Contains 18 references.) (DB)

Identifiers—*Differentiated Curriculum (Gifted), ERIC Digests

This brief paper summarizes guidelines for adapting instruction for advanced learners in inclusive, mixed-ability middle school classrooms. A rationale for differentiating instruction is followed by consideration of what differentiation is and is not. Characteristics of a differentiated class are enumerated, including: instruction is concept focused and principle driven, on-going assessment of student readiness and growth are built into the curriculum, and flexible grouping is consistently used. Suggested ways to differentiate instruction are grouped into interest-based adjustments, adjustments based on learning profile, and readiness-based adjustments. These last adjustments involve offering students a range of learning tasks developed along eight continua as follows: (1) concrete to abstract, (2) simple to complex, (3) basic to transformational, (4) fewer facets to multi-facets, (5) smaller leaps to greater leaps, (6) more structured to more open, (7) less independence to greater independence, and (8) slower to quicker. Suggested

strategies for managing a differentiated classroom include: use of multiple texts and supplementary materials, interest centers, learning contracts, compacting, and group investigation. Teachers are urged to prepare students and parents for a differentiated classroom, attend to issues of classroom structure and management, and plan with team members and other colleagues interested in differentiation (DB).

Descriptors—*Cluster Grouping, *Educational Methods, Elementary Secondary Education, *Gifted, *Grouping (Instructional Purposes), Homogeneous Grouping, *Inclusive Schools, Mainstreaming

Identifiers—Differentiated Educational Plans, ERIC Digests

This digest in a question and answer format, provides basic information on cluster grouping of gifted students. Questions address such concerns as: the meaning of cluster grouping, differences between cluster grouping and tracking, advantages of cluster grouping, learning needs of gifted students, the argument that gifted education is elitist, the argument that gifted students should be spread out in all classes to serve as tutors and role models, cluster grouping and the inclusion model, effects of clustering gifted students on non-gifted classmates, identification of gifted students, skills needed by cluster teachers, cluster grouping and enrichment programs, cluster grouping at middle and secondary levels, the role of Differentiated Educational Plans, and disadvantages of cluster grouping. The information brief concludes that cluster grouping is a way to ensure that gifted students receive a quality education at the same time as schools work to improve learning for all students. (DB)

Identifiers—ERIC Digests

An elementary school program in which older children teach English literacy skills to younger children is described. The Literacy Club program, a regular class activity, matches older students whose native language is other than English (Rapid Readers) with younger students with the same native language (Little Readers) and involves the Rapid Readers in a variety of English literacy activities, including reading to the Little Readers, discussing readings with Little Readers in their native language, writing evaluative letters to their Little Readers, translating books into their native language, creating lesson plans, and discussing instructional problems with their Rapid Reader peers. The program is designed to provide instruction and encouragement to the younger children and to help the older children gain confidence, self-awareness, awareness of others, and organizational skills. The approach has been found to empower the older children in both personal and instructional areas. Even older students with limited English skills gained considerably in self-esteem, profi-

ciency, and awareness of the literacy development process through the program (MSE)

Identifiers—ERIC Digests

This digest presents eight principles drawn from theory and research on second language acquisition and culturally sensitive instruction to guide teachers who work with linguistically and culturally diverse students. Each principle is accompanied by a brief explanation and suggestions for classroom techniques and activities. They are: (1) bilingualism is an asset and should be fostered; (2) there is an ebb and flow to children's bilingualism, and it is rare for both languages to be perfectly balanced; (3) there are culturally different patterns in language use; (4) for some bilingual children, code-switching is a normal language phenomenon; (5) children come to learn languages in many different ways; (6) language is used to communicate meaning; (7) language flourishes best in a language-rich environment; and (8) children should be encouraged to experiment with language. A brief bibliography is provided (MSE)

Descriptors—Adult Basic Education, *Adult Literacy, Competency Based Education, *Educational Philosophy, Educational Trends, *English (Second Language), *Language Experience Approach, *Literacy Education, Second Language Instruction, Student Developed Materials, Student Participation, Teaching Methods, Trend Analysis, *Whole Language Approach, Writing Instruction

Identifiers—ERIC Digests, Freire (Paulo)

Five approaches currently used in adult English-as-a-Second-Language (ESL) literacy instruction are described. A group of strategies developed by Paulo Freire are participatory or learner-centered, and revolve around the discussion of issues drawn from learners' real-life experiences. The Whole Language Approach, more than a specific method or collection of strategies, techniques, or materials is a perspective emphasizing the use of language as a whole, not as discrete parts. Whole language classes work together to develop the curriculum, read and write for and with each other, and evaluate products together. Classroom activities might include extended reading and writing. The Language Experience Approach is a teaching strategy

or technique consistent with the whole language perspective. In it, learner experiences are dictated, then transcribed and used as reading material. Lack of authentic reading materials for adult ESL literacy programs has inspired a related approach, one focusing on learner writing and publishing. Most writing-based classrooms follow a writing-process approach in which learners and the teacher brainstorm writing topics, draft pieces, share and confer about writing, revise, edit, and publish in a workshop atmosphere in which reading, writing, and talk are integrated and support each other. Finally, competency-based education, used in adult ESL literacy since the mid-1970s, is based on the learning of competencies expressed in terms of tasks. Four components include assessment of learner needs, selection of relevant competencies, and instruction and evaluation based on those competencies. Contains eight references and four published learner writing references (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

Identifiers—ERIC Digests, *Focus Groups Approach

With the increase in workplace English-as-a-Second-Language (ESL) literacy education programs, there is a need to assess whether the attention given to improving basic skills and English language proficiency has made a change in the participant and in the workplace. Such evaluations often use both qualitative and quantitative measures of program outcomes. Qualitative measures include focus groups and individual (stakeholder) interviews, workplace observations, and portfolios of learner classwork. Quantitative measures include commercially available tests, scaled performance ratings, and some program-developed assessment tools, such as portfolios. To increase credibility and help ensure reliability of qualitative measures, evaluators collect multiple types of evidence (such as interviews and observations) from various stakeholders (employers, labor unions, participants, teachers, funders) related to a single outcome and arrange them into matrices, organizing them thematically and enabling analysis of data across respondents. Two commercially available tests that are commonly used sources of quantitative data are the Basic English Skills Test (BEST) and the Comprehensive Adult Student Assessment System (CASAS) ESL Appraisal. These instruments are easy to use, and their reliability has been tested but they may not measure what has been taught in the classroom, and they may have little applicability to specific workplace tasks. Other issues surrounding evaluation of workplace ESL instruction are these unrealistic stakeholder expectations; the need for additional, cross-cultural training in techniques for success in the American workplace; and inadequate funding. Identifiers—ERIC Digests

Learner assessment is conducted in adult basic education and adult English-as-a-Second-Language (ESL) educational programs for many reasons: to place learners at appropriate instructional levels; to measure ongoing progress; to qualify students for enrollment in academic or job training programs; to verify program effectiveness; and to demonstrate learner gains for continued program funding. Because of these multiple objectives, learner assessment involves a variety of instruments and procedures. In adult basic education, commercially available instruments predominate as assessment tools because they have construct validity and scoring reliability, are easy to administer to groups, require minimal teacher training, and are often stipulated by funding sources. Their use is problematic because they may not adequately assess individual learner strengths and weaknesses, especially at the lowest literacy skill levels. They also do not necessarily measure what has been learned in class or address learner goals. Alternative assessments (also known as classroom-based, authentic, or congruent assessment) such as surveys, interviews, checklists, observation measures, teacher-developed tests, learner self-assessment, portfolios and other performance samples, and performance-based tests, provide additional assessment flexibility. Other quantifiable indicators of learner progress include learner retention, learner promotion to more advanced instructional levels or jobs, and attainment of specific program goals. Less quantifiable learner outcomes include heightened self-esteem and increased participation in community, school, and church events. Identifiers—Canada, *Content Area Teaching, ERIC Digests, United States

With the purpose of highlighting the lessons to be learned from immersion programs, this digest presents selected findings from research carried out to evaluate the effectiveness of immersion programs in Canada and the United States. These lessons are related to the importance of: (1) integrating language with content instruction (when second language instruction is integrated with instruction in academic content, it is more effective than teaching the language in isolation); (2) creating classroom environments that are discourse-rich (providing opportunities for extended student discourse, especially discourse associated with activities selected by individual students, can be particularly beneficial for second language learning); and (3) systematically planning language instruction along with content instruction (Contains seven references) (JL)

Identifiers—ERIC Digests

This digest focuses on foreign language instruction at the middle school level. In general, middle school foreign language programs have received

relatively little attention. However, the increased emphasis within the field on longer sequences of instruction, combined with the conversion of junior high schools to middle schools has necessitated a renewed vision of how foreign languages are taught at the middle school level. This digest focuses on this view to the future by considering the following: (1) middle school philosophy and organization and the foreign language program; (2) interdisciplinary units and the foreign language curriculum (thematic units, curricular connections, thinking skills development); (3) middle school foreign language learners; (4) middle school strategies; and (5) curriculum and materials for the middle school. Although basic skills and English language instruction are often viewed as real needs at the workplace, few companies provide this for their workers. Those that do are motivated by one or more of these factors: product quality improvement, commitment of top management to training and education, or the sales effort of an educational provider. Those that do not provide such instruction give these reasons: cost of instruction, reluctance of upper management to initiate training; and finding alternative ways of dealing with workers' educational deficiencies. Developers of instructional programs in English as a second language (ESL) have found that preparation in a number of areas and product characteristics can enhance the success of their marketing efforts. These include: beginning with companies with a history of offering employee training at all levels; offering realistic assessments of time and resources needed to accomplish training; offering short courses with specific, attainable goals; offering cross-cultural courses to both native and non-native English-speakers at the workplace; developing realistic ways of documenting how instruction has improved workplace performance, engaging managers' active support; and providing skills that transfer to areas of life outside the workplace. Identifiers—ERIC Digests

A discussion of numeracy (the ability to cope confidently with the mathematical demands of everyday life), focuses on provision of numeracy instruction alongside English-as-a-Second-Language (ESL) instruction for learners with low literacy skills. It looks first at considerations and methods for assessing student numeracy needs, including the nature of adult learning, student preferences and abilities, and differences in the uses of mathematical symbols and forms of computation in the learners' native language and culture. The discussion then turns to the attitudes and approaches to numeracy of ESL and literacy instructors, who may not be familiar with or comfortable with mathematics or mathematics teaching and may see mathematics skills as discrete and separate from literacy rather than as integral to it. Recommendations for training to teach adult mathematical literacy, based on recent initiatives, are offered. Specific classroom techniques for effective lesson planning and presentation are also outlined. Two numeracy activities, one introducing a place-value chart and one on metric measurement, are offered as illustrations of effective techniques. Identifiers—ERIC Digests

Labor unions have provided English-as-a-Second-Language (ESL) instruction in the workplace since the early 1900s, to serve a growing immigrant workforce. In the late 1970s and early 1980s, an increase in immigrant population, decline in manufacturing jobs, new technology, and work restructuring brought a new urgency to union-sponsored worker education, primarily to provide workers with access to training. The need for communication skills, problem-solving skills, and knowledge of workplace organization for the high-performance workplace has recently emerged as a new need. Programs usually involve a partnership of unions, businesses, and educational entities. These may include union consortia, joint union-company partnership funds, or individual unions forming partnerships with employers and educators. Workplace ESL instruction and curricula for union programs incorporate the range of approaches and techniques found in many adult ESL programs. While the major focus is on job-related language skills, the programs may also teach general life skills, worker rights and responsibilities, problem-solving and critical thinking, and health safety

Descriptors—Charts, Creative Writing, Dialog Journals, *English (Second Language), *Evaluation Methods, Interviews, Journal Writing, Nonverbal Communication, Oral Language, Portfolios (Background Materials), Role Playing, Science Instruction, Social Studies, *Student Evaluation, Writing Exercises

Identifiers—*Alternative Assessment, ERIC Digests

This digest provides examples of measures well suited for assessing English-as-a-Second-Language (ESL) students. Alternative assessment is particularly useful with ESL students because it asks students to show what they can integrate and produce, not simply recall and reproduce. Alternative assessment includes varied measures adaptable for different situations. Nonverbal assessment strategies include physical demonstrations and pictorial products expressing academic concepts or content knowledge without speech or writing. K-W-L (what I know/what I want to know/what I've learned) charts are used, both individually or as a class exercise, to begin and end a unit of study, particularly in social studies and science. Before the unit, the strategy helps teachers understand students' background knowledge and interests; afterward, it helps assess content material learned. Oral performance-based assessments include such activities as interviews, oral reports, role-plays, describing, explaining, summarizing, retelling, and paraphrasing stories or text material. Other oral and written products useful for assessing ESL students' progress are content area thinking and learning logs, reading response logs, structured and creative writing assignments, dialogue journals, and student-produced audio or video cassettes. Portfolios are used to collect samples of student work over time to track student development. (MSE)

Descriptors—Audiotape Recordings, Educational Trends, *Interviews, *Language Proficiency, *Language Tests, *Oral Language, *Simulation, Test Format, *Test Use, Trend Analysis

Identifiers—ERIC Digests, Oral Proficiency Testing, *Simulated Oral Proficiency Interview

The Simulated Oral Proficiency Interview (SOPi) is a semi-direct performance-based speaking test that emulates the face-to-face Oral Proficiency Interview (OPI) as closely as practical using a tape recording and printed test booklet. The prototypical SOPi contains simple personal background questions typical of an initial encounter (warm-up) and topic- and situation-based performance tasks to assess the examinee's ability to handle the functions

and content characterizing higher levels of proficiency. The test package consists of a master tape that contains all test instructions and items, an examinee response tape used to record responses, and a test booklet with test instructions and directions for all tasks. In five studies involving different test development teams and different languages, the SOPi has proved a valid and reliable surrogate for the OPI. SOPis have been developed for Chinese, Portuguese, Hebrew, Indonesian, Hausa, Arabic, Japanese, French, German, and Spanish, and rater training has been developed. The test format's flexibility allows its tailoring for proficiency level, age group, background, and profession and administered by any teacher, aide, or language lab technician. The SOPi may offer practical and psychometric advantages over a face-to-face interview. (MSE)

This digest discusses the role of continuous quality improvement (CQI) in college classroom effectiveness efforts, particularly specific institutions where sustained CQI programs have affected college classroom practice. These projects' common features, and lingering doubts about CQI. It discusses the general principles and philosophy of CQI and its particular promise in education to make students the focus, classroom effectiveness the concern, and assessment a means to gain feedback for future improvement. It looks in detail at CQI efforts at seven organizations, two within the same institution and analyzes common threads among them such as viewing students as stakeholders, customized faculty development offerings, and financial realignment. The report also addresses lingering misgivings about CQI concerning standardization, benchmarking, customer focus, teams, and quality (Contains five references.) (JB)

Identifiers—Arizona State University, Benchmarking, Business Schools, *Continuous Quality Improvement, Maricopa County Community College District AZ, Miami Dade Community College FL, Northwest Missouri State University, Samford University AL, University of Chicago IL

This report presents seven case studies and discusses the role of continuous quality improvement (CQI) in college classroom effectiveness efforts, particularly specific institutions where sustained CQI programs have affected college classroom practice, their common features, and lingering doubts about CQI. An introduction discusses general principles and philosophy, origins in mass production, Total Quality Management (TQM), and CQI's promise in education to make students the focus, classroom effectiveness the concern, and assessment a means to gain feedback for future improvement. The case studies describe seven educational organizations at six institutions (two research universities, two comprehensive universities, and two community colleges) and their attempts to move from exposure to TQM in the administrative super-structure to CQI in the classroom. The institutions are: (1) the University of Chicago Graduate School of Business; (2) the College of Business at Arizona State University; (3) the College of Engineering at Arizona State University; (4) Northwest Missouri State University; (5) Samford University (Alabama); (6) Maricopa County Community College District (Arizona); and (7) Miami-Dade Community College (Florida). A summary finds that common threads among these otherwise idiosyncratic programs include either a new focus or a heightened awareness of "the customer," commitment from top administrative leadership, customized faculty development, realization that change takes time, and financial realignment. The report also addresses lingering misgivings including setting standards, benchmarking, team building, interdisciplinary issues, rewards and salary, and the long term durability of the quality movement. This monograph reviews empirical studies on various aspects of higher education relating to the effectiveness of instruction in regard to four areas: curriculum, instruction, campus psychological climate, and academic advising. After an introduction, the first section describes the development of critical skills, how these skills develop, and the conditions believed necessary to produce them. The following four sections examine the four core areas central to student development and the contribution research suggests they now make to the development: (1) curriculum (methods, the intellectual climate of the classroom, students' involvement, effects of the curriculum); (2) instruction (classroom tests and grades); (3) the campus climate (integration into the campus community, commuter and part-time students, students' involvement with faculty, and minority group members); and (4) academic advising (developmental advising, the necessity for training in advising, and evaluation, recognition, and reward of advising). The next three sections describe opportunities for dramatic gains in students' learning, examining evidence about the relative capacity of students to learn at a very high level; describing seven specific changes which can improve students' learning; and addressing issues of leadership, management, and professional development. The final section presents a vision and a challenge to develop a new kind of community on campus. (Contains approximately 650 references.) (DB)

Identifiers—*ERIC Digests

This digest reviews the literature on ways that institutions of higher education can enhance student learning outside the classroom. It considers research on the contributions of out-of-class experiences to valued outcomes of postsecondary education and identifies nine institutional conditions which appear to foster student learning outside the classroom such as clear, coherent, and consistently expressed educational purposes and an ethos of learning that pervades all aspects of the institution. Institutions are urged to take such steps as breaking down the barriers between various institutional units and creating situations in which students examine the connections between their studies and life outside the classroom. Also addressed are the roles of governing boards and presidents, academic and student affairs administrators, faculty members, and students in fostering out-of-classroom learning. All members of the campus community are urged to view learning as continuous and contagious. (Contains five references.) (DB)

Descriptors—Academic Persistence, College Outcomes Assessment, Educational Environment, Educational Objectives, *Experiential Learning, *Extracurricular Activities, Higher Education, Organizational Climate, *Student Development, *Student Experience, *Student Participation, Student School Relationship

This review of the literature considers three issues: how out-of-class experiences of undergraduates contribute to the goals of higher education and valued outcomes; the institutional conditions that encourage students to use out-of-class time in educationally purposeful ways; and the role of all members of the campus community to foster such learning. The report first describes the methodology involved in identifying the relevant literature and the outcomes framework used to analyze it. The link between involvement in out-of-class activities and educational attainment is examined next. Then, the out-of-class experiences associated with persis-

tence and various categories of outcomes are discussed. Nine conditions are identified that characterize powerful out-of-class environments: (1) clear, coherent, and consistently expressed educational purposes; (2) an institutional philosophy that embraces a holistic view of talent development; (3) complementary institutional policies and practices congruent with students' characteristics and needs; (4) high, clear expectations for student performance; (5) use of effective teaching approaches; (6) systematic assessment of institutional practices and student performance; (7) ample opportunities for student involvement in educationally purposeful out-of-class activities; (8) human scale settings characterized by ethics of membership and care; and (9) an ethos of learning that pervades all aspects of the institution. The report concludes with implications for governing board members, presidents, academic administrators, student affairs administrators, faculty, and students. (Contains approximately 330 references.) (DB)

Identifiers—ERIC Digests

This digest of a full report with the same title reviews the literature on the legal implications of college faculty reappointment, promotion, and tenure decisions, with an emphasis on how an understanding of the relevant legal principles can inform practice. It briefly summarizes issues in the following areas: the role of the courts in reappointment, promotion, and tenure decisions; reasons for tenure being the subject of numerous faculty lawsuits; the contents of the faculty employment contract, the constitutional guarantees of due process for untenured faculty members; the courts' balancing of institutional and individual First Amendment rights; protection from illegal discrimination in reappointment, promotion, and tenure decisions; the legal boundaries of affirmative action; the courts' concern for balance between the importance of confidentiality for the peer review system and the need to prohibit discrimination; the liability exposure of administrators and faculty members participating in the peer review process. The digest also lists specific steps that can be taken by administrators, faculty members, and institutional attorneys to minimize the risk of litigation. (CK)

This book addresses the legal implications of reappointment, promotion and tenure decisions bearing on college faculty with an emphasis on how understanding the relevant legal principles can inform practice. It uses scenarios and cases to illustrate the conflict between institutional and individual rights and the potential legal problems associated with employment contracts, due process requirements, academic freedom, employment discrimination, affirmative action, and peer review. Specific issues addressed include: the role of the courts in reappointment, promotion, and tenure decisions; reasons tenure is the subject of numerous faculty lawsuits; the contents of the faculty employment contract; constitutional guarantees of due process for untenured faculty members; how the courts balance institutional and individual First Amendment rights; protection of faculty from illegal discrimination; the legal boundaries of affirmative action; the courts' concern for balance between the confidentiality of the peer review system and protection from discrimination; and the liability exposure of administrators and faculty members participating in the peer review process. Individual chapters address: (1) tenure in American higher education; (2) the faculty employment contract; (3) constitutional rights in employment decisions; (4) employment discrimination; (5) affirmative action, diversity, and individual rights; (6) legal implications of peer review; and (7) recommendations for policy and practice. A list of relevant court cases is attached. (Contains 100 references.) (CK)

Identifiers—ERIC Digests

Based on a longer report with the same title, this digest summarizes current efforts to increase the quality of college teaching. The report uses a model that views strategies for improving instruction as helping motivate individual faculty members to improve their teaching by actively changing (and maintaining) certain of their instructional attitudes and practices. The model focuses on utilizing varieties of informative feedback from such sources as colleagues and consultants, department chairs, students, and self that are facilitated by a supportive teaching culture. The report addresses the following concerns: (1) characteristics of a supportive teach-

ing culture (such as administrator support for instructional improvement); (2) strategies to help college teachers evaluate themselves (such as self-reports); (3) the role of students in improving teaching (through teacher and course evaluations); (4) the role of colleagues, consultants, and department chairs (faculty collaboration through peer observation and provision of feedback); (5) the special needs of new and junior faculty (workshops and mentoring programs); and (6) the role of the college (strengthening of supportive teaching cultures). Descriptors—Beginning Teachers, *College Faculty, Educational Environment, Faculty College Relationship, Feedback, Higher Education, *Instructional Improvement, Models, *Organizational Climate, *Reflective Teaching, Self Evaluation (Individuals), Student Evaluation of Teacher Performance, *Teacher Collaboration, Teacher Improvement

This report reviews the research and literature on the improvement of college teaching through use of a model that stresses a supportive teaching culture and helps motivate individual faculty members to improve their teaching by utilizing a variety of sources of informative feedback. The sources include: colleagues and consultants, department chairs, students, and self-evaluation. The report provides: (1) an examination of the nature of instructional improvement and the challenge of motivating faculty to improve their teaching through identifying, making, and maintaining necessary changes; (2) an exploration of important factors in the creation of a supportive campus teaching culture; (3) explanations and illustrations of five sources of feedback for improving instruction (teachers themselves, students, colleagues, consultants, and department chairs); and (4) an analysis of the special needs of new and junior faculty for instructional improvement. The following characteristics of a culture supportive of teaching improvement are identified: administrator support; shared values about the importance of teaching and involvement of faculty in instructional improvement programs; an expanded view of scholarship; a requirement that effective teaching be demonstrated as part of the hiring process; faculty interaction and collaboration; a faculty development program; effective department chairs; and connection of tenure/promotion decisions to teaching evaluations. Identifiers—ERIC Digests, National Research Council, Scientific Expeditions, *Virtual Reality

Virtual Reality (VR) is a computer-created sensory experience that allows a participant to believe and barely distinguish a "virtual" experience from a real one using computer graphics, sounds, and images to reproduce electronic versions of real-life situations. This digest describes how VR works and discusses applications of VR in surgery, scientific exploration, and education and training. Future developments and policy suggestions from the National Research Council's study on uses of VR are outlined. (Contains 15 references.) (AEF)

Identifiers—ERIC Digests

This digest provides background information and sources that help in understanding the concept of educational technology. Specific answers are provided to the following 12 questions: (1) What is educational technology? (2) What are the roots of educational technology? (3) What is a good source of research findings? (4) What do educational technologists do? (5) Where are educational technologists employed? (6) Where do educational technologists obtain professional education? (7) What fields offer good preparation for educational technology? (8) What are the major professional organizations? (9) What publications do educational technologists read? (10) What are the comprehensive references for the field? (11) What textbooks are commonly used? and (12) Where can more specific information about educational technology be found? (MAS)

Identifiers—ERIC Digests, Internet

A Local Area Network (LAN) allows computing equipment to share information from any device on a network with other devices on the same network. Uses for LANs in schools include sharing printers and programs, centralized file sharing, access to library databases and catalog, cost-effective connection to external networks, electronic mail, school bulletin boards, and sending and receiving faxes. A LAN provides a school information system for administrators, teachers, students, parents and the community. School district uses for LANs include all of those uses in schools, particularly file sharing for student information, transmission of records, electronic mail and shared use of one district connection to the Internet. Common types of LANs are Ethernet and Token Ring; Ethernet predominates because it is easily designed and is composed of data transfer devices which are less expensive than similar Token Ring devices. There are many aspects of LAN design to consider when developing a technology plan for a school building or school district. These considerations include cabling medium, wiring plan, network and electrical outlets, furniture and fixture location, and potential use of space. An additional factor in design planning is the number of network connections per room; the needs of regular, special, technology, and computing classrooms should be considered, as well as the library, administrative offices and other offices. Identifiers—Electronic Media, ERIC Digests

Classroom assessment measures, in the past often limited to multiple-choice and standardized tests, now can involve the creation of portfolios, or collections of pieces of work which the student selects as the best representation of his or her efforts, progress, skills, and accomplishments. Portfolios also usually include teacher evaluations and student self-reflections and can come in several varieties: (1) "developmental" portfolios document improvement in a designated subject area; (2) "teacher planning" portfolios allow teachers to gauge the ability levels of an incoming class; (3) "proficiency" portfolios can be used to determine graduation eligibility; (4) "showcase" portfolios can assemble the best work done across an entire educational career; (5) "employment skills" portfolios can collect assignments that demonstrate work readiness; and (6) "college admission" portfolios can be solicited by admissions officers to judge an applicant's potential for success at a certain academic institution. To solve problems of storage space and of collecting assignments in various media into a cohesive whole, many schools have begun to store portfolios in electronic form on floppy disks or CD-ROM. Software aids like Roger Wagner Publishing's "HyperStudio" and Claris' "FilmMaker Pro" are highlighted, and examples are given of a high school in New York that has implemented an electronic portfolio program. (Contains 13 references.) (BEW)

The "ERIC Review" is published three times a year and announces research results, publications, and new programs relevant to each issue's theme topic. This issue is intended to help teacher educators, administrators, librarians, adult educators, and individual teachers introduce others to education resources on computer networks. There are nine articles including: (1) "Teaching Teachers to Use Telecomputing Tools" (Judi Harris); (2) "Classrooms Online: How One Teacher Got Started" (Bonnie L. Bracey); (3) "The Internet and Acceptable Use Policies: What Schools Need to Know" (Kay Day and Lynne Schrum); (4) "Network Terms to Get You Through the 1990s" (Barak Stussman); (5) "Federal Initiatives in Educational Technology" (Barbara Reuben-Powell and Carol Boston); (6) "Online with ERIC" which describes AskERIC, the National Parent Information Network, and other ERIC gopher and world wide web sites; (7) "Selected Resource Organizations" (Barak Stussman and Michael Heeg); (8) "Selected Reading List" (Carol Boston and Barak Stussman); and (9) "Putting It All Together: An Action Plan" which presents tips for using computer networks and a list of selected listservs. (AEF)

Descriptors—Access to Information, Assignments, *Computer Literacy, Content Area Reading, *Course Integrated Library Instruction, Elementary Secondary Education, Evalua-

tion. *Information Literacy. Information Seeking. *Information Skills. Integrated Activities. *Problem Solving. *Skill Development Identifiers—ERIC Digests

Over the past 20 years, library media professionals have worked to move from teaching isolated library skills to teaching integrated information skills. Effective integration of information skills has two requirements: (1) the skills must directly relate to the content area curriculum and to classroom assignments; and (2) the skills themselves need to be tied together in a logical and systematic information process model. Schools seeking to move from isolated computer skills instruction also need to focus on these requirements. Library media specialists, computer teachers, and classroom teachers need to work together to develop units and lessons that will include both computer skills, general information skills, and content-area curriculum outcomes. The "Big Six Skills Approach to Information Problem Solving" is an information literacy curriculum, an information problem-solving process, and a set of skills which provide a strategy for effectively and efficiently meeting information needs. This model is transferable to school, personal, and work applications, as well as all content areas and the full range of grade levels. The Big Six Skills include: (1) task definition; (2) information seeking strategies; (3) location and access; (4) use of information; (5) synthesis; and (6) evaluation. An addendum is included which presents skills and knowledge related to technology that are not part of the computer and information technology curriculum. Contains 24 references. (Author/AEF)

Descriptors—*Access to Information, Computer Mediated Communication, *Computer Networks, Costs, Databases, *Electronic Mail, *Information Retrieval, *Internet, Microcomputers

Identifiers—Communications Protocols, *Connectivity, ERIC Digests, File Transfer Protocol, Listservs, Telnets, World Wide Web

This update to a previous digest briefly describes the Internet computer network, the physical connections and communication protocols that make it possible, and the applications and information resources the network provides. The applications covered include electronic mail and listservs, the world wide web, telnet connections with remote library catalogs or databases, and file transfer protocol (FTP). Often barriers of distance, time, and cost that are significant with other forms of electronic communication are not as significant on the Internet because it accesses systems quickly regardless of proximity and because institutional users are not usually charged by level of use. Moreover, getting connected to the Internet is often not even as expensive as getting cable television. The Internet continues to evolve through formal standards development and individual or corporate software creation and enhancement (BEW)

Identifiers—ERIC Digests

Electronic technologies and collection development are two of the top concerns in library and information science today. The challenges of integrating electronic resources and technologies into the process of collection development are many, and many-faceted. Beyond task-oriented considerations, such as the selection process itself, there are large-scale management issues, such as budget, policy, personnel, and technology. Three areas of collection development that seem to be the most problematic are selection, acquisitions, and inter-institutional cooperation. Several authors suggest comprehensive approaches to library collection development in an electronic age. One informative success story is the selection model developed at an academic library as a means to mainstream electronic resources. The model involves breaking the task into manageable units, developing expertise in selecting resources regardless of format, and anticipating impacts throughout the institution. An important component is a standing committee that reviews electronic publications. One model for cooperative collection development is OHIOLink, which is a consortium of 17 academic libraries; specifications for OHIOLink include ease of use by collection managers, regular provision of data for routine reports, and the capability to collect and analyze usage data across the system. In view of serious fiscal concerns in collection development, one author has outlined a seven-part agenda for rethinking priorities: planning, allocating, faculty liaison, cooperative collection development, evaluating, acquisitions, alternatives, and selection efficiency. Thanks to ever-increasing high-level advocacy and the added incentive provided by Goals 2000 legislation, many states have completed or are working on school technology plans. Although technology planning occurs at multiple levels, many principles are identical, and with careful cooperation, facets of a plan at one level will often " dovetail " with facets of other plans. Planners need to engage the services, creativity, and assistance of all stakeholders. Efforts of all participants in the planning process need to be marshaled to meet established timelines, to accept delegated responsi-

bilities, and to evaluate progress. Then a plan can be created which addresses appropriate financial, technical, functional, architectural, and legal realities. (Contains 15 references.) (BEW)

Descriptors—Access to Information, Computer Literacy, Computer Networks, *Content Analysis, Delivery Systems, *Educational Technology, Educational Television, *Educational Trends, Higher Education, Teacher Qualifications

Identifiers—Access to Computers

Based on the findings of a content analysis of representative literature on educational technology, this report examines trends in educational technology from October 1, 1994 through September 30, 1995. Eight trends for 1995 are identified and discussed: (1) computers are pervasive in schools and higher education institutions and virtually every student in a formal education setting has access to a computer; (2) networking is one of the fastest growing applications of technology in education; (3) access to television resources in the school is almost universal; (4) advocacy for the use of educational technology has increased among policy groups; (5) educational technology is increasingly available in home and community settings; (6) new delivery systems for educational technology applications have grown in geometric proportions; (7) there is new insistence that teachers must become technologically literate; and (8) educational technology is perceived as a major vehicle in the movement toward education reform. An analysis of trends from 1988-1995 and an explanation of the methodology used in this study conclude the monograph. Copies of worksheets, definitions, and additional data are appended. Development, Strategic Planning, *Total Quality Management

Identifiers—Barriers to Change, ERIC Digests

Total Quality Management (TQM) is "a system of continuous improvement employing participative management and centered on the needs of customers." Key components of TQM are employee involvement and training, problem-solving teams, statistical methods, long-term goals and thinking, and recognition that the system, not people, produces inefficiencies. Libraries can benefit from TQM in three ways: breaking down interdepartmental barriers; redefining the beneficiaries of library services as internal customers (staff) and external customers (patrons); and reaching a state of continuous improvement. Potential barriers to the adoption of TQM in libraries include: objections to the vocabulary, lack of commitment, attempting to solve problems too quickly, and resistance of professional staff. The notable principles of TQM are summarized as follows: (1) manage by fact; (2) eliminate rework; (3) respect people and ideas; and (4) empower people. By formulating a strategic plan, and following it with a commitment to continue quality improvement, library managers can transform and improve their organizations. (Contains 13 references.) Identifiers—ERIC Digests

Questions related to underrepresented groups' access to postsecondary education and their experiences while in college are fundamental to the goal of achieving equal educational opportunities for all students. Some researchers have viewed community colleges as important in giving access to students who might not have the academic ability for the intellectual paths of their choice by helping them define and achieve realistic goals. Others argue that they continue class-based separation by tracking less academically prepared students into vocational programs. Both community college supporters and critics agree that they allow more students to enroll in college at a lower cost. Critics, however, highlight the large gap between students in two-year and four-year institutions who attain baccalaureate degrees and note that two-year college students typically come from non-white families with lower incomes and have parents who did not attend college. The 1995 "Transfer Assembly Study" by the Center for the Study of Community Colleges found that only 12% of Hispanic and Black students transferred to four-year institutions, compared to 23% of White students. Cultural influences on minority academic achievement include family expectations of employment after high school, academic testing which places many minority students on remedial tracks, a lack of minority role models, and lack of encouragement from white professors. Fortunately, some colleges have started programs to actively address these issues through recruitment and outreach programs, peer mentors,

minority faculty recruitment, and programs to improve campus climate (KP)

Community colleges are under pressure from internal and external forces to recruit and retain minority faculty members. According to recent studies, approximately 90% of the total faculty at two- and four-year public and private colleges are white. The highest percentage of faculty of color are employed at public four-year institutions (12.6%) and the lowest percentage at private two-year colleges (2.6%). Various strategies have been suggested for recruiting minority faculty, including the following: (1) keep an open mind about credentials and recognize the value of non-academic experiences; (2) include area minority professionals on search committees; (3) utilize minority media in recruitment campaigns; (4) recruit through business and industry partnerships; (5) include minorities on interview committees; (6) keep candidate pools open until minority applicants are found; (7) maintain dialogue and faculty exchanges with historically black colleges; (8) implement long-range programs that encourage minority and women students; and (10) diversify the entire campus. Retention strategies have also been proposed to retain minorities, including begin with a thorough orientation; promote collegiality; schedule diversity training and staff development programs; and incorporate minority faculty into decision-making and all facets of campus life. Examples of successful minority recruitment and retention programs are in place at Maricopa and California Community Colleges (KP)

Identifiers—ERIC Digests

Projecting the future for U.S. community colleges into the early 21st century involves projecting the future for the United States in general. Based on trend data, it can be expected that the number of community colleges will not change, except to the extent that public universities organize additional two-year branch campuses or community colleges upgrade satellite centers to full campus status. Their mission will not change either, as their role in career, collegiate, developmental, and continuing education has become well accepted by the public and by state-level coordinating and funding agencies. Increases in community college enrollments will cause the number of associate degrees awarded to increase at a faster rate than currently as strengthened matriculation and attendance requirements reduce the percentage of casual attendees. These increases will also result in a slow increase in the number of faculty, although the ratio of part- to full-time faculty will remain stable at 40 to 60. In terms of governance, the trend toward greater state-level coordination will continue at a relatively slow pace. Finally, because capital funds will be in short supply and states will be unlikely to increase allocations to community colleges by more than a couple of percentage points each year, colleges will increasingly find outside sources for funding. The prognosis for the collegiate curriculum is good. The linkage aspect of the collegiate function, centering on preparing students to enter junior-level programs leading to bachelor's degrees in health fields, business, technologies and the professions will thrive. ry, Educational Objectives, Futures (of Society), General Education, Governance, Liberal Arts, Student Personnel Services, Teaching Methods, *Two Year College Students, Two Year Colleges, Vocational Education

This book provides a comprehensive overview of community college education in the United States, emphasizing trends affecting two-year colleges in the past decade. Chapter 1 identifies social forces contributing to the development and expansion of community colleges and the continuing changes in institutional purpose. Chapter 2 examines shifting patterns in student characteristics and goals, reasons for the predominance of part-time attendance, participation and achievement among minority students, attrition issues, and the most recent data on student transfer rates. Chapter 3 utilizes national data to illustrate differences between full- and part-time faculty and discusses issues related to tenure, salary, workload, faculty evaluation and preparation, moonlighting, and burnout. Chapter 4 reviews modifications in college management stemming from changes in institutional size, the advent of collective bargaining, reductions in available funds, and changes in governance and control. Chapter 5 describes funding patterns and their relationship to organizational shifts. Chapter 6 discusses the stability of the colleges' instructional forms and the use of instructional technology. Chapter 7 considers student personnel functions, including counseling, guidance, recruitment, retention, orientation, and extracurricular activities. Chapter 8 traces the rise of occupational education toward a central position in the curriculum. Chapter 9 focuses on remedial and developmental programs and addresses controversies surrounding student mainstreaming and restrictive programming. Chapter 10 examines adult and continuing education, lifelong learning, and community services. Chapters 11 and 12 examine curricular trends and controversies in the liberal arts and general education. Chapter 13 describes research efforts in and about community colleges, while chapter 14 addresses philosophical and practical questions regarding the transfer function and the colleges' role in enhancing progress toward higher degrees. Finally, chapter 15 offers projections for college demographics, organization, curriculum, instruction, and student services. Contains 45 pages of references (MAB)

Rural community colleges have an important role to play in the economic development of their communities and in preparing community members for technological, economic, and societal changes. Community-based programming (CBP) is one tool utilized by colleges to become aware of local problems by collaborating with citizens, leaders, and community-based organizations and agencies to identify and seek resolutions to major issues in the community. The CBP model has been effectively employed to combat illiteracy, one of the most pervasive problems facing rural communities. Specific strategies employed by the Appalachian Regional Steering Committee to address the problem of illiteracy in its region include the following: (1) policy

strategies, such as identifying and working with community leaders to become involved in community development activities; (2) dispositional strategies, including promoting equal opportunity for rural adults and establishing peer support and career planning activities; (3) situational strategies, such as lobbying for reductions in transportation and educational costs; and (4) institutional strategies, including the development of cooperative partnerships at all levels. Finally, another pressing issue facing rural communities is educational access. Rural community colleges are providing technological learning systems such as distance education programs and instructional television broadcast channels to increase educational and employment opportunities (TGI)

Identifiers—ERIC Digests

As a result of increasing pressure from external constituencies, community colleges have been called upon to demonstrate accountability through assessment activities and research on institutional effectiveness based on student outcomes. Since community colleges include transient student populations, students with a wide range of ability and academic goals, and large numbers of adjunct faculty, assessment should focus on the improvement of campus instructional and support programs to increase student success, rather than on national comparisons. In addition, it is crucial that colleges determine who will assess the information collected and how it relates to student learning and instruction. Available assessment techniques and methods include competency-based models, self-reports, third-party reports, focus groups, in-depth interviews, participant observations, case studies, exit surveys, and alumni surveys. Assessment activities should take into consideration the needs of culturally, ethnically, religiously, and linguistically diverse students. Although offering extrinsic rewards encourages participation in assessment activities, assessment only becomes an integral part of the institution when this focus is clearly stated in the mission of the college and emphasized as a part of ensuring student success. Faculty resistance and lack of resources are often barriers to assessment processes. Finally, rather than searching for a single indicator to demonstrate success, institutions should value the use of different benchmarks as evidence of institutional effectiveness (TGI)

Identifiers—ERIC Digests

Educational institutions throughout the world have established various non-traditional, or non-university, forms of postsecondary education to accommodate people who are past the age of compulsory schooling and who are not served by traditional universities. These institutions may be compared and contrasted to community colleges in the United States in terms of their mission and policy, programs and services, and governance and control. Occupational related studies, for instance, are prominent in a majority of these non-traditional educational institutions. Japan's junior colleges provide a useful comparative example in that they are terminal education institutions providing general, short-term postsecondary education and differ significantly from their U.S. counterparts in admissions policy, governance, and control. Despite differences, key challenges face many community colleges around the world, including articulation, developing comprehensive exit examinations, supplying necessary remedial courses; deciding how much emphasis to place on community services; high graduate unemployment rates, and issues of social equality. Finally, many other countries that do not have comparable institutions are faced with the need to implement community colleges or simi-

lar institutions, such as in Australia which is experiencing a high demand for skill-based programs. The expansion of the community college sector appears certain because of the world-wide demand for a variety of non-university educational services at a reasonable cost by people who are past the age of compulsory schooling. Identifiers—ERIC Digests, *Riverside Community College CA

In 1991, a study was conducted at Riverside City College (RCC), in California, to determine the development of science reasoning among students. A science reasoning test was administered at the beginning and again at the end of fall 1991 to two samples: a college-wide sample of 843 students enrolled in one of 55 courses, and a science-oriented sample of 494 students who took at least one science course at RCC. The study found that, for the college-wide sample, the science curriculum was a positive influence on the development of students' science reasoning ability, with the positive effect of taking science courses on students' science reasoning ability increasing with the number of science units taken. In addition, calculus-based physics courses strongly influenced the development of science reasoning ability, while training in undergraduate psychology also contributed positively. Training in history, however, appeared to be negatively related to science reasoning. Results for the science-oriented sample indicated that a background in college humanities favorably influenced science reasoning ability, with physics courses contributing most to this development. Participation in RCC's introductory chemistry course, however, was found to have a negative impact on science reasoning. The study concluded that high student involvement in the sciences results in an increase in science reasoning ability and that the science curriculum played an important role in community college students' progress in developing reasoning ability (TGI)

ship, Two Year Colleges, Withdrawal (Education)

Identifiers—ERIC Digests

Concern about retention and attrition rates in higher education have increased over the years and efforts to identify and treat potential dropouts have grown considerably. Studies investigating the retention and attrition of community college students have found specific characteristics related to outcomes, including full- or part-time attendance, age, employment status, grade point average, being a member of an ethnic minority other than Asian, family obligations, financial concerns, and gender. Since determining predictive characteristics can be difficult, intervention strategies represent an alternative way of approaching retention and attrition and may have greater impact in the long run. Strategies that are widely used and demonstrate the greatest impact include orientation programs, mentoring programs, and multiple strategy approaches combining various efforts. Studies have shown that completion of an orientation program promotes and improves student performance. Faculty and peer mentoring programs aim to improve teacher-student interaction through the use of guidebooks, workshops, tutorial programs, and other academic and social support strategies. Multiple strategy efforts in place at community colleges include the use of campus-wide handbooks of student retention strategies; women's centers to provide support to non-traditional, female students; freshman seminars to promote supportive relationships among students and student-faculty interaction; and the implementation of college funded work-study for on-campus employment. Identifiers—ERIC Digests

One of the key challenges facing community colleges in the 1990's is the development of leadership that represents the diversity of students and local constituents. In a 1991 survey of 1,097 community college presidents, only 11% of those surveyed belonged to minority groups. Programs do exist, however, to help minority group members structure their careers and become community college administrators. These programs are offered by universities, such as the Community College Leadership Program at the University of Texas; higher education associations, such as workshops sponsored by the American Association of Community Colleges; and minority higher education organizations, such as the National Council on Black American Affairs. Community colleges seeking to improve minority administrator representation should consider the following recommendations: (1) identify and publicize college goals and timetables for diversity; (2) maintain clear policies and procedures for hiring, awarding tenure, and evaluating; (3) require regular progress reports; (4) enlist the help of consulting organizations that specialize in minority recruitment; (5) advertise openings in minority community publications; (6) give the Equal Employment Opportunity officer sufficient authority; (7) search for administrative candidates

from sources other than the traditional academic pipeline; and (8) encourage minority faculty to participate in administrative activities. Lists of programs and organizations providing professional development opportunities are included. (TGI)

Identifiers—ERIC Digests

Community colleges generally conduct little research. Further, there is no generally accepted national research agenda for community colleges, no consistently funded national agency charged with studying the institutions as unique entities, and few educational researchers directing their attention toward them. The research that is undertaken on community colleges is conducted primarily by university professors and students, state agencies mandated by legislation, the Department of Education, in addition to a few institutional researchers at colleges. The types of research conducted include treatments of the formation and development of the colleges from the viewpoint of history or sociology and large-scale data compilations providing overviews of trends. In addition, the more useful qualitative studies undertaken provide information on the peculiarities of college functioning through participant observation or interview techniques. The lack of a consistent funding base for the routine collection of data on institutional effectiveness and unfamiliarity with assessment are central barriers to community college research. Finally, whatever the source and forms it takes, research on community colleges suffers several limitations stemming from imprecision in the language of the social sciences and from the relationships between researchers and practitioners. Responsibility, Minority Groups, Professional Development, Two Year Colleges

Focusing on the challenge of expanding administrative opportunities for minorities, the 10 essays in this volume explore the problem of underrepresentation of minority administrators at community colleges and suggest strategies for improving diversity. The following articles are provided: (1) "Paradox and Promise: Leadership and the Neglected Minorities," by George B. Vaughan; (2) "From the Projects to the Presidency: An African American Odyssey," by Raymond C. Bowen; (3) "Increasing the Latino Leadership Pipeline: Institutional and Organizational Strategies," by Isaura Santiago Santiago; (4) "The Powers of the Presidency," by Rafael L. Cortada; (5) "The Community College Presidency: An Asian Pacific American Perspective," by M. Jack Fujimoto; (6) "Gateways to Success: Urban Community Colleges and Administrative Diversity," by Gilbert H. Muller; (7) "Affirmative Action as an Equal Opportunity Opportunity," by Donald G. Phelps and Lynn Sullivan Taber; (8) "Professional Development Resources for Minority Administrators," by David R. Pierce, James R. Mahoney, and Arnold M. Kee; (9) "The Unfinished Agenda," by Reginald Wilson; and (10) "Sources and Information: Expanding Opportunities for Minority Administrators," by Jonathan Holub and Elizabeth Foote (BCY)

Descriptors—At Risk Persons, Child Development, Critical Thinking, *Educational Environment, Elementary Secondary Education, Grouping (Instructional Purposes), Interpersonal Competence, Personal Autonomy, *Personality Traits, Problem Solving, Student Evaluation, Student Motivation, *Student Participation, *Teacher Expectations of Students, *Teacher Student Relationship, Teaching Methods

Identifiers—*Caring, ERIC Digests, *Resilience (Personality)

This digest summarizes studies that provide evidence that youth with multiple and severe risks in their lives can develop into confident and competent adults; and discusses the critical role schools can play in this process of development. Resilience is the term used to describe a set of qualities that foster a process of successful adaptation and transformation despite risk. An innate capacity for resilience helps children develop social competence, problem-solving skills, a critical consciousness, autonomy, and a sense of purpose. Research shows that certain characteristics of family, school, and community environments may alter or even reverse expected negative outcomes and enable children to manifest resilience despite risk. These "protective factors" can be grouped into three major categories: (1) caring and supportive relationships; (2) positive and high expectations; and (3) opportunities for meaningful participation. First, the presence of at least one caring person provides support for healthy development and learning, and a caring relationship with a teacher gives youth the motivation for wanting to succeed. Second, research has indicated that schools that establish high expectations for all youth and give them the support necessary to achieve those expectations have high rates of academic success and lower rates of problem behaviors than other schools. Third, practices that provide youth with opportunities for meaningful

involvement and responsibility in the school foster all the traits of resilience. These practices include asking questions that encourage critical thinking, making learning hands-on, and using participatory evaluation strategies. Contains 12 references. (BC)

Descriptors—*Academic Achievement, Cultural Differences, *Early Adolescents, *Females, Parent Child Relationship, Physical Development, Self Concept, *Self Esteem, *Sex Differences, Sex Stereotypes, Teacher Student Relationship

Identifiers—Adolescent Attitudes, ERIC Digests

Results of national studies suggest that for girls, the middle grades can be a time of significant decline in self-esteem and academic achievement. Reasons for this decline are not clearly indicated by research, but it is likely that multiple factors are involved. One factor is the preferential treatment boys receive in the classroom. Out-of-school factors include girls' observations about the different status of men and women in society. A third factor relates to cultural differences in sex role socialization. Researchers have observed other consequences associated with a general loss of self-esteem in preadolescent girls. For example, compared to boys, adolescent girls experience greater stress, are twice as likely to be depressed, and are four times as likely to attempt suicide. Girls' depression has been found to be linked to negative feelings about their bodies and appearance. In order to support and encourage preadolescent girls, parents can: (1) begin early to nurture freedom from stereotyped expectations; (2) inquire regularly about their daughters' participation in school; (3) listen to their daughters' questions and complaints about peers, siblings, and adults; and (4) be aware that girls receive conflicting messages about their worth and place in our culture. Likewise, teachers can find ways to develop gender-fair curricula; encourage girls to enroll and participate in all academic courses; and deal directly with issues of gender. School administrators can develop and enforce policies against gender-related harassment and can ensure that school programs offer equal opportunities to boys and girls. (BC)

Identifiers—ERIC Digests, Middle School Students

From a synthesis of findings culled from a study that examined partnerships of families and communities with middle schools at multiple sites, researchers derived eight "lessons" that can help foster understanding of the nature of family-school

partnerships in the middle grades. Researchers also elaborated implications of these lessons, which are highlighted by examples from specific middle schools. The lessons are: (1) the stakes are high and immediate for everyone in the middle grades, and schools can create programs that respond to the unique needs of middle-grade students and their parents; (2) challenges can become opportunities for parent and family involvement, implying that schools can make available specific educational opportunities geared to the interests of middle-grade families; (3) relationships are the essence of middle-grade family and community involvement, implying that schools can encourage direct contact between middle-grade families and teachers; (4) responsibility and decision making are shared by many individuals, including the child, implying that schools need to include families, teachers, and students in decisions about curriculum and instruction; (5) sustained parent, family, and community involvement depend on active advocacy by leaders, implying that schools need to look for a whole array of community connections and to use creative approaches in defining leadership and solving problems; (6) a system of supports for teachers and school staff is critical to parent and family involvement, implying that schools can provide professional development on promising practices and family involvement programs; (7) families need connections to the curriculum, implying that families need to create an environment that values achievement; and (8) schools need connections to the community, implying that schools need to seek opportunities to invite the community to participate in school activities. Descriptors—*Access to Education, Comparative Analysis, Cross Cultural Studies, Enrollment, *Federal Aid, *Financial Support, Foreign Countries, *Preschool Education, Private Sector, *Public Education

Identifiers—ERIC Digests, France, Italy, *Organisation for Economic Cooperation Development, United States

This digest compares the efforts of the United States and of other member countries of the Organization for Economic Co-operation and Development (OECD) to finance center- and facility-based preschool. In many OECD countries, public preschool is more widely available than in the United States. For example, in France, 100%, and in Italy, approximately 92%, of children age 3 through 5 attend preschool. In the United Kingdom and the Netherlands, all 3- and almost all 4-year-olds, and in Belgium, 95% of 3- to 5-year-olds, attend a public preschool program. Many public preschool programs in OECD countries and some programs in the United States are financed through multiple sources. There are two major differences in the ways this funding is provided. First, most U.S. publicly funded programs are targeted for poor and disabled children, while in other countries all children are included in public preschool. Second, in OECD countries, different funding sources finance different parts of a comprehensive program or target different ages entirely, whereas in U.S. publicly financed programs, most of which target individuals in the same population of poor children, there is greater fragmentation of services and conflicting eligibility requirements. In the United States, the private sector has traditionally been the major supplier of early childhood education and care. Recent research, however, has found that sites operated by public agencies, receiving public funding, or sponsored by employers provided higher quality pro-

grams than sites that were financed only by parent fees. (BC)

Descriptors—*Advertising, Class Activities, Corporate Support, Educational Policy, Elementary Education, *Elementary School Students, Guidelines, Instructional Materials, *Marketing, Partnerships in Education, *School Business Relationship

Identifiers—*Advertisements, *Channel One, Consumers, ERIC Digests, Media Literacy

This digest reviews the recent history of advertising to children, spotlights controversial marketing efforts, and examines the nature of commercial messages directed toward children in public schools. Because of the increase in children's spending power in recent decades, advertisers have closely targeted children as consumers. Advertising strategies aimed at children include toy-related programs or program-length commercials, kids' clubs, store displays directed at children, direct mailing to children, and marketer-sponsored school activities. Advertising in schools takes many forms, one of the most controversial of which has been "Channel One," a 12-minute daily news show for students in grades 6 through 12 that includes 2 minutes of age-appropriate ads. Some educators defend the use of commercially produced materials as a way of providing useful supplements to the curriculum or of raising funds and building bridges to businesses. Other educators oppose it, fearing that market values may replace democratic values in schools, pointing to increased pressure on teachers' and administrators' time, and believing that students comprise a captive audience. One report that stresses students as a captive audience divides in-school commercialism into four categories: (1) in-school ads; (2) ads in classroom materials and programs; (3) corporate-sponsored educational materials and programs; and (4) corporate-sponsored contests and incentives programs. Professional organizations in education have supported the development of guidelines for using commercial messages in schools. Several consumer groups have formulated such guidelines, based on an approach that includes reviewing all sponsored materials, pursuing noncommercial partnerships with businesses, and teaching media literacy to elementary school students. However, in light of the controversial nature of the issue, public discussion and workable policies are needed. (BC)

Descriptors—Art Materials, Class Activities, Classroom Environment, Classroom Techniques, Creative Activities, *Creative Development, *Creative Expression, *Creativity, Early

Childhood Education, Teacher Student Relationship, *Young Children

Identifiers—ERIC Digests, Project Approach (Katz and Chard), Reggio Emilia Approach

This digest considers teacher- and child-initiated strategies for enhancing young children's self-expression and creativity. When teachers think about art and creative activities for children, it is important for them to consider that young children: (1) are developmentally capable of classroom experiences which call for (and practice) higher level thinking skills, including analysis, synthesis, and evaluation; (2) need to express ideas through different expressive avenues and symbolic media; (3) learn through meaningful activities in which different subject areas are integrated; and (4) benefit from in-depth exploration and long-term projects. Given what is known about young children's learning and their competence to express their visions of themselves, classrooms and classroom activities can be modified in several ways to support children's emerging creativity. First, class schedules should provide children with unhurried time to explore. Children should not be artificially rotated from one activity to another. Second, children's work spaces should inspire them. Children's work is fostered by a space that has natural light, harmonious colors, and comfortable work areas. Third, teachers can provide children with wonderful collections of resource materials that might be bought, found, or recycled. Fourth, the classroom atmosphere should reflect the adults' encouragement and acceptance of mistakes, risk-taking, innovation, and uniqueness, along with a certain amount of mess, noise, and freedom. In order to create such a climate, teachers must give themselves permission to try artistic activity. Finally, teachers can provide occasions for intense encounters between children and their inner or outer world. Children's best work involves such encounters. (BC)

Identifiers—*Emergent Literacy, ERIC Digests

In order to provide data to help schools respond to the diversity in the backgrounds and educational needs of children entering school, a U.S. Department of Education study asked parents of 3- to 5-year-old children who had not yet started kindergarten about their children's accomplishments that indicated emerging literacy and numeracy skills and their children's difficulties in physical activity or attention. Results indicated that the percentage of children displaying signs of emerging literacy and small-motor skills increased with age. Developmental difficulties showed small changes across ages. More girls than boys demonstrated literacy and small-motor skills. This gender difference was small, however. Hispanic preschoolers showed fewer signs of emerging literacy, exhibited more difficulties with physical activity or attention, and were in less good general health than white or black children. The study identified five family risk factors: (1) mother has less than a high school education; (2) family is below the poverty line; (3) mother speaks a language other than English as her primary language; (4) mother was unmarried at the time of the child's birth; and (5) only one parent is present in the home. These risk factors, especially low

maternal education and minority language status, were found to be associated with fewer accomplishments and more difficulties in children. Attending Head Start, prekindergarten, or other center-based preschool programs have beneficial effects on emerging literacy and numeracy in four-year-olds from both high- and low-risk family backgrounds. However, preschool attendance does not appear to ameliorate behavioral, speech, or health difficulties of preschoolers. (BC)

Descriptors—*Cognitive Style, Counselors, Cultural Differences, *Cultural Traits, *Elementary School Students, Elementary School Teachers, Elementary Secondary Education, Family Environment, Field Dependence Independence, *Hispanic American Culture, *Hispanic Americans, Mexican Americans, Physical Environment, *Secondary School Students, Secondary School Teachers

Identifiers—Chicanos, ERIC Digests, *Hispanic American Students, Latinos

This digest identifies cultural values that may affect the learning processes of Hispanic-American students, reviews research on the learning styles of Hispanic-American students, and discusses the implications of this research for counseling and teaching Hispanic youth. One cultural value that is of paramount importance in most Hispanic cultures is family commitment. Other values and characteristics suggested by research are a greater inclination among Hispanic than Anglo adolescents to adopt their parents' religious beliefs and lifestyle; stereotyped sex roles; and more and earlier independence among Hispanic male adolescents than male adolescents of the general U.S. population. Several studies have compared students of various ethnic groups in terms of five categories of learning style. These studies suggest that: (1) cool temperatures and formal design are important for Mexican-American students (environmental learning style); (2) Mexican-Americans require a higher degree of structure than other groups (emotional learning style); (3) Mexican-American students prefer solitary learning less than Caucasian students (sociological learning style); (4) Latinos' strongest perceptual strength is kinesthetic (physiological learning style); and (5) Mexican-American students are more field dependent than are non-minority students (psychological learning style). There are several implications of this research for counseling and teaching Hispanic-American students. Schools can provide Spanish-speaking teachers and counselors. Group counseling with peers can be helpful for Hispanic adolescents with identity-related problems. Educators can address self-image problems of Hispanic-American students that may result from a rejection of their ethnicity by using interventions that celebrate cultural diversity. In general, counselors and teacher can be aware that Hispanic-Americans are a diverse group with differing customs and values. They should emphasize the learning style strengths of each individual and match instructional resources and methods to individual learning style preferences. (BC)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Classroom Techniques, Early Childhood Education, Parent Participation, *Portfolio Assessment, Preschool Children, *Student Projects, *Teacher Student Relationship Identifiers—*Project Approach (Katz and Chard), Reggio Emilia Approach

Documentation, in the forms of observation of children and recordkeeping, has long been practiced in many early childhood programs, particularly in the preschools of Reggio Emilia, Italy. Documentation typically includes samples of children's work at several stages of completion; photographs showing work in progress; comments by teachers working with the children; transcriptions of children's discussions; and parents' comments. High-quality documentation of children's work contributes to the quality of early childhood programs in at least six ways. First, documentation enhances children's learning. The processes of preparing and displaying documentations of children's efforts provides a kind of re-visiting of experience during which new understandings are clarified and strengthened. Second, careful and attractive documentary displays convey to children that their efforts are taken seriously. Third, documentation encourages continuous teacher planning and evaluation of work with children. When teachers and children plan together, activities are likely to be undertaken with greater interest and representational skill than when children plan alone or when teachers are unaware of challenges facing the children. Fourth, documentation fosters parent appreciation and participation. Through learning about the work in which their children are engaged, parents may contribute ideas for activities to teachers and their own time in the classroom. Fifth, teacher research and process awareness is fostered by documentation. As teachers examine and document children's work, their understanding of children's development is deepened in ways not likely to occur from inspecting test results. Sixth, children's learning is made visible through documentation, which provides information about children's progress that cannot be obtained from standardized tests. When children are engaged in absorbing and complex projects, documentation can make a contribution in these six ways. (BC)

Descriptors—*American Indian Culture, American Indian History, *American Indians, Books, *Children's Literature, Classroom Techniques, Cultural Awareness, Curriculum Development, Early Childhood Education, *Learning Strategies, Preschool Curriculum, Preschool Teachers, *Stereotypes, Tribes, Young Children

Identifiers—ERIC Digests, *Native Americans, Project Approach (Katz and Chard), Thanksgiving

Noting that the terms "Native American" and "American Indian" are both legitimately used to refer to the indigenous people of North America, this digest identifies stereotypes about Native Americans that children gain from media portrayals and classroom role playing, and suggests strategies for teachers to use to counter stereotyped portrayals and to reflect cultural diversity among Native Americans. Stereotypes are perpetuated by televi-

sion, movies, and children's literature when these media depict Native Americans as uncivilized savages or as romanticized heroes. Many teaching materials and children's books present a generalized image of Native American people with little regard for differences among tribes. In their classrooms, teachers can use specific positive strategies to counter these stereotypes and generalized images. Suggested strategies are to: (1) provide knowledge about contemporary Native Americans; (2) prepare units about specific tribes; (3) use books that show contemporary children of all cultures engaged in their usual daily activities; (4) obtain posters that show Native American children in contemporary contexts; (5) use dolls with different skin colors in the dramatic play area; (6) cook ethnic foods; (7) be specific about which tribes use particular items when discussing cultural artifacts; (8) critique a Thanksgiving poster depicting stereotyped pilgrim and Indian figures; and (9) at Thanksgiving, shift the focus away from reenacting the "First Thanksgiving" to items children can be thankful for in their own lives. Besides engaging in these positive practices, teachers can avoid: using over-generalized books and lesson plans; using a "tourist curriculum" that teaches predominantly through celebrations and holidays; presenting sacred activities in trivial ways; and introducing the topic of Native Americans on Columbus Day or at Thanksgiving. Descriptors—Behavior Change, Change Strategies, Classroom Environment, Classroom Techniques, *Counseling, Elementary Secondary Education, Interpersonal Competence, *Modeling (Psychology), Prosocial Behavior, Social Adjustment, *Socialization, Student Behavior, *Students, Teacher Characteristics, Teacher Expectations of Students, *Teacher Student Relationship, *Teachers

Identifiers—*Authority, Authority Figures, ERIC Digests

Coping with students who display social adjustment problems can be frustrating. However, teachers can take actions toward minimizing classroom conflicts by socializing students into a classroom environment conducive to learning. Modeling prosocial behavior is the most basic element for enhancing student socialization. In situations in which prosocial behavior is difficult for students to learn, modeling may have to be supplemented with instruction in social skills and coping strategies. Consistent projection of positive expectations, attributes, and social labels to students may also have a significant impact on fostering self-esteem and increasing motivation toward exhibiting prosocial behaviors. Teachers, as the authority figure in the classroom, need to be authoritative rather than authoritarian or laissez-faire. Teachers have the right and the responsibility to exert leadership and control, but they increase their chances of success if they are supportive of students and ensure that students understand the reasons behind their demands. Basic socialization and counseling skills may also be helpful when working with individual students who display chronic problems in adjustment. Useful counseling skills and approaches include teachers reassuring students of their continued concern despite provocative behavior; monitoring students closely and intervening nondisruptively if necessary dealing with students' problems in sustained ways; avoiding power struggles; using active listening; insisting that students accept responsibility for their own behavior; and developing relationships with students' parents. Attributes of teachers that

contribute to their success in socializing students include: (1) social attractiveness, based on cheerfulness and sincerity; (2) ego strength, exhibited in self-confidence; (3) realistic perceptions of self and students; (4) ability to be friendly but not overly familiar with students; (5) clarity about teacher roles; (6) patience and determination; (7) acceptance of the individual; and (8) the ability to state and act on firm but flexible limits. Descriptors—*Early Childhood Education, *Education Majors, Electronic Mail, Information Services, Internet, *Learning Activities, Lesson Plans, *Teacher Education, Teacher Educators, *World Wide Web

Identifiers—ERIC Digests, Gopher, *Listserve Discussion Groups, Listservs

This digest provides examples of projects which can be used in the early childhood education (ECE) and child development classrooms to introduce students to Internet resources. The first section of the digest suggests guides that teacher educators can use to design Internet training sessions and to locate resources of interest to adults working with young children. The second section lists several electronic discussion groups (EDGs), or listservs, related to early childhood education and suggests five activities involving discussion groups that students can undertake. First, students need to learn about Internet etiquette. Second, they can monitor the interactions on a single EDG. Third, they can pose questions on specific topics to an EDG. Fourth, they can respond to a question posted to an EDG by a group member after adequately researching the topic. Finally, they can summarize the activity of an EDG by reading messages posted to the EDG's archive. The third section of the digest briefly describes the World Wide Web (WWW) and Gopher resources and outlines four student projects that involve using the WWW. Students can try the following activities: (1) create an information packet consisting of resources they have found on the WWW; (2) search for lesson plans using WWW search engines; (3) solve particular problems they have observed in early childhood settings by searching the ERIC database on the WWW and gathering other relevant resources on the WWW; and (4) be information providers by creating a website containing resources on a particular topic or representing a particular organization such as a local child care center. B: integrating Internet use into early childhood teacher education programs through activities such as these, early childhood teacher educators enhance the educational experiences of their students and prepare them to be active participants in the early childhood community. The primary cause of anxiety for many parents today is protecting their children from acts of violence at school. This brochure discusses what steps parents and school administrators can take to make schools safer. First, the brochure discusses what is being done to ensure children's safety in school, such as teaching prevention skills, providing alternative to gangs, improving school design, and monitoring visitors carefully. The brochure also explains how parents can help their children practice safe behavior: not talking to strangers, observing the safety-in-numbers rule, and choosing friends carefully. Next, the brochure provides suggestions for how parents can help ensure safety in their children's schools, including visiting frequently, becoming members of the school's parent teacher organization, and being acquainted with their children's friends and their families. Finally, the brochure lists organizations parents can contact for additional information. A list of sources related to the brochure is included (HTH)

Descriptors—*Child Development, Child Rearing, Childhood Attitudes, *Community Problems, Early Childhood Education, Elementary Education, *Elementary School Students, Family Environment, Interpersonal Competence, Parent Child Relationship, *Preschool Children, Victims of Crime, *Violence
Identifiers—*Child Safety, ERIC Digests, *Resilience (Personality)

This digest examines the developmental consequences for children who are the victims of or witnesses to family and community violence. A baby's ability to trust depends upon the family's ability to provide consistent caregiving, which is compromised when the infant's family lives in a community wracked by violence. When they reach toddlerhood, children need to practice skills such as jumping and climbing. However, children who live in violence-ridden communities are often confined to indoor quarters that hamper their activities. When they reach the preschool years, young children may not be able to venture outside the family because they are prevented from going out to play. During the school year, community and family violence takes a high toll on children's development. Children whose energies are drained through worry about violence have difficulty learning in school, and the cognitive functioning of children traumatized by violence can be compromised. Children who have been mistreated may have trouble getting along with others, and children whose only role models use physical force to solve problems may be unable to learn nonaggressive ways of social interaction. Children who live with violence may repress feelings, have difficulty seeing themselves in meaningful roles, feel helpless, and regress to an earlier stage of development. Children's ability to cope

with violence is influenced by their temperament and by their parents' abilities to withstand the stresses of poverty and violence. School and day care staff can help children deal with the consequences of violence by offering them alternative perceptions of themselves and teaching them skills for getting along in the world (BC)

Identifiers—Caring, ERIC Digests, *Resilience (Personality)

This digest summarizes studies that provide evidence that youth with multiple and severe risks in their lives can develop into confident and competent adults, and discusses the critical role schools can play in this process of development. Resilience is the term used to describe a set of qualities that foster a process of successful adaptation and transformation despite risk. An innate capacity for resilience helps children develop social competence, problem-solving skills, a critical consciousness, autonomy, and a sense of purpose. Research shows that certain characteristics of family, school, and community environments may alter or even reverse expected negative outcomes and enable children to manifest resilience despite risk. These "protective factors" can be grouped into three major categories: (1) caring and supportive relationships; (2) positive and high expectations; and (3) opportunities for meaningful participation. First, the presence of at least one caring person provides support for healthy development and learning, and a caring relationship with a teacher gives youth the motivation for wanting to succeed. Second, research has indicated that schools that establish high expectations for all youth and give them the support necessary to achieve those expectations have high rates of academic success and lower rates of problem behaviors than other schools. Third, practices that provide youth with opportunities for meaningful involvement and responsibility in the school foster all the traits of resilience. These practices include asking questions that encourage critical thinking, making learning hands-on, and using participatory evaluation strategies. Contains 12 references (BC)

Identifiers—ERIC Digests, *Program Characteristics

To determine effective strategies for involving Hispanic parents in their children's early childhood programs, educators need to develop a greater understanding of the features of the Hispanic culture that influence parents' childrearing practices and orientation toward formal education. Educators should be aware of Hispanics' diversity in terms of socioeconomic status, country of origin, and the nature and timing of their immigration. Except for Cuban-Americans, Hispanics can be characterized as having high rates of poverty and low levels of educational achievement. They are also an educationally vulnerable minority group, starting kindergarten somewhat behind their peers. Educators should note some differences in the way Hispanic and other American children are socialized. First, Hispanic culture tends to emphasize obedience and to value respect for adult authority. A directive style of communication between parent and child is most common, with little collaborative conversation. Second, throughout Hispanic culture there is a belief in the absolute authority of the school and teachers. Third, Hispanics, as a whole, have strong family ties and a collective orientation that supports community life. Addressing these differences, projects in early childhood programs and in schools that have successfully involved Hispanic parents recommend the following strategies: (1) a personal touch that includes personal meetings and home visits; (2) non-judgmental communication; (3) perseverance on the part of teachers in maintaining parents' involvement; (4) bilingual support; (5) administrative support; (6) staff development activities focused on Hispanic culture; and (7) community outreach efforts in which schools and programs serve as resource and referral agencies to support families (BC)

Descriptors—Active Learning, *Class Activities, *Community Study, Democratic Values, Educational Change, *Experiential Learning, Field Trips, *Interdisciplinary Approach, Intermediate Grades, Junior High Schools, Learning Activities, Learning Strategies, *Outdoor Education, Problem Solving, *Student Centered Curriculum

Identifiers—*Problem Based Learning

Outdoor education, a general term describing the use of resources outside the classroom, has long been considered a method to improve student learning. This book aims to create a bridge between current school reform efforts and the field of outdoor

education. Chapter 1 introduces the idea of outdoor education and relates several recent educational innovations to principles of outdoor education and experiential learning. These innovations include service learning, children's museums, constructivism, problem-based learning, technology-based authentic learning, concern for multiple intelligences, and interdisciplinary learning. Chapter 2 makes suggestions for planning outdoor learning, explains the role of the teacher in student-centered learning, and outlines a learning adventure model. Chapter 3 presents 12 outdoor adventures that move instruction into the community. Developed for grades 4-9, these adventures can be adapted to most ages or to nonschool situations or can be a model for teachers to develop their own thematic units. Each adventure contains an organizing problem, background, outcomes, activities, reflection questions, and performance assessments. Themes include observing people at the shopping center, community planning, local pollution problems, starting a democratic society, homesteading, seeing a city block, fast-food fact finding, scouting the school grounds, reading the cemetery "story," down the drain, nature in the city, and creating a nature trail. Appendices contain a brief history of outdoor education and experiential learning, an environmental inventory, bibliographies of related materials, guidelines for creating student-centered learning communities, related organizations, and 15 ways to study a place without a guide. Contains 44 references. (SV)

Mexican Americans, *Outreach Programs, Parent Education, *Parent Participation, *Parent

School Relationship, Partnerships in Education

Identifiers—Barriers to Participation, ERIC Digests, *Hispanic American Students, Parent

Empowerment

This digest examines barriers to parent participation in the education of Mexican American students, and successful programs and strategies for overcoming those barriers. Research has found family participation in education to be twice as predictive of academic achievement as family socioeconomic status. Mexican American parents care about their children's education but may not be involved in it because they believe the roles of home and school are sharply delineated and they respect the teacher's role. Other barriers to parent participation include a negative view of the school system, past negative experiences with education, and language barriers. Schools can open the doors to more parental involvement through culturally sensitive outreach efforts such as bilingual communication between school and home, home visits, informal parent-organized meetings at a neutral community site, and, in general, a personal approach. Examples of successful family programs and activities include an intergenerational literacy program, informal education on family functioning and child development, after-school and summer classes, parenting training, advocacy training, mother-daughter career programs, and empowerment programs. Partnerships between families and schools involve continuous two-way communication and shared responsibility for educational outcomes. The attitudes and practices of teachers and principals make a difference in the amount of parental involvement

and in the achievement of students. Training can help faculty and family members take on the new roles needed for effective partnerships. (SV)

*Employment, *Females, Higher Education, *Mexican American Education, *Mexican

Americans, Mothers, Role Conflict, *Sex Role, Socioeconomic Status, Women's Education

Identifiers—Chicanas, ERIC Digests

This digest examines the interdependence of schooling, work, and family in the lives of Mexican American women. Mexican Americans have lower educational achievement than other Hispanic subgroups and the total U.S. population, although females do somewhat better than males. Hispanic students are overrepresented in classes for special education, English as a Second Language, and bilingual education, and underrepresented in gifted classes. However, Hispanic students' representation in such classes and the nature of their school experiences in general have been shown to be influenced by the relative proportions of ethnic groups in the school, by Hispanics' relative socioeconomic status (SES), and by Hispanic representation on school board and faculty. Since most Mexican American women live in low-SES communities, their school experiences are likely to be negative. Nevertheless, Chicanas have recently shown some improvement in rates of higher education enrollment and completion. In 1993, about half of Mexican American females were in the labor force, located primarily in low-paying jobs with poor or inadequate working conditions and little job security. Mexican American culture does not value women's success in the labor market; working-class women are more likely than professionals to accept such cultural values. Many Chicanas describe high levels of ambivalence and stress over conflicts between motherhood and employment, and inadequate income and cycles of unemployment add to psychological distress. (SV)

Descriptors—Cooperative Learning, Culturally Relevant Education, *Educational Environment, *Educational Strategies, Elementary Secondary Education, *Learning Strategies,

Metacognition, *Migrant Education, Self Concept

Identifiers—ERIC Digests

Children of migrant farmworkers spend parts of each school year in different communities across the country, some children migrate back and forth between schools in Mexico and the United States. The hardships and rich experiences of this lifestyle

provide educators with unique challenges and, at the same time, opportunities to learn and develop new strategies. This digest offers research-based guidance to teachers, to help them use effective instructional strategies that build on the strengths migrant children bring to the classroom. The strategies are: (1) create a positive supportive environment that fosters a sense of safety and trust; (2) build on migrant students' strengths, experiences, and knowledge; (3) enhance self-concept and self-esteem through activities and assignments that allow for real success or that develop coping skills; (4) personalize lessons with students' life experiences; (5) integrate culturally relevant content that encourages positive ethnic affiliation; (6) use cooperative learning, which lowers anxiety levels and increases students' motivation and feelings of empowerment; and (7) develop students' metacognitive learning strategies to help them become independent learners. Contains 20 references. (SV)

Dropouts, *School Community Relationship

Identifiers—*Discontinuity, ERIC Digests

American Indian and Alaska Native (AI/AN) students regularly face obstacles during the transition to high school and have the highest dropout rate of all U.S. racial and ethnic groups. Educational theorists and researchers have various explanations for this high failure rate, each with its own prescriptions. These explanations include: (1) deficit theory focused on presumed "deficits" of individuals and families; (2) organizational theories focused on structure and practices of schools and school systems; (3) critical theory, emphasizing powerful economic and political structures that create winners and losers; (4) sociolinguistics, examining miscommunication between students and teachers from different cultures; and (5) cultural difference theories that focus on teacher adaptations of curriculum and methods to student needs. The idea of cultural discontinuity between home (or community) and school contains elements of the latter two explanations, and suggests that minority group children may have to choose between school and home cultures. School failure may be actively pursued in order to preserve the student's culture of origin. Two case studies contrast the failure of Canadian Sioux students who transferred from a reservation school to a city high school, with the success of Alaska Native students in small village high schools. Addressing discontinuity via culturally relevant curriculum is only a partial solution. Other concerns for AI/AN students are large schools, uncaring or untrained faculty, passive teaching methods, inappropriate testing, student retention, tracking, lack of parental involvement, and high transfer rate between schools. Identifiers—Environmental Awareness, ERIC Digests, Outdoor Leadership

This digest provides a framework for professional development of outdoor educators. Outdoor and environmental educators share similar principles of outdoor learning. Thus, the performance standards recently drafted by the North American Association for Environmental Education (NAAEE) can serve as a useful guide for outdoor education generally. NAAEE-recommended competencies fall into seven categories. First, knowledge and skills are needed in such areas as safety, group management, problem solving, technical equipment, environmental protection, and expedition planning. Second, teacher understanding of basic education foundations, current educational theories, and children's physical and intellectual development is as important for outdoor learning as in the classroom. Third, educators interested in conducting outdoor education experiences regularly would benefit from a grounding in the history and evolution of outdoor education and its methodol-

ogy. Fourth, outdoor educators should have the knowledge and skills needed to awaken in students an environmental sensitivity or appreciation. Fifth, use of a variety of teaching methods to directly involve students in exploring the world around them fosters creativity and critical thinking. Sixth, capable outdoor educators create a safe place for learning that encourages exploration and discovery and provides an open and stimulating environment. Finally, outdoor teachers need skills in assessment practices. (SV)

Identifiers—Meaningful Instruction, "Reflective Inquiry, Reflective Thinking, World Views

The question that ought to be at the heart of the school reform debate is "Why do we have schools?" An answer to this question will drive the sorts of "improvements" that schools attempt. This book proposes that schools exist to help young persons create meaning and discover their own being through development of the mind. The mind is the starting point for personal progress, and its development allows for success in all facets of life. Asserting the strong claim of the mind on the rural school curriculum disavows a popular notion about school purpose—that it ought to be economically centered. Focusing on human development also challenges the currently accepted "technocratic" approach to schooling, which relies on ready-made "one best" solutions devised by experts, manipulative methods, and mechanical techniques. In contrast, a "thoughtful" approach to education aims to create meaning by going beyond the transmission of information. Thoughtful learning involves consideration both for ideas and for other people. Students who engage in thoughtful learning acquire a disposition to be mindful—to weigh evidence, make connections among ideas, understand perspective, find alternatives, and judge value. Ultimately, thoughtful learning results from thoughtful settings brought about by thoughtful teachers and administrators. Although the prospects for widespread institutional change are slim, individual teachers and administrators have the potential to commit themselves to meaning and thoughtfulness and to transform their own school settings. An appendix contains an annotated bibliography of 12 resources on predicative teaching and learning. Contains 79 references. (SV)

This directory provides information on organizations and resources related to rural education. The first section lists 62 national and multistate organizations, including agencies, associations, centers, clearinghouses, and federal programs. Each entry includes address, contact person, telephone number, and a brief profile of organizational activities and services. This section also includes information on federal hotlines and information services. The second section lists 22 journals and periodicals that address rural education or rural studies in general. Each listing includes address, contact person, subscription cost, and information on the focus of articles. The last section lists 151 state and territorial organizations, including associations, education agencies, data centers, and other organizations with rural resources. Entries are listed by state and include address, contact person, telephone number, and a brief profile of organizational activities and services. Includes an index. (LP)

In this conference proceedings the overarching theme of research on teaching and learning mathematics in diverse settings and the subthemes of diversity, constructivism and algebra are achieved in the plenary papers. The plenary papers and authors include "Constructivist, Emergent, and Sociocultural Perspectives in the Context of Developmental Research" (Paul Cobb & Erna Yackel); "Fairness in Dealing: Diversity, Psychology, and Mathematics Education" (Suzanne K. Damarin); and "A Research Base Supporting Long Term Algebra Reform" (James J. Kaput). Included in these Proceedings are 84 research reports, two discussion groups, 40 oral reports and 43 poster presentation entries. The one-page synopses of discussion groups, oral reports and poster presentations are organized by topic along with the research reports. Papers are grouped under the following subject headings: advanced mathematical thinking, algebraic thinking, assessment, cognitive modalities, curriculum reform, epistemology, functions and graphs, geometric thinking, language and mathematics, probability and statistics, problem solving, rational number concepts, research methods, social and cultural factors, student beliefs and attitudes, teacher beliefs and attitudes, teacher change, teacher conceptions of mathematics, teacher education, teacher understanding of student understanding, technology, visualization, and whole numbers. An alphabetical list of addresses of authors is included in the appendix in Volume 2 with page numbers of their report or synopsis. For the first time the electronic mail address is included in this address list (MKR)

Descriptors—American Indians, *Distance Education, Educational Change, Elementary Secondary Education, Integrated Curriculum, Minority Groups, *Multicultural Education, *Rural Schools, Science and Society, *Science Education, Technology

This yearbook of the Association for the Education of Teachers in Science (AETS) is designed to give a perspective on rural science education. It is presented in a sequence which leads from the definition and philosophy of rural science education, to

the status of rural science education, research implications, the integration of science within the science disciplines, integration with mathematics and technology, Science-Technology-Society (STS), distance learning, political implications, Native Americans, and other cultures in rural science education. Chapters include: (1) "What is Rural Education?" (Horn, Jerry); (2) "Status of Science Education in Rural Schools" (Baird, Bill); (3) "Teaching and Learning Science in the Rural Setting" (Matthew, Kathleen); (4) "Rationale for an Integrated Approach to Teaching Science in the Rural School" (Prather, J. Preston); (5) "Blending Science, Mathematics, and Technology in the Rural Classroom" (Ostler, Elliot; and Grandgenett, Neal); (6) "STS in Rural Education" (Wright, Emmett); (7) "Rural Science Education: Water and Waste Issues" (Blunck, Susan; Crandall, Bill; Dunkel, Janet; Jeffries, Curt; Varella, Gary; and Yager, Robert); (8) "Distance Learning for Rural Schools: Distance Learning Defined" (Finson, Kevin; and Dickson, Michael); (9) "Political Ramifications for Rural Science Education in the Twenty-first Century" (Nachugal, Paul); (10) "Science Education for Rural Native Americans" (Otto, Paul, Evans, Wayne; and Champagne, Liana); and (11) "Serving the Needs of Minority Students in Rural Settings" (Wilson, H. C.; and James, Robert). (JRH)

Improving Learning in Science and Basic Skills among Diverse Student Populations.

ERIC Clearinghouse for Science, Mathematics, and Environmental Education, Columbus, Ohio.

Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.

Pub Date—95

Note—75p

Pub Type—Information Analyses - ERIC IAP's (071)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Educational Change, Educational Resources, Elementary Secondary Education, *Hands on Science, Knowledge Base for Teaching, *Language, *Limited English Speaking, Mathematics, *Minority Groups, Multicultural Education, Science Experiments, Science Instruction, Science Process Skills, *Teacher Education

Identifiers—*Diversity (Student), Reform Efforts

This monograph is a rich resource of information designed to strengthen science and basic skills teaching, and improve learning for limited English proficient (LEP) minority student populations. It proposes the use of hands-on science investigations as the driving force for mathematics and English language development. The materials included in this book are based upon the understanding that science and the English language can be effectively learned together, and that teachers of LEP students need not place excessive emphasis upon the first language; although the availability of teachers and aides who have knowledge of LEP students' first language can enhance instruction through its judicious use. Chapters include: (1) "Science and Language Instructional Goals for Limited English Proficient (LEP) Minorities"; (2) "Grades N-6: Science and Language Instruction for LEP Students: The Integrated Activity Learning Sequence (IALS)"; (3) "The Nature of Science Driven Instruction for LEP Students"; and (4) "Supporting Reform in Science Driven Instruction for Diverse Student Populations". Two appendices include resources for science teachers, educators, policy-makers and others for improving science instruction for LEP students and an integrated activity learning sequence in science for grades 9-12. Contains 54 references (JRH)

Spons Agency—Office of Educational Research

and Improvement (ED), Washington, DC

Report No.—EDO-SE-96-3

Pub Date—Mar 96

Note—4p.

Available from—ERIC/CSMEE, 1929 Kenny Road, Columbus, OH 43210-1080.

Pub Type—Information Analyses - ERIC IAP's (071) — ERIC Digests (073)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Computer Simulation. *Computer Uses in Education, Elementary Secondary Education, *Science Instruction, *Student Evaluation

Identifiers—*Alternative Assessment, ERIC Digests

This digest discusses types of computer applications used in science assessment; underlying assumptions that guide their roles in assessment; and issues which relate to validity, gender equity, instructional delivery, mode of user interface, and responsibility to the public. Assessment applications for computers can be broadly classified into two categories: traditional and contemporary. Considering the need for aligning testing with education reform efforts underway, the focus of researchers should be the contemporary rather than traditional approaches to computer-based assessment. Among contemporary computer applications, simulations appear to hold promises for large-scale assessment. Several examples of simulations are given. Contains 17 references. (MKR)

Report No.—EDO-SO-95-5

Pub Date—Sep 95

Note—4p.

Available from—ERIC Clearinghouse for Social Studies/Social Science Education, 2805 East Tenth Street, Suite 120, Indiana University, Bloomington, IN 47408.

Pub Type—Information Analyses - ERIC IAP's (071) — ERIC Digests (073)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Citizenship Education, Civics, *Conflict, *Conflict Resolution, Crime, Decision Making, Delinquency, Elementary Secondary Education, Interpersonal Communication, *Juvenile Justice, *Law Related Education, Problem Solving, Social Control, Social Studies, *Violence, *Youth Problems

Identifiers—ERIC Digests

This digest addresses the topic of increasing violence among and against youth in society. The opening section "What Personal Qualities Are Associated with Reduction of Violence," identifies (1) problem-solving and reasoning skills; (2) social capacities; and (3) a productive sense of purpose, independence, and power. The section "What Can Teachers and Parents Do to Foster Non-Violent Conflict Resolution?" suggests the following actions: (1) Expect children to achieve high standards, (2) Provide meaningful opportunities for participation, (3) Recognize positive accomplishments; and (4) Provide positive role models for children. Also discussed is how law-related education can address the problems of violence by and against youth. Contains 13 references. (EH)

Identifiers—American Bar Association, ERIC

A guide to the vast array of available resources for law-related education (LRE), this annotated bibliography is intended to assist any one concerned with the civic education of youth, especially teachers and other members of the K-12 educational community. It offers information about the law, innovative teaching methods, and guides to national LRE programs. Part 1 presents an annotated bibliography of 43 LRE teaching materials, resource guides, and research documents in Resources in Education. Part 2 provides an annotated bibliography of 50 journal articles in Current Index to Journals in Education. Part 3 has two ERIC digests on LRE. The first is "Mediation in the Schools" by David Keller Trevaskis. The second digest is Robert S. Leming's "Teaching about Landmark Dissents in United States Supreme Court Cases." Part 4 contains the American Bar Association's "Essentials of Law-Related Education: A Guide for Practitioners and Policymakers." Also included are appendices that provide contact information for a network of LRE programs being conducted at both national and state levels and instruction on submitting LRE documents to the ERIC system. Identifiers—European Community, European Unification

This book is intended to provide educators with the means to observe and teach about the unification process in Europe. The book contains a collection of essays about different aspects of unification. The Preface, by Dagmar Kraemer and Manfred Stassen, presents a brief historic overview of the development of the European Union. Chapter 1 is the "History of European Integration" (Wayne C. Thompson). Chapter 2 provides "Historical Perspectives on European Unification" (Michael D. Gordon). Chapter 3 presents "The European Union. Geographic Perspectives on Unification" (Howell C. Lloyd). Chapter 4 describes "The Political Institutions of the European Union" (Richard Gunther). Chapter 5 details "Economic Evolution of the European Union" (Moore McDowell). Chapter 6 depicts "European Political Transformation and the Future

of Europe" (Leon Hurwitz). Chapter 7 provides "The Single European Market and Its Effect on the World" (George M. Vredendeld). Chapter 8 presents "Documents in ERIC on European Unification" (Vickie J. Schlens). Chapter 9 provides "Journal Articles in ERIC on European Unification" (Vickie J. Schlens). Appendices include a "European Unification Glossary"; "World Wide Web Sites of Information on European Unification"; and information about the contributors (EH)

Identifiers—*Japan

This booklet is a selective guide to a larger computer-searchable database of teaching materials on Japan. The materials in the guide consist mainly of lesson plans, teaching guides, resource guides, and units on Japan. Each part contains bibliographic information on resources for teaching about Japan at specific grade levels or subject areas. "Elementary School Materials" include: (1) "The Arts"; (2) "Artifacts"; (3) "Multicultural/Global"; (4) "Multimedia Units"; and (5) "Varied Topics and General Overviews." "Secondary School Materials" contains: (1) "The Arts/Religion"; (2) "Artifacts"; (3) "Economy/Government"; (4) "Geography"; (5) "Multicultural/Global"; (6) "Multimedia Units"; (7) "Varied Topics and General Overviews"; and (8) "War." "Elementary to Secondary Materials" includes: (1) "The Arts/Religion"; (2) "Artifacts"; (3) "Multicultural"; (4) "Multimedia Units"; (5) "Varied Topics and General Overviews"; and (6) "War." The appendix contains information on further resources. (EH)

Community Relationship, Secondary Education, Social Studies
Identifiers—ERIC Digests, *Service Learning

This digest addresses the decline in the willingness of U.S. youth to participate in service to the community or nation and suggests service learning as a possible remedy for the decline. There are long-term benefits of service learning: (1) helping to build community support for education; (2) facilitating a closer bond between school, community, and home; and (3) endowing students with a sense of civic efficacy and the sense that they can have a positive impact on civic affairs. Suggestions on how to structure an effective service learning program are provided. Contains eight references. (EH)

Defining law-related education (LRE) as "education to equip nonlawyers with knowledge and skills pertaining to the law, the legal process, and the legal system, and the fundamental principles and values on which these are based, this Digest outlines four essential elements of LRE. These are: (1) subject matter and concepts; (2) instructional strategies and contexts; (3) skills; and (4) attitudes, beliefs, and values. Together, they provide K-12 students with active learning experiences that enhance their ability to explore rights and responsibilities under the law, confront and resolve disputes, and discuss and analyze public issues. The digest contains a five-item bibliography. (LH)

Descriptors—Citizenship Education, Foreign Countries, Higher Education, International Education, Social Studies

Identifiers—ERIC Digests, Europe (East)

Many totalitarian communist states throughout the world have broken up during the 1990's, and citizens in those countries, from Central and South American to Central and Eastern Europe, are working to build constitutional democracies out of the rubble. Part of creating these new governments is devising new school curricula to include civic education—which addresses civic knowledge, civic skills, and civic virtues—and to teach young citizens the theory and practice of constitutional democracy. The objectives of civic education are: (1) to teach basic ideas thoroughly so that students can discern between an authentic constitutional democracy and a bogus one; (2) to develop intellectual participatory skills so students can, as citizens, think and act on behalf of their rights and the common good; and (3) to nurture civic virtues such as self-discipline, civility, compassion, tolerance, and respect. Effective democratic teachers must develop lessons and activities for students that emphasize and combine these three elements of civic education in a classroom environment that promotes the theory and practice of constitutional democracy and liberty. The democratic teacher must challenge students to take responsibility for achieving educational objectives, foster academic freedom by encouraging and protecting free and open expression of ideas, establish and apply rules fairly, and create a respectful atmosphere. The digest includes a 17-item bibliography. (LP)

Descriptors—*Art Criticism, *Art Education, Critical Viewing, Discipline Based Art Education, Elementary Secondary Education, Visual Arts

This collection of lessons is meant to be a practical guide to help teachers engage children in art criticism. The lessons generally follow a similar format. Most suggest an age group but may be modified for use with younger or older students. Several authors suggest variations and extensions for lessons that include studio activities. A broad range of topics is embraced including popular art, the built and natural environment, multicultural concerns, and formalist and political contemporary museum art. Most of the lessons stress contemporary artifacts. Lessons include: (1) "Creating a Climate for Talking about Art" (Sandra Kay Mims); (2) "A Potpourri of Questions for Criticizing Realistic Paintings" (Karen A. Hamblen); (3) "Constructing Meaning: A Gaming Strategy" (Richard A. Ciganko); (4) "Investigating Criteria for Judgments" (Sally Hagaman; Polly Wolfe); (5) "Collaborative Art Criticism: Not Mine, Not His, Not Hers—But Our Critique!" (Herb Perry); (6) "Criticizing Modern Paintings" (George Geahigan; Verna Yoder); (7) "Interpreting Snake Bird: A Critical Strategy" (Tom Anderson); (8) "Criticizing Advertising: Women, Ads, and Art" (Elizabeth Garber, Roy Pearson); (9) "Criticizing Television: Aesthetic and Cultural Approaches to TV Images" (Rogena M. Degge; Carolyn A. Cochran); (10) "Experiencing Environments: Criticizing Architecture" (Linda F. Ettinger); (11) "A Place-Based Framework for Criticizing Art" (Doug Blandy; Elizabeth Hoffman); (12) "Baskets: Containers of Culture" (Lorrie Blair); (13) "Interpreting Among Storycloths" (Krisun G. Congdon); (14) "Interpreting Paintings Metaphorically: Edward Hopper's House by the Railroad" (Hermine Feinstein); (15) "Interpreting Your World Through Romare Bearden's Windows" (William F. Hams); (16) "Understanding Graffiti Art: Keith Haring's Subway Drawings" (Sydney Walker; Jennifer Cross); (17) "Understanding Conceptual Art: Christo's Wrappings" (Carole W. Arnold; Robert L. Arnold); (18) "Maximizing Minimalism: Connecting with the Art of Anne Truitt" (Renee Sandell; Stacy Bell; Monica McHugh; Charles Wehr); (19) "Criticizing Criticism: Competing Judgments of Leon Golub's Paintings" (Sun-Young Lee); (20) "The Critic as Empathetic Other" (Cynthia Taylor); and (21) "Amy's Crits" (Amy Snider). The anthology concludes with a selection of "Related Resources in the ERIC Database." (MM)

Descriptors—Cultural Education, Family History, Folk Culture, Inquiry, *Interviews, *Local History, Modern History, *Oral History, *Oral Tradition, *Primary Sources, Secondary Educa-

tion. *Social History. Surveys. United States History

Identifiers—ERIC Digests

This digest addresses the uses of oral history projects in the secondary U.S. history classroom. The document advocates that oral history is a stimulating classroom process designed to increase student involvement in a United States history class and improve student understanding of a relatively recent historical period. Oral history also involves students directly in a method of historical inquiry, which includes the organization and presentation of data acquired directly from another person. Suggestions are given for topic selection, interviewing techniques, and timeline development. (EH)

Descriptors—Active Learning, *Aesthetics, Art, Art Activities, Art Appreciation, *Art Criticism, *Art Education, *Art History, *Discipline Based Art Education, Elementary Secondary Education, Humanities, Integrated Activities, Integrated Curriculum, *Social Studies, Thematic Approach

Identifiers—ERIC Digests

This digest discusses the symbiotic relationship between art and social studies and suggests ways to integrate the two in the curriculum. The document advocates the study of art in context as a way to help students better understand the historical past by the values reflected in artwork, as well as recognize the power and potential of art for shaping contemporary attitudes and values. Discipline-based art education is compared with social studies concerns and parallels are drawn with art history, art criticism, art

production, and aesthetics. Suggestions are given for integrating art and social studies, striving for balance that does not reduce one to the subservience of the other. Thematic, integrated, and multi-disciplinary instructional designs can cluster learning, make connections among activities, discover relationships among things, and encourage mastery of subject matter. Descriptors—*African Culture, *African History, *African Studies, Cross Cultural Studies, Foreign Countries, Foreign Culture, Middle Eastern Studies, *Multicultural Education, Non Western Civilization, Secondary Education, Social Studies

Identifiers—*Africa. ERIC Digests

This digest offers practical suggestions for inclusion of teaching about Africa in the curriculum. The document highlights four suggestions that teachers must: (1) confront myths and stereotypes about Africa; (2) avoid faulty generalizations; (3) present a balanced view of the countries on the continent; and (4) limit the scope of study due to Africa's enormous size and diversity. Integration of African topics into the curriculum is advocated with specific examples given for social studies, language arts, French language classes, art, and music. Five types of resources for teaching about Africa are identified: (1) Internet resources; (2) bibliographies; (3) museums; (4) Peace Corps; and (5) teachers' travel experiences. (EH)

Identifiers—*Poland

This book provides a reflective analysis of the effort since 1991 of a group of Polish and U.S. educators to develop civic education programs for schools and teachers in Poland. The book contains 13 chapters and three appendices. Chapters include: (1) "Principles of Democracy for the Education of Citizens in Former Communist Countries of Central and Eastern Europe" (John J. Patrick); (2) "Essential Economics for Civic Education in Former Communist Countries of Central and Eastern Europe" (Steven L. Miller); (3) "Poland After the Democratic Revolution: Challenges for Civic Education" (Marta Zahorska-Bugaj); (4) "Education for Democratic Citizenship in Poland: Activities and Assumptions" (Richard C. Remy; Jacek Strzemieczny); (5) "The Curriculum Seminar: A Strategy for Developing Instructional Materials" (Richard C. Remy); (6) "Establishing Polish Centers for Civic and Economic Education" (Phillip J. VanFossen; Jacek Kowalski; Richard C. Remy); (7) "A Teacher Education Course: The School in Democratic Society" (Barbara Malak-Minkiewicz); (8) "The Role of Cross-Cultural Experience in Developing a Teacher Education Course" (Gregory E. Hamot); (9) "Support for Democracy and a Market Economy Among Polish Students, Teachers, and Parents" (Kazimierz M. Slomczynski; Goldie Shabad); (10) "Reflections on the Education for Democratic Citizenship in Poland Project: An American's Perspective" (Sandra Stotsky); (11) "Polish and American Collaboration Through EDCP: Accomplishments from the Polish Perspective" (Jacek Strzemieczny); (12) "Toward Constitutional Democracy in Central and Eastern Europe" (A. E. Dick Howard); and (13) "The Future of Democracy" (Charles F. Bahmueler). Appendixes include a list of EDCP (Education for Democratic Citizenship in Poland) Publications, a list of documents related to EDCP, and an overview of the education system in Poland. Contains a list of ERIC resources and information on contributors. (HE)

Descriptors—*Conflict Resolution, Demonstration Programs, Educational Needs, Elementary Secondary Education, Higher Education, *Inservice Teacher Education, Instructional Materials, *Preservice Teacher Education, Training Methods

Identifiers—ERIC Digests

Conflict resolution refers generally to strategies that enable students to handle conflicts peacefully and cooperatively outside the traditional disciplinary procedures. This digest discusses several approaches, both inservice and preservice, to preparing teachers to play a role in conflict resolution within schools and identifies problematic issues related to this preparation such as principal's leadership, targeted follow-up support to teachers, the fit (or lack of it) between program demands and resources, and the need for systemic, school-wide change versus individual classroom change. Although educators primarily learn about conflict resolution on their own or through staff development programs, this paper encourages substantial training. The inclusion of conflict resolution curricula within preservice and graduate education programs has found its way into schools and departments of education in a variety of ways. For example, the National Association for Mediation in Education (NAME) and the National Institute for Dispute Resolution (NIDR) initiated the Conflict Resolution in Teacher Education Project in 1993. That project brought 11 colleges and universities together in a pilot program with experts in prejudice reduction, conflict resolution, multiculturalism, and teacher education. Two resources for additional information are listed. (Contains 20 references.) (LL)

Descriptors—*Behavioral Objectives, *Comprehensive School Health Education, Curriculum Design, *Educational Practices, *Educational Principles, Elementary Secondary Education, Health Education, Health Promotion, Preservice Teacher Education, Teacher Education

Identifiers—Centers for Disease Control GA, ERIC Digests, *National Standards

The Centers for Disease Control and Prevention (CDC) find that most major health problems in the United States today are caused by six categories of behavior. Comprehensive school health education programs represent one effective way of providing students with the knowledge and skills to prevent health-improving behaviors. The purpose of this Digest is to assist schools in developing and evaluating comprehensive health education and to lay a framework for local school boards to use in determining the content of health curricula in their communities. This digest provides a discussion of

(1) research on the ability of health instruction to change children's health status; (2) broad standards that promote health literacy developed by the Joint Committee for National School Health Education Standards (1995), emphasizing the capacity of individuals to obtain, interpret, and understand basic health information and services and the competence to use such information and services in ways which enhance health; (3) health curriculum content; (4) teaching practices that develop health knowledge, attitudes, and skills; and (5) implications for teacher education. Sources of additional information on health curricula are included. (Contains 11 references.) (LL)

Identifiers—ERIC Digests

This digest examines the relationship between elementary and secondary teachers' use of computer-based technologies to deliver and support classroom instruction and the training provided to prospective teachers by teacher education institutions. It offers an overview of obstacles faced by teacher educators in providing appropriate technology instruction and outlines approaches to addressing these obstacles. Teachers are under pressure to acquire skills in instructional technology, particularly computer-based technologies. Although the number of computers in K-12 classrooms has increased dramatically over the last decade, certain barriers prevent the majority of teachers from fully exploiting computer capabilities in the classroom. Among these barriers is lack of training. Improving preservice preparation will require changing current practices and programs to provide: (1) teacher educators who model appropriate instructional use of computers; (2) integration of technology across the preservice curriculum; and (3) exposure to and practice with newer, more sophisticated computer-based tools. Within the teacher education community, efforts to overcome obstacles found in schools, colleges, and departments of education appear to fall into two major categories: (1) capacity building; and (2) developing models and materials. Brief descriptions of examples from each category are given. (Contains 17 references.) (IAH)

er Education, *Internet, *Physical Education, Recreation, Teacher Education

Identifiers—ERIC Digests, *World Wide Web

While the overall effect of the impact of technology on health, physical education, recreation, and dance education (HPERD) in the areas of research, classroom, teaching, and distance education is not yet fully assessable, the presence of technology in so many different aspects of the profession makes it important to more clearly recognize and appreciate its current and potential role. This digest, organized into two sections, focuses on computer-based technology as it relates to HPERD in the areas of teaching and distance education. The first section, "Classroom Utilization of Technology," discusses specialized software, multimedia and CD-ROM, computer-assisted instruction (CAI), Internet/World Wide Web, local area networks (LANs), and computers and satellites. The second section, "Next Steps for Incorporating Technology in Instruction" recommends that HPERD professionals perform an inventory of training, hardware, and software available within their own organizations; find a "techno-buddy" within the organization; and welcome students' willingness to demonstrate what they know about and what they can do with technology. Nine selected World Wide Web URLs (addresses) are included. (LL)

Descriptors—Elementary Secondary Education, Higher Education, *Minority Group Children, *Minority Group Teachers, Public Education, Public School Teachers, *Racial Composition, Statistical Inference, Teacher Education Programs, *Teacher Recruitment, *Teacher Shortage, *Teacher Supply and Demand

Identifiers—ERIC Digests, *People of Color

This digest focuses on the data that show significant disparities between the number of teachers of color and the number of students of color and examines how well schools, colleges, and departments of education are doing in supplying teachers of color for U.S. classrooms. The document is organized into three sections. The first section discusses whether there is an increasing demand for teachers of color, and indicates the need becomes evident when one looks at how student enrollment patterns in public elementary and secondary schools have altered the makeup of the classroom. Section two addresses reasons for the decreasing supply of teachers of color including the effects of competency testing and increased opportunities in other professional fields. Although more teachers of color are completing education degrees than in previous times, the numbers are not keeping pace with the demographic changes in K-12 enrollments. The final section asks what can be done and outlines four Cs of recruitment: (1) concern for the various aspects of the issue and a readiness to tackle them; (2) commitment by key leadership to the recruitment program; (3) collaboration among all those concerned; and (4) creativity in developing a program. (Contains 16 references.) (LL)

Descriptors—Classroom Techniques, Community Resources, Cooperative Learning, Educational Resources, Educational Strategies, Elementary Secondary Education, Global Education, Internet, Learning Activities, Resource Materials, Teaching Methods, World Wide Web

Identifiers—ERIC Digests

This Digest draws on current practices in global education to provide teachers with practical suggestions regarding instructional and technological resources as well as the use of cooperative learning approaches. Readily accessible instructional resources for teaching global education include: (1) local communities, e.g., volunteer organizations, businesses, and churches; (2) cross-cultural experiences of teachers and colleagues; (3) students with cross-cultural experiences; (4) field trips to local sites that demonstrate community and regional global historic connections; and (5) sites available on the Internet (some are suggested). Through cooperative learning activities, teachers meet the needs of diverse students and prepare all students for successful global cooperation and competition. Suggestions to consider when using cooperative learning strategies include: leading discussions on the need to work in heterogeneous groups; providing students with team-building activities; maximizing heterogeneity; grading students individually; having students complete peer reviews of cooperative effort; and providing achievement targets and times in the assignment directions. Descriptors—Beginning Teachers, Educational Practices, Elementary Secondary Education, In-service Teacher Education, Mentors, Policy Formation, Preservice Teacher Education, Professional Development Schools, Research Needs, Teacher Persistence

Identifiers—ERIC Digests, Preservice Teachers, Protege Mentor Relationship, Reform Efforts

This digest examines the spread of mentoring in the United States, obstacles to realizing the potential of mentoring as a vehicle of reform, needed research, and selected issues of policy and practice. While the education community understands that mentors have a positive effect on teacher retention, the question of what mentors should do, what they actually do, and what novices learn as a result of mentoring remains open. For example, the culture of teaching encourages autonomy and noninterference; therefore, mentor teachers have little experience with the core activities of mentoring, such as observing and discussing teaching with colleagues. If novices are to learn the ways of thinking and acting associated with new kinds of teaching, they must be placed with mentors who are already reformers in their schools or classrooms and develop collaborative contexts. To inform mentoring policy and practice, comprehensive, empirical research is needed, including studies of mentoring and its effects on teaching and teacher retention, how mentors learn to work with novices in productive ways, what structures and resources facilitate that work, and how mentoring fits into broader

frameworks of professional development and accountability. (Contains nine references.) (LL)

Identifiers—ERIC, ERIC Digests, Fugitive Literature, Listservs

Since professional development schools (PDSs) emerged in the mid-1980s as a promising approach to improving teacher education and P-12 schooling, information about these institutions has become more abundant and more accessible. Four primary sources of PDS information are discussed in this digest: the ERIC database, electronic resources, fugitive literature, and information centers. The discussion of ERIC resources suggests productive database search strategies. In an overview of electronic resources, contact information is given for several PDS-related listservs and world wide web sites. The digest offers guidelines for tapping fugitive literature and identifies seven organizations and projects that collect, generate, or disseminate information about professional development schools. Descriptors—Culture Fair Tests, Distractors (Tests), Educational Assessment, Item Bias, Measurement Techniques, Multiple Choice Tests, Scoring, Statistical Analysis, Stereotypes, Test Construction, Test Items, Test Theory

Identifiers—ERIC Digests, Item Writing

This digest describes some basics of the construction of multiple-choice tests. As a rule, the test maker should strive for test item stems (introductory questions or incomplete statements at the beginning of each item that are followed by the options) that are clear and parsimonious, answers that are unequivocal and chosen by the students who do best on the test, and distractors that are plausible competitors for the item as evidenced by the frequency with which they are chosen. It is very important that items be developed over time in light of the evidence that can be obtained from the statistical output of a measurement services office and

from expert editorial review. Planning the general test outline is followed by writing item stems that identify the point to be tested and state the question in clear terms that do not lead to stereotyped answers. Negatives in the stem and irrelevant clues should be avoided. Writing the answer options calls for the same attention to clarity. Some specifics for option design and placement are provided. (Contains 4 references.) (SLD)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Item Analysis, Item Banks, Measurement Techniques, Multiple Choice Tests, Psychometrics, Scoring, Test Construction, Test Items

Identifiers—ERIC Digests, Item Discrimination (Tests), Item Writing

This digest presents a list of recommendations for writing multiple-choice test items, based on psychometrics statistics are typically provided by a measurement, or test scoring, service, where tests are machine-scored or by testing software packages. Test makers can capitalize on the fact that "bad" items can be differentiated from "good" items psychometrically. Tests can be improved by maintaining a pool of "good" items from which future tests can be drawn. Once test items are identified as being appropriately written, the extent to which they discriminate among students must be determined. The degree to which they do discriminate is the basic measure of item quality for almost all multiple-choice items. Statistics usually provided by a test scoring service provide the information needed overlapping distractors. (Contains 8 references.) (SLD) Specific suggestions are given for readjusting recorded items to develop an item pool with specific content areas that can be used to construct homogeneous tests for a unified content area. (Contains 4 references.) (SLD)

Descriptors—Culture Fair Tests, Distractors (Tests), Educational Assessment, Item Bias, Measurement Techniques, Multiple Choice Tests, Psychometrics, Scoring, Statistical

Analysis. Stereotypes. *Test Construction. Test Items. Test Theory
Identifiers—ERIC Digests. *Item Writing

This digest presents a list of recommendations for writing multiple-choice test items, based on psychometrics and logical deduction. Questions should ask more than mere knowledge of facts and should not contain superfluous information as an introduction to the question. Each question should focus on some specific aspect of the course, and the item stem should not provide clues to the answer. Varying the number of options is desirable, as is avoiding negative options after a negative stem. While "all of the above" options should be avoided, "none of the above" options may make an item more discriminating. Superfluous information, specific determiners, and wording from the item stem should not be included in options. Test makers should avoid: (1) typographical errors; (2) grammatical inconsistency; and (3) overlapping distractors. (Contains eight references.) (SLD)

Descriptors—*Academic Achievement, Elementary Secondary Education, *Grades (Scholastic), *Grading, Scores, *Scoring, *Student Evaluation

Identifiers—Composite Scores, *Standardized Scores, T Values, Variability, *Z Scores

Third Digest addresses several aspects of assigning grades, beginning with a discussion of the variability of test scores, and reviewing the use of standardized scores, ideas on assigning letter grades, and recommendations for grading. An important characteristic of grades as initially recorded, the variability of the scores of each test or assignment, is seldom questioned. The best approach to dealing with variability is to record and average standardized test scores. To calculate standardized scores, it is necessary to know the standard deviation of the scores prior to standardization. Deriving the standard score, commonly called a z-score, is explained, as is transforming z-scores into T-scores for convenient calculation. If T-scores are computed for every test, averaging them will provide a composite score from which the influence of the variability of the scores has been eliminated. The distribution of T-scores should be inspected in assigning letter grades, but the assignment across a range of average scores is essentially an arbitrary matter of professional judgement. Some specific recommendations are made for passing scores and grading. (Contains 5 references.) (SLD)

Descriptors—College Faculty, *College Students, Data Collection, *Decision Making, Higher Education, *Instructional Improvement, *Student Evaluation of Teacher Performance, *Teacher Effectiveness, *Validity

Identifiers—ERIC Digests

Student ratings of instruction are widely used as a basis for personnel decisions and faculty development recommendations. This digest discusses concerns about the validity of student ratings and presents a case for their use in teacher evaluation. There are several strong arguments for using student ratings to evaluate teachers. Students are in a unique position to rate their own increased knowledge and comprehension, and they are able to rate aspects of instructor competence and attitude. Nine possible lines of argument for the validity of student ratings are summarized, but it is noted that student ratings become invalid if the rating form used is not appropriate for the data collection required. Several points in form design are described, and errors to be avoided are noted. Student ratings must be considered carefully in the context in which they are given, and they cannot be the only source for teacher evaluation. (Contains 4 references.) (SLD)

Descriptors—Cultural Differences, *Culture Fair Tests, Ethnicity, *Evaluation Methods, *Item Bias, Religious Cultural Groups, Sex Differences, *Stereotypes, Test Construction, Test Format, *Test Items

Identifiers—ERIC Digests, Item Bias Detection, *Subgroups

This digest introduces three issues to consider when evaluating test items for bias: fairness, bias, and stereotyping. In any bias investigation, the first step is to identify the subgroups of interest. Bias reviews and studies generally focus on differential performance for sex, ethnic, cultural, and religious groups. In preparing an item bias review form, it is necessary to examine fairness to these groups and statistically determined bias. Sample questions are given for determining the fairness of an item. There are different types of bias, and these should be considered in preparing a review form. Sample questions for examining bias include questions of content bias, language bias, and item structure and format bias. Stereotyping and inadequate or unfavorable representation of designated subgroups of interest are undesirable properties of tests to which judges must be sensitive. (Contains 10 references.) (SLD)

Descriptors—Adults, Dropouts, *Employment Opportunities, *Ethnic Groups, High School Equivalency Programs, *High School Graduates, High Schools, Income, *Minority Groups, National Surveys, Outcomes of Education, Program Effectiveness, *Racial Differences, *Vocational Education, Wages

Identifiers—ERIC Digests, Job Training Partnership Act 1982, National Adult Literacy Survey (NCS), Workplace Literacy

This digest analyzes information from two recently completed national surveys to determine the extent to which various vocational education programs improve employment opportunities in the United States. The impact of a General Educational Development (GED) certificate on workers' wages is also analyzed. Data are from the 1992 National Adult Literacy Survey (NALS) and the 1991 Workplace Literacy Assessment Survey. NALS sampled 14,900 persons aged 16 and older, with oversampling of African Americans and Hispanic Americans. The Workplace Literacy survey profiled and assessed approximately 8,000 persons enrolled in Job Training Partnership Act programs. Graduates of high schools with a vocational focus generally earn substantially less than persons who attend high schools with a college preparatory or general academic focus. The lower earnings of these graduates have a disproportionate effect on the earning of minority populations, since minorities are overrepresented in vocational education. Survey results indicate that dropouts who obtain a GED generally have higher wages than dropouts who do not. (Contains 4 references.) (SLD)

Identifiers—ERIC Digests

Researchers at the Policy Information Center of the Educational Testing Service (ETS) have analyzed information from the National Center for Education Statistics; data from state, city, and other sources, and results from recent surveys of high school students to present a summary of the current dropout situation. The 1995 ETS report, "Dreams Deferred: High School Dropouts in the United

UD

States," which has a special focus on urban youth, is summarized in this digest. Although calculating an accurate dropout rate is nearly impossible because of differences in counting methods and definitions and student mobility, the dropout rate appears to be declining. In 1993 about 381,000 students left school without graduating. Nearly two-thirds dropped out before the 10th grade. The dropout rate in large cities remains high, although it too has decreased slightly in recent years. With respect to lifetime wages, the gap between dropouts and more educated adults is widening steadily. Student survey responses have indicated that dropouts tend to have many characteristics in common and that they express a variety of reasons for dropping out. Most dropouts surveyed recognized that they needed further education, and they expected to acquire it, although their expectations suggested that they did not believe they were sacrificing their futures by dropping out. Descriptors—*Access to Education, Ancillary School Services, Criteria, Curriculum, Disadvantaged Youth, Educational Change, *Educational Environment, Elementary Secondary Education, *Equal Education, *Evaluation Methods, Financial Support, Minority Groups, Resource Allocation, *Standards, Time Factors (Learning), *Urban Education

Identifiers—ERIC Digests, Hawkins Stafford Act 1988, *Opportunity to Learn

The concept of "opportunity to learn" (OTL) strategies was first introduced several decades ago and was defined by a narrow set of instructional components. Since then, many additional criteria have been incorporated into the OTL concept, some specifically to ensure an equal education for disadvantaged and minority students. The original purpose of OTL measures was simply to describe aspects of the education process. Since then, they have been used to indicate overall educational quality and the availability and use of educational resources. The Hawkins-Stafford Education Amendments of 1988 mandated the development of OTL indicators to measure the effectiveness of federally-funded educational programs. Evaluating a school's OTL can provide information about whether the school has adequate resources, uses them effectively, and provides equal educational access. Although school reform programs vary in their commitment to OTL standards, OTL strategies can be implemented fairly easily in the following areas: (1) access to courses; (2) curriculum; (3) time factors; (4) teacher competence; (5) school resources; (6) school environment and culture; and (7) ancillary services. Descriptors—*Ability Grouping, Academic Achievement, *Cooperative Learning, Disadvantaged Youth, Educational Change, *Educational Experience, Elementary Secondary Education, *Heterogeneous Grouping, *Small Group Instruction, Thinking Skills, *Track System (Education), Vocational Education

Identifiers—ERIC Digests

Critics suggest that ability grouping all too often limits the instructional experience of lower-track students and that students placed in low tracks at a young age may never be transferred to upper tracks where higher-order skills are typically taught. As a result of this growing criticism, schools are increasingly eliminating ability grouping. Numerous alternatives to tracking have been proposed. Perhaps the most common model for detracking schools is cooperative learning, which is typically thought of as a form of heterogeneous grouping. Some schools divide a heterogeneously grouped classroom into smaller groups for reading and mathematics instruction. Other schools have allowed students to sort themselves according to their own interests. Still other schools have merged academic and vocational tracks into a single integrated program. While more research is needed on the specific effects of these efforts to detrack schools, it is evident that changes are being considered in many schools. (Contains 15 references.) (SLD)

Descriptors—*Disadvantaged Youth, *Educational Change, Educational Facilities Design, Educational Research, Elementary Secondary Education, *Enrollment, School Restructuring, *School Size, *Small Schools, Student Attitudes, *Urban Schools

Identifiers—*Downsizing, ERIC Digests

This digest briefly reviews the current movement to downsize urban schools, to help educators decide whether and why to pursue such a move, and to indicate which models appear most promising. Research evidence is strong that small schools benefit the entire school community. Small schools are particularly beneficial for disadvantaged youth, who profit from the extra attention and sense of belonging promoted in a small school. Putting several small schools into an existing large-school building can rejuvenate the building and enhance educational possibilities. The founding principles of small urban schools are: (1) cohesion, (2) autonomy, (3) focus or theme, and (4) a constituency assembled on the basis of shared interests. There are many difficulties in implementing small urban schools, but many more are being planned. They combine features currently being recommended by educational researchers as important in transforming schools. (Contains 10 references.) (SLD)

Several studies recently conducted by the Federal government and private organizations have produced new information about dropouts. Findings from these studies are summarized so that parents can have up-to-date information when talking to their children about dropping out. Urban and minority students are more likely to drop out of school. The gap between dropouts and more educated people is widening as more of these students drop out. Returning to school for a General Educational Development (GED) certificate can reduce this gap. Statistics show that men who return for a GED earn 21% more than dropouts; women GED holders earn 18% more. Dropouts describe their personal and social lives as being very difficult before they dropped out, and often express these difficulties and a dislike for school as reasons for dropping out. Many felt that the adults in their lives did not help them stay in school. Parents, recognizing this fact, can make an effort to keep their children in school by arranging extra academic help when needed, helping them with personal problems, helping them schedule their obligations to be able to stay in school, and helping them understand what the consequences of their actions will be. If all efforts fail, parents can help young people find a GED program and encourage them to stay with it for an alternative diploma. (SLD)

Descriptors—Computer Uses in Education, Cultural Awareness, Curriculum, Elementary Secondary Education, *English, Group Instruction, Integrated Activities, *Interdisciplinary Approach, *Limited English Speaking, Mathematics, *Mathematics Instruction, *Parent Role, Preschool Education, *Science Instruction, Sciences, Teaching Methods

In the past, students who knew only a little English (called limited English proficient, or LEP), were usually taught only low-level science and mathematics. Now, new science and mathematics teaching methods can help LEP students get a good education in both fields. This guide will help parents know if their children are learning as much as possible. A preschool curriculum should make connections between the children's present lives and

the lives of their ancestors and should draw on experience with plants and animals and nutrition and health instruction. Elementary and high school science lets students see and feel the meaning of the words instead of just hearing descriptions. Science taught to LEP students should be the same as that taught to others, and examples from the students' cultures should be used to make science learning easier. Use of common themes and cultural awareness can make improving English an accompaniment to science instruction. Group work, the application of mathematics, and the use of computers can all help an integrated program that teaches students science, mathematics, and English together. (SLD)

Identifiers—*Avoidance Behavior, Compromise, *Respect

Children should be taught as early as possible how to handle disagreements with each other without letting their anger get out of control. As they get older, they should be helped to apply the conflict-solving methods they learned as children to the more complicated problems that appear in adolescence. Children's attitudes are influenced by all the adults in their lives, but what they learn at home is especially important because their families are their first role models. Parents should examine their own attitudes to make sure that they do not lead their children to think it is acceptable to be violent. The best thing parents can do is to teach their children to be nonviolent by example. Children should be helped to learn methods to control personal anger and to think beforehand of the consequences of their actions. Respect for others; rejection of racial, social, religious, and sexual bias; and willingness to compromise contribute to nonviolent resolution of conflicts. (SLD)

Effectiveness, Recreational Activities, *Training, *Violence, *Youth Programs
Identifiers—*Mediation, Multidimensional Approach

Although learning the value of being nonviolent at home is very important, school and community programs are also valuable, because participants can work together to prevent violence in their neighborhoods and can help each other avoid violence. Education programs can include conflict resolution and mediation training as school courses. Crime prevention and law-related education help young people reduce their chances of becoming victims of crime or perpetrators themselves. Programs to teach youth about the dangers of guns and gun safety are new, and little research has demonstrated their effectiveness, but it is probable that such programs are useful. Life skills training also can help young people learn how to avoid conflict. Recreation programs by themselves are not enough to prevent youth violence, but they can help control tensions in the community and be a valuable addition to education programs. Even though many violence prevention strategies are effective alone, their value is greater when they are combined. Multi-intervention programs add to education and recreation programs in addressing youth violence. (SLD)

Using a computer should be an important part of children's education. Some guidelines are provided to help parents evaluate the value of computer use in their children's school. School policies should provide for a well-equipped laboratory, a variety of appropriate software, and a way for students to network with other students. All students, regardless of gender, should use the computers, and teachers should be knowledgeable. In addition, students should be using technology to increase problem-solving skills and to learn important life skills through simulated computer software. Cooperative learning should be part of school computer use, and teachers and students should work together at the computer. It is also important that computers be used across the curriculum to address all, or at least several, academic subjects. Parents can encourage computer use by letting schools know that they consider it a priority. They can offer practical help in trying to obtain low-cost resources and looking for partnership programs to benefit the school. (SLD)

Identifiers—Infusion Methodology, Language Minorities

Despite disagreement about the value of multicultural education, schools are putting some multicultural learning into the curricula already in place. This guide for parents describes the different ways that schools are teaching multiculturalism. Some schools emphasize programs that focus on information and teach about different cultural groups by adding to the standard curriculum. But the fullest programs alter the standard curriculum fundamentally and add multicultural information to all school subjects. Many multicultural education programs focus on raising the achievement levels of culturally or linguistically different students. These programs take many forms, but they are similar in aiming to help certain students learn as well and as much as students who are already high achievers. These programs can be viewed as compensatory. Still other programs focus on social issues and the cultural and political climate of the school. This type of multicultural education emphasizes human relations and uses parts of the other two types of multicultural education. Such programs may try to reduce racial tensions and to promote learning several languages ("multilingualism"). (SLD)

Descriptors—*Attitude Change, Behavior Change, Community Programs, Conflict Resolution, Elementary Secondary Education, *Parent Role, *Prevention, *Social Bias, Social Discrimination, Training, *Violence, *Youth Programs

Identifiers—Mediation Techniques

This guide describes the many ways to teach bias reduction and violence prevention in order to help schools, community and religious leaders, and parents decide which project is best for their children. Some projects concentrate on changing behaviors, while others concentrate on changing attitudes as a prelude to changing behavior. Some projects assume that the cause of prejudice is the same regardless of who is targeted. These programs focus on reduction of prejudice, bias, and violence. Other programs focus on teaching conflict resolution and mediation skills as bias reduction techniques. Most anti-bias projects also deal with violence as a way to express hatred, emphasizing either changing behaviors to result in attitude change, or changing attitudes to bring about behavior change. Training methods and targeted groups vary among projects. These should be examined by the person selecting a project, as should costs, services, and philosophies. Parents can support anti-bias training for youth by

getting community support and participating in school and community programs (SLD)

Identifiers—Goal Setting

Some minority and female students traditionally have not been given the help they need to enroll and succeed in mathematics and science classes. Now, however, a variety of approaches are available to give these students the extra attention they need. Parents can help children develop an interest in science and mathematics by: (1) identifying role models; (2) stressing the importance of high academic goals and insisting that students not put limits on themselves; (3) encouraging students to interact with teachers and participate actively in class; (4) demonstrating the usefulness of science and mathematics in daily living; (5) urging children to enroll in extracurricular science and mathematics programs; (6) helping children locate question-answering services for homework help; (7) finding tutors and programs to meet the child's needs; and (8) participating in science and mathematics learning activities. Parents should work with the school to make sure children learn advanced science, technology and mathematics. Schools should be urged to provide this instruction in the children's native language to keep them from losing time as they learn English (SLD)

Identifiers—Respect

The enrollment of Asian and Pacific Islander (API) students is increasing rapidly, so it is important for school personnel and community members to learn to communicate with API families. This guide describes how the backgrounds and cultures of the various API groups affect their attitudes and behavior. The three general ethnicities within the API community are Pacific Islanders, Southeast Asians, and East Asians. It is important not to generalize an understanding of one group to another. In general, however, APIs see teachers as profession-

als with authority over their children's schooling. They believe that parents should not interfere and may regard teachers who seek parent participation as incompetent. East Asians in particular value formal education and may place high expectations on their children. Language may be a barrier to many API children, and cultures pose many opportunities for misunderstanding. Good communication depends on respect for API cultural beliefs, communication in person rather than in writing, clear communication of such details as meeting times, and maintaining a professional's role. Explaining aspects of American culture, especially that parent participation is a tradition in American schools, can be very helpful. To avoid putting unnecessary pressure on API students, it is important to reject the stereotype that most Asian students are gifted and that APIs are generally docile. School personnel and community leaders should work with local API organizations to enhance communication. (SLD)

Identifiers—*Shelters

Homeless parents, like all parents, want their children to have a good education, and most are eager to help in any way they can. Some suggestions are offered for helping homeless parents become partners in their children's education. Parent concerns should be addressed directly. They should be assured that their children can learn, that schools will treat them fairly, that services like meal programs and social service referrals are not a sign of inferiority, and that schools take safety issues seriously. In addition, homeless parents should be told about services schools offer for parents, such as adult education and job training. Ways to involve parents begin with explaining to them why their involvement is important and encouraging activities that help them help their children. Parent participation and volunteering can be especially valuable in urban schools, where assets may be limited and many homeless people are located. Parents at a shelter may need special reassurance and information that tells them their rights and explains the opportunities available through the school. (SLD)

Descriptors—Academic Achievement, *Educational Assessment, Educational Policy, Elementary Secondary Education, *English, Evaluation Methods, Identification, Language Proficiency, *Limited English Speaking, *Parent Role, *Student Placement, *Test Use

Identifiers—*Language Minorities

This guide helps parents understand how schools assess their child's English language ability and suggests ways for them to help schools place their children in the most useful language program. All districts must decide which students to test, and then how to test them. Some schools attempt to find out the English skills of all students, and others simply place them and wait until language problems appear. Others fall between the two approaches, automatically assessing students in some categories. The most common assessment method is some kind of formal testing, such as language proficiency examinations, overall achievement testing, or both. Unfortunately, many states test only the ability to speak English, including the states that use the Language Assessment Scales. This instrument measures only a low level of language knowledge and does not determine the higher level needed for success in schools and employment. Parents can help the assessment process by: (1) providing schools with accurate information; (2) organizing centers for language minority students; and (3) requesting the use of several assessment methods. Descriptors—Academic Achievement, Child Development, Critical Thinking, Curriculum, *Decision Making, *Educational Philosophy, Elementary Secondary Education, *Magnet Schools, Needs Assessment, Nontraditional Education, *Parent Role, *School Choice, *Teaching Methods, Thematic Approach

Most large schools have many types of programs serving many types of students, but smaller schools, serving fewer students, may be able to have a more defined "personality," or focus. Focus schools are becoming more popular because their students tend to be high achievers and because many districts are allowing families to choose the schools they want their children to attend. This guide helps parents understand the different types of schools and discusses the benefits and drawbacks of each. Magnet schools, or theme schools, have a single curriculum focus, even though they teach the basics in all subjects. The special emphasis of a magnet school may appeal to particular students, but it is important to be sure that the theme affects all areas of schooling. Schools with an instructional focus are distinguished by an instructional method that guides all aspects of the school's operation. The method usually emphasizes developing students' critical thinking skills. The focus of some schools is how they approach all aspects of education. Their particular orientation, or philosophy, governs and unifies school activities. Before enrolling a child in a focus school with a philosophy, parents should consider whether their children will be committed to the philosophy and do well in a program based on it. Parents should also be committed to the philosophy and be willing to do the work that the school asks (SLD)

Descriptors—*Education Work Relationship.

*Employment Potential. *Employment Qualifications. *English. *High Schools. *Job Applicants. *Job Skills. *Job Training. *Mathematics. *Parent Role. *Problem Solving. *Young Adults

Identifiers—*Entry Level Skills

Recently, some employers were polled to find out which skills are most important for young people working at their first jobs to have. This guide discusses how parents can help children prepare for the work world. Employers are interested in the academic skills of young people and use job application forms and interviews to evaluate them. They want employees to have the ability to learn quickly and to have basic English and mathematics skills. They will usually train workers in the special skills needed for a particular job, but most want employees to have problem-solving ability, the ability to communicate, and the ability to do manual tasks. In addition, employers look for desirable work-related habits and attitudes. Parents can help children prepare for the work world by making sure they have the academic and vocational skills. This begins with finding out what they are learning in school and arranging extra instruction if needed. Parents also can communicate their own experiences to help children know what to expect in the work world (SLD)

Descriptors—Administrators. Classroom Techniques. Disadvantaged Youth. *Educational Practices. Elementary Secondary Education. *Juvenile Gangs. *Prevention. School Safety. Social Problems. Social Services. *Urban Schools. Urban Youth. *Violence. Youth Programs

Identifiers—*Legal Rights

The three essays of this collection explore the prevention of violence in urban schools. The first, "Preventing Violence in Schools," by Mary Harwood Furrell and Lee Eita Powell, focuses on how to prevent violence in schools and offers recommendations on what schools and communities can do. The factors contributing to school violence are numerous, complex, and mostly community-related. A number of strategies are available for addressing the problem from a classroom or school-wide perspective, but others can be suggested for individual students, helping them focus on discipline as positive behavior. Investment programs such as tutoring, counseling, jobs, and recreation and youth facilities would be more cost-effective in the long-run than such measures as hiring more

security. The second essay, "Gang Activity at School: Prevention Strategies," by Shirley Lal, reviews what is known about gangs and their impact and consequences in schools. It also suggests a variety of strategies for preventing gang activity and altering negative gang behavior. The final essay, "School Violence and the Legal Rights of Students Selected Issues," by Dorianne Beyer, considers the effects of the public perception of widespread and growing school violence, which leads to a situation in which the rights of school administrators come to take precedence over the rights of students when school safety is at stake. The current judicial trend highlights society's fears and disrespect for children. Contains a total of 90 references. (SLD)

Descriptors—*Academic Achievement. Attendance. *Educational Change. Elementary Secondary Education. Participation. *Professional Development. School Restructuring. *School Size. *Small Schools. Student Attitudes. *Urban Schools

Identifiers—*House School

Many educators see school downsizing efforts as the linchpin of school restructuring. Several forms that school downsizing efforts are taking are explored, along with a discussion of the reasons for which small schools are being established. The types of subschools that are being launched (houses, mini-schools, schools-within-schools) are described. The largely exploratory study is derived from an extensive review of the literature and documentation, evaluation, and policy studies of 22 schools-within-schools and small schools conducted over the past 15 years. Experiences in three cities, New York (New York), Philadelphia (Pennsylvania), and Chicago (Illinois), are highlighted. The evidence suggests that there are multiple reasons for downsizing, notably the enhancement of commitment and performance and the development of teachers and students. A number of subunits, subschools, and small schools have been quite successful in achieving better attendance, more positive attitudes, and greater achievement. Schools that have been designed and operated as distinctive and autonomous entities have had a better chance of success. While downsizing is clearly no magic bullet, it can increase student participation, reduce dropouts, improve achievement, and enhance teacher efficacy. (Contains 2 figures and 136 references.) (SLD)

Descriptors—*Art Criticism, *Art Education,
Critical Viewing, Discipline Based Art Education,
Elementary Secondary Education, Visual Arts

This collection of lessons is meant to be a practical guide to help teachers engage children in art criticism. The lessons generally follow a similar format. Most suggest an age group but may be modified for use with younger or older students. Several authors suggest variations and extensions for lessons that include studio activities. A broad range of topics is embraced including popular art, the built and natural environment, multicultural concerns, and formalist and political contemporary museum art. Most of the lessons stress contemporary artifacts. Lessons include: (1) "Creating a Climate for Talking about Art" (Sandra Kay Mims); (2) "A Potpourri of Questions for Criticizing Realistic Paintings" (Karen A. Hamblet); (3) "Constructing Meaning: A Gaming Strategy" (Richard A. Cigankov); (4) "Investigating Criteria for Judgments" (Sally Hagaman; Polly Wolfe); (5) "Collaborative Art Criticism: Not Mine, Not His, Not Hers, But Our Critique!" (Herb Perry); (6) "Criticizing Modern Paintings" (George Gashigan; Verna Yoder); (7) "Interpreting Snake Bird: A Critical Strategy" (Tom Anderson); (8) "Criticizing Advertising: Women, Ads, and Art" (Elizabeth Garber; Roy Pearson); (9) "Criticizing Television: Aesthetic and Cultural Approaches to TV Images" (Rogena M. Degge; Carolyn A. Cochrane); (10) "Experiencing Environments: Criticizing Architecture" (Linda F. Ertinger); (11) "A Place-Based Framework for Criticizing Art" (Doug Blandy; Elizabeth Hoffman); (12) "Baskets: Containers of Culture" (Lorne Blaz); (13) "Interpreting Among Storycloths" (Krisin G. Congdon); (14) "Interpreting Paintings Metaphorically: Edward Hopper's House by the Railroad" (Hermene Feinstein); (15) "Interpreting Your World Through Romare Bearden's Windows" (William F. Harris); (16) "Understanding Graffiti Art: Keith Haring's Subway Drawings" (Sydney Walker; Jennifer Cross); (17) "Understanding Conceptual Art: Christo's Wrappings" (Carole W. Arnold; Robert L. Arnold); (18) "Maximizing Minimalism: Connecting with the Art of Anne Truitt" (Renee Sandell; Stacy Bell; Monica McHugh; Charles Wehr); (19) "Criticizing Criticism: Competing Judgments of Leon Golub's Paintings" (Sun-Young Lee); (20) "The Critic as Empathetic Other" (Cynthia Taylor); and (21) "Amy's Critic" (Amy Sander). The anthology concludes with a selection of "Related Resources in the ERIC Database." (MM)

Descriptors—Adult Basic Education, *Adult Literacy, Competency Based Education, *Educational Philosophy, Educational Trends, *English (Second Language), *Language Experience Approach, *Literacy Education, Second Language Instruction, Student Developed Materials, Student Participation, Teaching Methods, Trend Analysis, *Whole Language Approach, Writing Instruction

Identifiers—ERIC Digests, Freire (Paulo)

Five approaches currently used in adult English-as-a-Second-Language (ESL) literacy instruction are described. A group of strategies developed by Paulo Freire are participatory or learner-centered, and revolve around the discussion of issues drawn from learners' real-life experiences. The Whole Language Approach, more than a specific method or collection of strategies, techniques, or materials is a perspective emphasizing the use of language as a whole, not as discrete parts. Whole language classes work together to develop the curriculum, read and write for and with each other, and evaluate products together. Classroom activities might include extended reading and writing. The Language Experience Approach is a teaching strategy or technique consistent with the whole language perspective. In it, learner experiences are dictated, then transcribed and used as reading material. Lack of authentic reading materials for adult ESL literacy programs has inspired a related approach, one focusing on learner writing and publishing. Most writing-based classrooms follow a writing-process approach in which learners and the teacher brainstorm writing topics, draft pieces, share and confer about writing, revise, edit, and publish in a workshop atmosphere in which reading, writing, and talk are integrated and support each other. Finally, competency-based education, used in adult ESL literacy since the mid-1970s, is based on the learning of competencies expressed in terms of tasks. Four components include assessment of learner needs, selection of relevant competencies, and instruction and evaluation based on those competencies. Contains eight references and four published learner writing references. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

Evaluating Workplace ESL Instructional Programs. ERIC Digest.

Adjunct ERIC Clearinghouse for ESL Literacy
Education, Washington, DC.; National Clearinghouse for ESL Literacy Education, Washington, DC.Spons Agency—Office of Educational Research
and Improvement (ED), Washington, DC.

Report No.—EDO-LE-95-07

Pub Date—Sep 95

Note—4 p.; 4p.

Available from—ERIC/NCLE, 1118 22nd Street
N.W., Washington, DC 20037.

Pub Type—(071)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Adult Basic Education, *Adult Literacy, *English (Second Language), Evaluation Methods, Expectation, *In Plant Programs, Interviews, *Literacy Education, *Personnel Evaluation, Portfolios (Background Materials), Productivity, *Program Evaluation, Second Language Instruction

Identifiers—ERIC Digests, *Focus Groups Approach

With the increase in workplace English-as-a-Second-Language (ESL) literacy education programs, there is a need to assess whether the attention given to improving basic skills and English language proficiency has made a change in the participant and in the workplace. Such evaluations often use both qualitative and quantitative measures of program outcomes. Qualitative measures include focus groups and individual (stakeholder) interviews, workplace observations, and portfolios of learner classwork. Quantitative measures include commercially available tests, scaled performance ratings, and some program-developed assessment tools, such as portfolios. To increase credibility and help ensure reliability of qualitative measures, evaluators collect multiple types of evidence (such as interviews and observations) from various stakeholders (employers, labor unions, participants, teachers, funders) related to a single outcome and arrange them into matrices, organizing them thematically and enabling analysis of data across respondents. Two commercially available tests that are commonly used sources of quantitative data are the Basic English Skills Test (BEST) and the Comprehensive Adult Student Assessment System (CASAS) ESL Appraisal. These instruments are easy to use, and their reliability has been tested but they may not measure what has been taught in the classroom, and they may have little applicability to specific workplace tasks. Other issues surrounding evaluation of workplace ESL instruction are these: unrealistic stakeholder expectations; the need for additional, cross-cultural training in techniques for success in the American workplace; and inadequate funding. Contains 12 references. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

Descriptors—Adult Basic Education, *Adult Literacy, *English (Second Language), Evaluation Criteria, Evaluation Methods, Language Skills, *Language Tests, *Literacy Education, Portfolios (Background Materials), Program Evaluation, Second Language Instruction, *Student Evaluation, *Testing

Identifiers—ERIC Digests

Learner assessment is conducted in adult basic education and adult English-as-a-Second-Language (ESL) educational programs for many reasons: to place learners at appropriate instructional levels; to measure ongoing progress; to qualify students for enrollment in academic or job training programs; to verify program effectiveness; and to demonstrate learner gains for continued program funding. Because of these multiple objectives, learner assessment involves a variety of instruments and procedures. In adult basic education, commercially available instruments predominate as assessment tools because they have construct validity and scoring reliability, are easy to administer to groups, require minimal teacher training, and are often stipulated by funding sources. Their use is problematic because they may not adequately assess individual learner strengths and weaknesses, especially at the lowest literacy skill levels. They also do not necessarily measure what has been learned in class or address learner goals. Alternative assessments (also known as classroom-based, authentic, or congruent assessment) such as surveys, interviews, check-product characteristics can enhance the success of their marketing efforts. These include: beginning with companies with a history of offering employee training at all levels; offering realistic assessments of time and resources needed to accomplish training; offering short courses with specific, attainable goals; offering cross-cultural courses to both native and non-native English-speakers at the workplace; developing realistic ways of documenting how instruction has improved workplace performance; engaging managers' active support; and providing skills that transfer to areas of life outside the workplace. Contains 10 references. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

mate, Program Design, Second Language Programs, *Vocational English (Second Language)

Identifiers—ERIC Digests

Although basic skills and English language instruction are often viewed as real needs at the workplace, few companies provide this for their workers. Those that do are motivated by one or more of these factors: product quality improvement, commitment of top management to training and education, or the sales effort of an educational provider. Those that do not provide such instruction give these reasons: cost of instruction; reluctance of upper management to initiate training; and finding alternative ways of dealing with workers' educational deficiencies. Developers of instructional programs in English as a second language (ESL) have found that preparation in a number of areas and product characteristics can enhance the success of their marketing efforts. These include: beginning with companies with a history of offering employee training at all levels; offering realistic assessments of time and resources needed to accomplish training; offering short courses with specific, attainable goals; offering cross-cultural courses to both native and non-native English-speakers at the workplace; developing realistic ways of documenting how instruction has improved workplace performance; engaging managers' active support; and providing skills that transfer to areas of life outside the workplace. Numeracy in the Adult ESL Classroom. ERIC Digest.

National Clearinghouse for ESL Literacy Education, Washington, DC.

Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.

Report No.—EDO-LE-96-02

Pub Date—Feb 96

Note—4 p.; 4p.; A product of the Project in Adult Immigration Education (PAIE).

Available from—NCLE, 1118 22nd Street, N.W., Washington, DC 20037.

Pub Type—(071) — (142) — (052)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Adult Basic Education, Class Activities, Classroom Techniques, Course Content, Educational Needs, *English (Second Language), Instructional Materials, Language Teachers, *Literacy Education, *Mathematics Instruction, *Numeracy, Second Language Instruction, Second Language Programs, Student Needs, *Teacher Attitudes, Teacher Education

Identifiers—ERIC Digests

A discussion of numeracy (the ability to cope confidently with the mathematical demands of everyday life), focuses on provision of numeracy instruction alongside English-as-a-Second-Language (ESL) instruction for learners with low literacy skills. It looks first at considerations and methods for assessing student numeracy needs, including the nature of adult learning, student preferences and abilities, and differences in the uses of mathematical symbols and forms of computation in the learners' native language and culture. The discussion then turns to the attitudes and approaches to numeracy of ESL and literacy instructors, who may not be familiar with or comfortable with mathematics or mathematics teaching and may see mathematics skills as discrete and separate from literacy rather than as integral to it. Recommendations for training to teach adult mathematical literacy, based on recent initiatives, are offered. Specific classroom techniques for effective lesson planning and presentation are also outlined. Two numeracy activities, one introducing a place-value chart and one on metric measurement, are offered as illustrations of effective techniques. Descriptors—Access to Education, *Agency Cooperation, Course Content, Curriculum Design, Educational History, Educational Objectives, *English (Second Language), *Industrial Training, *Inplant Programs, *Literacy Education, Program Design, Second Language Programs, *Unions

Identifiers—ERIC Digests

Labor unions have provided English-as-a-Second-Language (ESL) instruction in the workplace since the early 1900s, to serve a growing immigrant workforce. In the late 1970s and early 1980s, an increase in immigrant population, decline in manufacturing jobs, new technology, and work restructuring brought a new urgency to union-sponsored worker education, primarily to provide workers with access to training. The need for communication skills, problem-solving skills, and knowledge of workplace organization for the high-performance workplace has recently emerged as a new need. Programs usually involve a partnership of unions, businesses, and educational entities. These may include union consortia, joint union-company partnership funds, or individual unions forming partnerships with employers and educators. Workplace ESL instruction and curricula for union programs incorporate the range of approaches and techniques found in many adult ESL programs. While the major focus is on job-related language skills, the programs may also teach general life skills, worker rights and responsibilities, problem-solving and critical thinking, and health safety. Contains 11 references. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

Identifiers—American Bar Association, ERIC

A guide to the vast array of available resources for law-related education (LRE), this annotated bibliography is intended to assist any one concerned with the civic education of youth, especially teachers and other members of the K-12 educational community. It offers information about the law, innovative teaching methods, and guides to national LRE programs. Part 1 presents an annotated bibliography of 43 LRE teaching materials, resource guides, and research documents in Resources in Education. Part 2 provides an annotated bibliography of 50 journal articles in Current Index to Journals in Education. Part 3 has two ERIC digests on LRE. The first is "Mediation in the Schools" by David Keller Trevaskis. The second digest is Robert S. Leming's "Teaching about Landmark Dissents in United States Supreme Court Cases." Part 4 contains the American Bar Association's "Essentials of Law-Related Education: A Guide for Practitioners and Policymakers." Also included are appendices that provide contact information for a network of LRE programs being conducted at both national and state levels and instruction on submitting LRE documents to the ERIC system. Identifiers—*American Bar Association, ERIC Digests

Defining law-related education (LRE) as "education to equip nonlawyers with knowledge and skills pertaining to the law, the legal process, and the legal system, and the fundamental principles and values on which these are based, this Digest outlines four essential elements of LRE. These are: (1) subject matter and concepts; (2) instructional strategies and

contexts; (3) skills; and (4) attitudes, beliefs, and values. Together, they provide K-12 students with active learning experiences that enhance their ability to explore rights and responsibilities under the law, confront and resolve disputes, and discuss and analyze public issues. The digest contains a five-item bibliography. (LH)

This booklet is a selective guide to a larger computer-searchable database of teaching materials on Japan. The materials in the guide consist mainly of lesson plans, teaching guides, resource guides, and units on Japan. Each part contains bibliographic information on resources for teaching about Japan at specific grade levels or subject areas. "Elementary School Materials" include: (1) "The Arts"; (2) "Artifacts"; (3) "Multicultural/Global"; (4) "Multimedia Units"; and (5) "Varied Topics and General Overviews." "Secondary School Materials" contains: (1) "The Arts/Religion"; (2) "Artifacts"; (3) "Economy/Government"; (4) "Geography"; (5) "Multicultural/Global"; (6) "Multimedia Units"; (7) "Varied Topics and General Overviews"; and (8) "War." "Elementary to Secondary Materials" includes: (1) "The Arts/Religion"; (2) "Artifacts"; (3) "Multicultural"; (4) "Multimedia Units"; (5) "Varied Topics and General Overviews"; and (6) "War." The appendix contains information on further resources. (EH)

APPENDIXES

NETWORK COMPONENTS

The ERIC network of organizations is comprised of the following major components:

- **ERIC Program Office**

The central funding and monitoring unit within the U.S. Department of Education, Office of Educational Research and Improvement (OERI). Responsible for overall management of the ERIC network.

Educational Resources Information Center (ERIC)
National Library of Education (NLE)
Office of Educational Research and Improvement (OERI)
555 New Jersey Avenue, N.W.
Washington, DC 20208-5721
Telephone: 202-219-2221
FAX: 202-219-1817
e-mail: eric@inet.ed.gov

- **ERIC Clearinghouses**

Sixteen contractors from the academic and not-for-profit sectors, each responsible for collecting the significant educational literature within their particular scope of interest area (e.g., career education), selecting the highest quality and most relevant material, processing (i.e., cataloging, indexing, abstracting) the selected items for input to the database, and also for synthesizing the literature and providing information analysis products (e.g., Digests) and various user services. (See list on p. 2-3.)

- **Adjunct ERIC Clearinghouses**

Various organizations that cooperate with ERIC Clearinghouses at no cost to ERIC to cover a particular specialized area of education in which they have a special interest, e.g., consumer education. (See list on p. 4.)

- **ERIC Support Components**

Four components providing various specialized technical services in support of the ERIC Program Office, ERIC Clearinghouses, and each other: e.g., centralized database management and abstract journal production, document delivery and micrographics, outreach and user services, and commercial publishing (*Current Index to Journals in Education* (CIJE) and ERIC *Thesaurus*). (See list on p.4.)

ERIC CLEARINGHOUSES

ERIC Clearinghouse on ADULT, CAREER, AND VOCATIONAL EDUCATION (CE)

Ohio State University
Center on Education and Training for Employment
1900 Kenny Road
Columbus, Ohio 43210-1090
Telephone: 614-292-4353; Toll Free: 800-848-4815
FAX: 614-292-1260
e-mail: ericacve@postbox.acs.ohio-state.edu

All levels of adult and continuing education from basic literacy training through professional skill upgrading. The focus is upon factors contributing to the purposeful learning of adults in a variety of life situations usually related to adult roles (e.g., occupation, family, leisure time, citizenship, organizational relationships, retirement, and so forth). [Includes input from Adjunct ERIC Clearinghouse on Consumer Education.]

ERIC Clearinghouse on ASSESSMENT AND EVALUATION (TM)

Catholic University of America
210 O'Boyle Hall
Washington, DC 20064-4035
Telephone: 202-319-5120; Toll Free: 800-464-ERIC (3742)
FAX: 202-319-6692
e-mail: eric_ae@cua.edu

All aspects of tests and other measurement devices. The design and methodology of education-related research, measurement, and evaluation. The evaluation of educational programs and projects. The application of tests, measurement, and evaluation devices/instrumentation in education projects and programs. [Includes input from Adjunct ERIC Clearinghouse for the Test Collection.]

ERIC Clearinghouse for COMMUNITY COLLEGES (JC)

University of California at Los Angeles (UCLA)
405 Hilgard Avenue, 3051 Moore Hall
P.O. Box 951521
Los Angeles, California 90024-1521
Telephone: 310-825-3931; Toll Free: 800-832-8256
FAX: 310-206-8095
e-mail: ericcc@ucla.edu

Development, administration, and evaluation of two-year public and private community and junior colleges, technical institutes, and two-year branch university campuses. Two-year college students, faculty, staff, curricula, programs, support services, libraries, and community services. Linkages between two-year colleges and business/industrial/community organizations. Articulation of two-year colleges with secondary and four-year postsecondary institutions. [Includes input from Adjunct ERIC Clearinghouse on Entrepreneurship Education.]

ERIC Clearinghouse on COUNSELING AND STUDENT SERVICES (CG)

University of North Carolina at Greensboro
School of Education
201 Ferguson
Greensboro, North Carolina 27412
Telephone: 910-334-4114; Toll Free: 800-414-9769
FAX: 910-334-4116
e-mail: ericcs2@dewey.uncg.edu

Preparation, practice, and supervision of counselors at all educational levels and in all educational settings. Theoretical development of counseling and guidance, as it pertains to education, including the nature of relevant human characteristics. Use and results of personnel practices and procedures. Group process (counseling, therapy, dynamics) and case work in education settings.

ERIC Clearinghouse on DISABILITIES AND GIFTED EDUCATION (EC)

Council for Exceptional Children (CEC)
1920 Association Drive
Reston, Virginia 20191-1589
Telephone: 703-264-9474; Toll Free: 800-328-0272
FAX: 703-620-2521
e-mail: ericec@cec.sped.org

All aspects of the education and development of persons (of all ages) who have disabilities or who are gifted, including the delivery of all types of education-related services to these groups. Includes prevention, identification and assessment, intervention, and enrichment for these groups, in both regular and special education settings.

ERIC Clearinghouse on EDUCATIONAL MANAGEMENT (EA)

University of Oregon (Dept. 5207)
1787 Agate Street
Eugene, Oregon 97403-5207
Telephone: 541-346-5043; Toll Free: 800-438-8841
FAX: 541-346-2334
e-mail: ppiele@oregon.uoregon.edu

All aspects of the governance, leadership, administration, and structure of public and private educational organizations at the elementary and secondary levels, including the provision of physical facilities for their operation.

ERIC Clearinghouse on ELEMENTARY AND EARLY CHILDHOOD EDUCATION (PS)

University of Illinois at Urbana-Champaign
Children's Research Center, Room 9
51 Gerty Drive
Champaign, Illinois 61820-7469
Telephone: 217-333-1386; Toll Free: 800-583-4135
FAX: 217-333-3767
e-mail: ericece@uiuc.edu

All aspects of the physical, cognitive, social, emotional, educational, and cultural development of children, from birth through early adolescence. Among the topics covered are: prenatal and infant development and care; parent education; home and school relationships; learning theory research and practice related to children's development; preparation of early childhood teachers and caregivers; and educational programs and community service for children. [Includes input from Adjunct ERIC Clearinghouse for Child Care.]

GENERAL INFORMATION

■ **DOCUMENT AVAILABILITY**—ERIC uses 3 codes to indicate the format in which a document is available

- **Level 1**—available in both paper and microfiche
- **Level 2**—available in microfiche only
- **Level 3**—not available through EDRS; see "Available From" in the abstract for source information

■ **EJ ARTICLES**—EJ articles are NOT available through EDRS. For copies contact:

- ISI (Institute for Scientific Information): 800-523-1850 or 215-386-0100
- UMI: 800-248-0360 or 415-433-5500

■ **PAPER COPY (PC)**—A Paper Copy is a laser-printed reproduction of electronic images created from the microfiche of the original document. Each paper copy has a Vellum Bristol cover to identify and protect the document.

■ PAYMENT

- Prices set forth herein do not include any sales, use, excise, or similar taxes that may apply to the sale of microfiche or paper copy to the customer. The cost of such taxes, if any, shall be borne by the customer.
- Payment terms are **NET THIRTY (30) DAYS** by check or money order payable to EDRS in **U.S. DOLLARS** drawn on a **U.S. BANK**.
- The DynEDRS, Inc. Federal ID # is 54-1828547
- **REPRODUCTION**—Permission to further reproduce a copyrighted document provided hereunder must be obtained from the copyright holder, usually noted on the front or back of the title page of the copyrighted document.

■ **CLAIMS POLICY**—**ALL SALES ARE FINAL**. EDRS will replace products returned within 30 days of delivery due solely to reproduction defects or incompleteness caused by EDRS.

DEPOSIT ACCOUNTS

Customers who have a continuing need for ERIC Documents may wish to open a **Deposit Account**. Payments in U.S. dollars drawn on a U.S. bank may be made by check, money order, purchase order (domestic customers only), or by credit card (MasterCard or Visa).

■ **DOMESTIC CUSTOMERS** can establish an account for a \$200.00 suggested minimum. If tax exempt, include a copy of the tax exempt certificate.

■ **INTERNATIONAL CUSTOMERS** can establish an account for a recommended minimum of \$500.

OTHER EDRS PRODUCTS

■ **Standing Orders and Backfiles** for either the **FULL ERIC COLLECTION** or individual **CLEARINGHOUSE COLLECTIONS** are available.

■ EDRS also offers **TOPICAL COLLECTIONS** in several subject areas.
